Kaldor, 1978 Collected Economic Essays Nicholas Kaldor, 1964
Pigou, 1923 Essays in Applied Economics Arthur Cleave Pigou, 1923 The Scourge of Monetarism Nicholas Kaldor, 1985
Now thoroughly revised and updated this edition also includes a new introduction which places Britain's experience of monetarism into a world context *The Development Frontier* Péter Tamás Bauer, 1991 Bauer emeritus London School of Economics describes and analyzes major features of the emergence of less developed countries from subsistence to exchange economies and from their subsequent advance The 17 essays focus on significant topics and issues that are neglected or treated inadequately or inappropriately in the literature on economic development Six of the essays were written specifically for this volume two are reprinted with only minor changes and the remainder are substantially revised versions of previous publications Annotation copyrighted by Book News Inc Portland OR Nicholas Kaldor J. King, 2008-12-17 This book explores the life and work of Nicholas Kaldor examining the influences that shaped and inspired his writings and looks in detail at the crucial part he played in twentieth century economics Offering a comprehensive intellectual portrait of Kaldor this book explains this great economist's importance in his own time and in ours **The Foundations of Non-Equilibrium Economics** Sebastian Berger, 2009-09-10 This thought provoking volume seeks to answer some of the ultimate economic questions in terms of a theory that emerged with Adam Smith and is now come to full fruition the principle of circular and cumulative causation CCC This full fledged theoretical framework explains the whole interplay of technology firms resources culture institutions and economic policy to understand the basic drives behind modern day economic dynamics *The Political Economy of Competitiveness* Michael Kitson, Jonathan Michie, 2015-12-22 The Political Economy of Competitiveness offers an original perspective on the relationship between economic theory and policy It places the issues within an accessible political economy perspective Rejecting the narrowness of mainstream economics the authors deploy an interdisciplinary approach to the problem of economic growth placing it in its historical and political context Issues covered include trade theory and policy industrial decline and policy markets competition and innovation globalisation unemployment and government policy The book provides a valuable guide to the major economic policy issues for both economists and business students **Competitiveness and Development** Mehdi Shafaeddin, 2012-09-15 In Competitiveness and Development the author explains the confusion surrounding the concept of competitiveness in the context of developing countries proposes policies for achieving competitiveness at a high level of development examines its possibilities and constraints and suggests policy changes necessary at the national and international levels Shafaeddin illustrates how developed countries impose restrictive policies on developing countries through international financial institutions and the WTO as well as regional and bilateral agreements which limit their policy space for promoting dynamic comparative

advantage in order to achieve competitiveness at a high level of development Ultimately such policies lock developing countries that are at early stages of development in specialization based on static comparative advantage and competitiveness at a low level of development *Building Chicago Economics* Robert Van Horn, Philip Mirowski, Thomas A. Stapleford, 2011-10-17 Over the past forty years economists associated with the University of Chicago have won more than one third of the Nobel prizes awarded in their discipline and have been major influences on American public policy *Building Chicago Economics* presents the first collective attempt by social science historians to chart the rise and development of the Chicago School during the decades that followed the Second World War Drawing on new research in published and archival sources contributors examine the people institutions and ideas that established the foundations for the success of Chicago economics and thereby positioned it as a powerful and controversial force in American political and intellectual life

Modern State Intervention in the Era of Globalisation Nikolaos Karagiannis, Zagros Madjd-Sadjadi, 2007-06-26 Modern State Intervention in the Era of Globalisation is a thoughtful and well researched assessment of the evolving role of the state in the contemporary world economy This work is provocative because it goes against the predominant arguments in favor of a minimal state as commonly asserted by neoclassical economics Instead Karagiannis and Madjd Sadjadi think outside of the box and produce both theoretical arguments and evidence from important cases such as the EU Singapore and Hong Kong to support the idea of a viable and continuing role for the Developmental State The scholarship underlying this very readable book which includes contemporary material as well as ancient economic thought is truly impressive Readers will be left with much to reconsider about the benefits of globalisation Patrick James University of Southern California US [Protectionism and Economic Revival](#) Michael Kitson, Solomos Solomou, 1990-09-28 The impact of protectionism is a contentious policy issue This book evaluates the effects of protectionism on the British inter war economy and argues that trade policies should be constructed in the context of prevailing economic conditions not solely with reference to theoretical perspectives

