Future Of Federalism:

Indigenous Peoples and the Future of Federalism Amy Swiffen, Joshua Nichols, 2023-12-18 As a settler state Canada's claims to sovereign control over territory are contested by Indigenous claims to land and to self determination Indigenous Peoples and the Future of Federalism presents legal analyses that explore forms of federalism and their potential to include multiple and divided sovereignties This collection aims to advance reconciliation with Indigenous peoples in Canada and elsewhere by developing jurisprudence on the possibilities for a nation to nation relationship between Indigenous nations and Crown sovereignty Contributors use legal creativity to explore how federalism can be structured to include the constitutional jurisdiction of Indigenous nations Several chapters are grounded in the Canadian context while others connect the issues to international law and other settler colonial jurisdictions recognizing how Indigenous resistance to settler laws and government decisions can at the same time be the enactment of Indigenous legalities and constitutional cultures Ultimately Indigenous Peoples and the Future of Federalism offers innovative ways for Canada to move forward from this challenge using existing constitutional mechanisms to give life to a plurinational Canadian federalism inclusive of the jurisdiction of Indigenous peoples

Preserving Public Lands for the Future William R. Lowry,1998-10-01 Comparing national efforts to preserve public lands William R Lowry investigates how effectively and under what conditions governments can provide goods for future generations Providing intergenerational goods ranging from balanced budgets to space programs and natural environments is particularly challenging because most political incentives reward short term behavior Lowry examines the effect of institutional structure on the public delivery of these goods He offers a theoretical framework accounting for both the necessary conditions public demand political stability and official commitment to long term delivery and constraining factors the tensions between public agencies and politicians as well as between different levels of government that determine the ability of a nation to achieve long term goals In support of this argument Lowry evaluates data on park systems from more than one hundred countries and provides in depth case studies of four he United States Australia Canada and Costa Rica to show how and why the delivery of intergenerational goods can vary For each of the cases he reviews background information discusses constraints on agency behavior and assesses expansion of the park systems and restoration of natural conditions at specific locations This extensive comparative analysis of the preservation of public lands offers new insights into the capability of nations to pursue long term goals
