

In all four main scenarios, religiously unaffiliated Americans are projected to approach or exceed Christians in number by 2070

% of Americans of all ages in each group (projected)

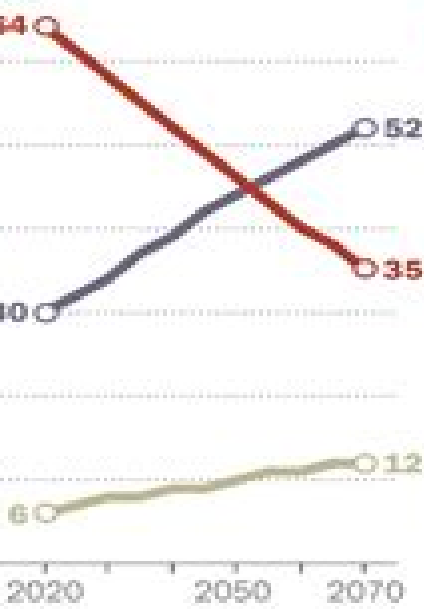

Scenario 1: Steady switching
Movement into and out of Christianity remains stable at recently observed rates. That is, in each new generation, 31% of Christians become religiously unaffiliated before they turn 30, and 21% of unaffiliated people become Christian.

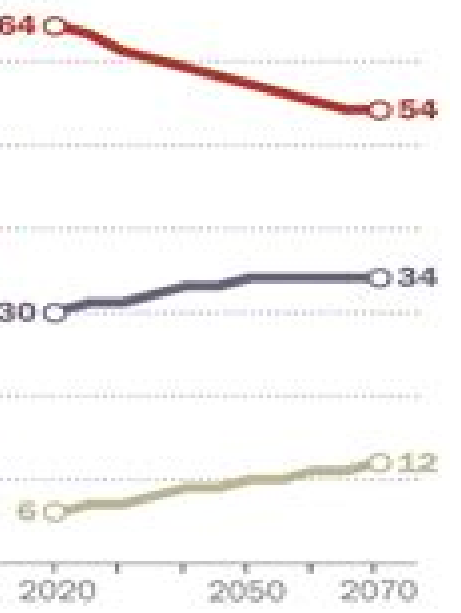

Scenario 2: Rising disaffiliation with limits
In each new generation, a growing share of Christians switch out before they turn 30, while a shrinking share of 'nones' switch in. But the switching rate is capped to prevent the share of Christians who leave the faith from rising above 50%.

Scenario 3: Rising disaffiliation without limits
In each new generation, a growing share of Christians switch out before they turn 30, while a shrinking share of 'nones' switch in. No cap is imposed on switching rates.

Scenario 4: No switching
This scenario imagines no person in America has changed or will change their religion after 2020.