Profitability and the Great Recession Ascension Mejorado, Manuel Roman, 2013-10-23 From the mid 1980s investors in the US increasingly directed capital towards the financial sector at the expense of non financial sectors lured by the perception of higher profits This flow of capital inflated asset prices creating the stock market and housing bubbles which burst when the imbalance between stagnant incomes and rising debts triggered the banking meltdown Profitability and the Great Recession analyses these trends in profitability and capital accumulation which the authors identify as the root cause of the financial crisis in the context of the US and other major OECD countries Drawing on insights from Adam Smith David Ricardo John Stuart Mill and Karl Marx the authors interpret the relationship between capital accumulation and profitability trends through the conceptual lens of classical political economy The book provides extensive empirical evidence of declining rates of US non financial corporate accumulations from the mid 1960s and profitability trends in that sector falling from post war highs In contrast to this it is shown that there was a vigorous rise of profitability in the financial sector from a 1982

trough to the early part of the twenty first century which led to the bloating of that sector The authors conclude that the long term falling accumulation trend in the non financial corporate sector highlighted by the bankruptcy of major automobile corporations stands out as the underlying force that transformed the financial crisis into a fully fledged Great Recession This book will be of interest to students and researchers in the areas of economics political economy business and finance

Innovation in Business and Enterprise: Technologies and Frameworks Al-Hakim, Latif, Jin, Chen, 2010-05-31 Innovation is essential to maintaining organizations long term stability and increasing both the quality and value of goods and services Innovation in Business and Enterprise Technologies and Frameworks focuses on managing innovation through bridging gaps created from theories relative advantages or competitiveness social differences and innovation capability and performance

Oil, State and Industrialization in Iran Massoud Karshenas, 1990-09-28 An examination of the problems of economic growth and structural change in oil exploring economies which focuses on the experience of Iran The author argues that oil income can make a substantial contribution to industrial growth subject to the adoption of appropriate policy measures

Technology, Trade and Growth in OECD Countries Valentina Meliciani, 2001-05-10 Presenting new material and a fresh perspective Technology Trade and Growth in OECD Countries provides a unifying framework for the exploration of the role played by specialisation in economic growth and international competitiveness *The Global Dimension of Economic Evolution* Kurt Dopfer, 2012-12-06 This volume on evolutionary approaches to economic development and growth is a member of a family of special volumes that Springer has published on Evolutionary Economics recently The present volume has excellent predecessors There is a special volume on Evolution in Markets and Institutions edited by Ulrich Witt and another on Evolutionary and Neoclassical Perspectives on Market Structure and Economic Growth edited by Yannis Katsoulacos And there are more in the pipeline The volumes already published reflect the broad ranging interests of evolutionary economists and within the scope delineated they are devoted to major research areas of the discipline The editorial intention behind the venture of special volumes has been to bundle together some of the research areas in order to sharpen the problem focus and to generate research synergies within major research fields We may somewhat obviously define a research field by its research topics For the present purpose however we may wish to conceive the research conducted by evolutionary economists as belonging to either a research area that is inspired in its problem perspective by neoclassical economics or to one that is not The very success of the critique of the neoclassical paradigm relied on a preoccupation with its research scope and questions Evolutionary economics has scored marvelously in challenging major neoclassical stands and neoclassical economics may never be quite the same in the future **Development Economics in the Twenty-First Century** Claudia Sunna, Davide Gualerzi, 2015-12-14 Development Economics has been identified as a homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an international

contributor team in order to explore the origins and evolution of development economics This book highlights the different elements of high development theory through a precise reconstruction of the different theoretical approaches that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and Stiglitz The chapters situate development economics within current debates among economists and historians of economic thought providing a platform for future research This book is suitable for researchers and students with an interest in Development Economics the History of Economic development and the Economics of Developing Countries
