how major figures such as F W Murnau Orson Welles and Alfred Hitchcock used camera movement to enrich their stories and deepen their themes Balancing close analysis with a broader poetics of camera movement Keating uses archival research to chronicle the technological breakthroughs and the changing division of labor that allowed for new possibilities as well as the shifting political and cultural contexts that inspired filmmakers to use technology in new ways An original history of film techniques and aesthetics The Dynamic Frame shows that the classical Hollywood camera moves not to imitate the actions of an omniscient observer but rather to produce the interplay of concealment and revelation that is an essential part of the exchange between film and viewer
