Opera for the People is an in depth examination of a forgotten chapter in American social and cultural history the love affair that middle class Americans had with continental opera translated into English in the 1870s 1880s and 1890s Author Katherine Preston reveals how contrary to the existing historiography on the American musical culture of this period English language opera not only flourished in the United States during this time but found its success significantly bolstered by the support of women impresarios prima donnas managers and philanthropists who provided financial backing to opera companies This rich and compelling study details the lives and professional activities of several important players in American postbellum opera including manager Effie Ober philanthropist Jeannette Thurber and performers artistic directors Caroline Richings Euphrosyne Parepa Rosa Clara Louise Kellogg and the people s prima donna Emma Abbott Drawing from an impressive range of primary sources including contemporaneous music and theater periodicals playbills memoirs librettos scores and reviews and commentary on the performances in digitized newspapers Preston tells the story of how these and other women influenced the activities of some of the more than one hundred opera companies touring the United States during the second half of the 19th century performing opera in English for a diverse range of audiences Countering a pervasive and misguided historical understanding of opera reception in the United States unduly influenced by modern attitudes about the genre as elite exclusive expensive and of interest only to a niche market Opera for the People demonstrates the important and hitherto unsuspected place of opera in the rich cornucopia of late century American musical theatre which would eventually lead to the emergence of American musical comedy

Huw Wheldon and Hector Berlioz Co published with the American Academy of Arts and Sciences *Opera and the Golden West* John Louis DiGaetani, Josef P. Sirefman, 1994 *Opera and the Golden West* is a celebration of opera's difficult past in America. It focuses in part on early repertory and how European operatic masterpieces became part of American culture. This book also calls attention to the efforts of American composers as they continually tried to make original contributions to a foreign musical form. Throughout this anthology the contributors use a variety of approaches and styles to analyze the many aspects of opera and how the form fared in the U.S. In addition to observing where opera has been in this country, this anthology also has an eye to the future. Opera presentation in the coming century may be very different from the current experience. Economics always a critical factor may well dictate a different scale of production. Changing tastes in directorial and production values and the expansion of television and video into the home are indicators that a new era has arrived.

The STREAM TONE: The Future of Personal Computing? T. Gilling, 2017-02-13 Personal computing is changing from an old world of local services provided by local devices to a new world of remote Web based services provided by cloud computing based data centres. This book explores in detail what might be required to make a comprehensive move to this exciting new world and the many benefits that move could bring. Sixty Years, 2010 Believing in Opera Tom Sutcliffe, 2014-07-14 The staging of opera has become immensely controversial over the last twenty years. Tom Sutcliffe here offers an engaging and far reaching book about opera performance and interpretation. This work is a unique tribute to the most distinctive and adventurous achievements in the theatrical interpretation of opera as it has developed in recent decades. Readers will find descriptions of the most original and successful avant garde opera productions in Britain, Europe and America. Sutcliffe beautifully illustrates how updating transposition or relocation and a variety of unexpected imagery in opera have qualified and adjusted our perception of the content and intention of established masterpieces. *Believing in Opera* describes in detail the seminal opera productions of the last fifty years starting with Peter Brook in London after the war and continuing with the work of such directors and producers as Patrice Chereau in Bayreuth, Peter Sellars and David Alden in America, Ruth Berghaus in Frankfurt and such British directors as Richard Jones, Graham Vick, Peter Hall and David Pountney. Through his descriptions of these works, Sutcliffe states that theatrical opera has been enormously influenced by the editing style, imagery and metaphor commonplace in the cinema and pop videos. The evolution of the performing arts depends upon revitalization and defamiliarization, he asserts. The issue is no longer naturalism but the liberation of the audience's imagination powered by the music. Sutcliffe, an opera critic for many years, argues that opera is theater plus music of the highest expressive quality and as a result he has often sided with unconventional and novel theatrical interpretations. He believes that there is more to opera than meets the ear and his aim is to further the process of understanding and interpretation of these important opera productions. No other book has attempted this kind of monumental survey. Originally published in 1997, The Princeton Legacy Library uses the latest print on demand technology to again make available
