Each of the 12 views of earth have been selected to show the most interesting and dynamic of the planet's features from the deep gorges of the Pacific Rim to the Himalayan Mountain range and the spectacular topography of the Western United States. The images are supplied by WorldSat, the only company that has the entire world as photographs stored on a digital database. Instead of simple direct vertical photographs, the digital database will allow oblique views that enhance the topography and sectional angles of the globe with the horizon still in place **The Future Quixtar Consumer : Webolutionary Prospects for E-shoppers, Prosumers and Quixtar IBOs** Frank Feather, 2002 [When Humans Stop Shopping](#) David Kerrigan, 2020-03 People have stopped shopping in the ways we've all been used to, and the next few years will see further dramatic changes as many humans stop shopping altogether, opting instead to let algorithms make their purchase decisions for them. Retailers and brands still reeling from the growth of online shopping face another onslaught of change. Macro trends such as sustainability, rental, and second hand are challenging the established ways of doing business. Empowered and impatient consumers are more demanding than ever. Shopping is no longer about stores or even web sites; a simple voice command can complete a purchase. *When Humans Stop Shopping* is your comprehensive guide to the dynamic future of consumer commerce and to the technologies revolutionizing retail **Future Shop** Jim Snider, Terra Ziporyn, 2008-03 Some day consumer information sources like those envisaged by Snider and Ziporyn will materialize. The more this book is read, the sooner it will happen. F. M. Scherer, Professor of Business and Government, Harvard University. Snider and Ziporyn powerfully describe the glass highways of the future which will not only benefit consumers but will also provide fantastic opportunities for schools, hospitals, businesses, and the average American as we enter the Information Age of the 21st century. Conrad Burns, Chair of U.S. Senate Communications Subcommittee. *Future Shop* is a look into tomorrow's world of household buying. It is full of surprises, disconcerting ideas, and useful information. I would think that forward-looking businesses would profit from it as much as forward-looking consumers. Robert Heilbroner, Professor of Economics, New School for Social Research. *Future Shop* describes a telecommunications age in which the foundations of our market economy will be radically different. The authors present a bold, innovative manifesto for change. It's amazing that work on a subject that means so much to consumers has not appeared before. Marvin Cetron, author of *American Renaissance*.
