Manufacturing refers to the utilization of machinery, tools, chemical processing, and human labor to transform raw materials or components into finished goods. It can be broadly categorized into contract manufacturing, additive manufacturing, and advanced manufacturing. Modern manufacturing is central to industrial production, from the production of base materials to the production of semi-finished goods and finished goods. A number of cutting-edge techniques have been developed over the past years that enable manufacturing processes to be more environment-friendly, adaptable, and less energy-consuming. This book contains some path-breaking studies on modern manufacturing as well as the materials, processes, and systems involved in it. It will also provide interesting topics for research which interested readers can take up. The book will help the readers in keeping pace with the rapid changes in this field. **Fundamentals of Modern Manufacturing** Groover, 2013-02-07

Fundamentals of Modern Manufacturing Mikell P. Groover, 2008-11-25 **Principles of Modern Manufacturing**

Mikell P. Groover, 2011 Engineers rely on Groover because of the book's quantitative and engineering-oriented approach that provides more equations and numerical problem exercises. The fourth edition introduces more modern topics including new materials, processes, and systems. End-of-chapter problems are also thoroughly revised to make the material more relevant. Several figures have been enhanced to significantly improve the quality of artwork. All of these changes will help engineers better understand the topic and how to apply it in the field. **Fundamentals of Modern Manufacturing**

Groover, 1996-01-01 **Maintainability of Facilities** Michael Chew Yit Lin, 2010 Focuses on spearheading the integration of maintainability right from the design stage. This title aims to improve the standard and quality of design, construction, and maintenance practices to produce efficient facilities that require minimum maintenance. It covers the technical issues related to maintainability of major components of a facility. **Engineering Design** Madara Ogot, Gül Kremer, 2004 This text provides an introduction to the design tools used in engineering design. It focuses on the first two steps of the design process: determination of need, problem clarification, and conceptualization.
