

ECOLOGY: The Study of the Place We Live

Ecology examines the relationships between the living and non-living at scales ranging from the individual organism to the biosphere.

Biodiversity

A diverse range of life indicates ecological health and often drives ecological studies.

Species Interactions

Types of interactions include predation, mutualism, parasitism, commensalism, and competition.

Energy Flow

Energy from the sun is transformed and moves through the ecosystem in a process illustrated by the food web.

Succession

Over time, an ecosystem experiences changes in biodiversity and nutrient availability.

Human Impact

Through construction, agriculture, and pollution, humans make a significant impact on the ecosystem. Modern ecologists focus on measuring this impact.

Ecology The Circle Of Life:

The Circle of Life is Broken Brendan Myers, 2022-09-30 The Circle of Life is more than the food web It s a self organizing system of global life cooperation and energy dissipation Its balance and stability have been taken for granted for millennia But in the age of the climate crisis the Circle is breaking down From the 1960s onward philosophers artists and spiritual teachers promoted the idea of the Green Self to help us understand how the Circle works and how we harm ourselves when we damage it But in all that time the climate crisis only got worse The Greening of the Self didn t happen Using the science of ecology and a deep dive into human nature this book explores what the Circle of Life really is and what becomes of us when we face it in different ways The exploration reveals a deeper eco spiritual perspective in which the Immensity of the Earth and the breakdown of the Circle are calls to action to heal the Circle and to create a better world

The Ecological Life Jeremy Bendik-Keymer, 2006-01-19 Written as a series of lectures this open access title offers a humanistic perspective on environmental philosophy that challenges some of the dogmas of deep ecology and radical environmentalism while speaking for their best desires The book argues that being human centered leaves us open to ecological identifications rather than the opposite Bendik Keymer draws on analytic and continental traditions of philosophy as well as literature and visual media He argues for a sense of ecological justice consonant with human rights and shows how humanistic thinking is committed to deepening respect for life and our ecological orientation In a clear jargon free and conversational tone The Ecological Life presents a timely and important contribution to civic engagement in an ecological century The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on

Ecovillages Karen T. Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis who is devising ways of living that will work for the long haul And how can we as individuals make a difference To answer these fundamental questions Professor Karen Litfin embarked upon a journey to many of the world s ecovillages intentional communities at the cutting edge of sustainable living From rural to urban high tech to low tech spiritual to secular she discovered an under the radar global movement making positive and radical changes from the ground up In this inspiring and insightful book Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows ecology economics community and consciousness or E2C2 Whether we live in an ecovillage or a city she contends we must incorporate these four key elements if we wish to harmonize our lives with our home planet Not only is another world possible it is already being born in small pockets the world over These micro societies however are small and time is short Fortunately as Litfin persuasively argues their successes can be applied to existing social structures from the local to the global scale providing sustainable ways of living for generations to come You can learn more about Karen s

The book can also be read as a history of some recent developments in ecology. One of the group Robert May is a past president of the Royal Society and the author of what many see as the most important treatise in theoretical ecology of the later twentieth century. That the group flourished was due not only to May's intellectual leadership but also to the guiding hand of T R E Southwood. Southwood ended his career as Linacre Professor of Zoology at the University of Oxford where he also served a term as Vice Chancellor. Earlier as a professor and director of the Silwood Park campus of Imperial College London he brought the group together. Since it began to coalesce at Silwood it has been named here the Silwood Circle. Southwood promoted the interests of its members with the larger aim of raising the profile of ecological and environmental science in Britain. Given public anxiety over the environment and the loss of ecosystems his actions were well timed. Ecology which had been on the scientific margins in the first half of the twentieth century came to be viewed as a science central to modern existence. The book illustrates its importance to many areas. Members of the Silwood Circle have acted as government advisors in the areas of conservation and biodiversity, resource management, pest control, food policy, genetically modified crops, sustainable agriculture, international development, defence against biological weapons and epidemiology and infectious disease control. In recounting the science they carried out and how they made their careers the book reflects also on the role of the group and the nature of scientific success.

The Circle of Life James David Audlin, 2012-02-22 THE CIRCLE OF LIFE presents traditional oral Native American sacred teachings from the Iroquois, Lakota and other traditions. The author has been receiving these teachings from elders since his youth. The wisdom embraces cosmology, ethics, epistemology, metaphysics, sociology, psychology, healing, dream interpretation and more. Audlin calls himself neither a spiritual teacher nor an authority but a conduit through which these oral traditions can be presented meaningfully to people in a modern world. He outlines universal principles common to many traditional peoples worldwide. The Red Road is available to all regardless of religion or ethnicity willing to follow its paths. These paths however are often not easy and require deep personal and spiritual commitment. Audlin says in his introduction: If this book serves any purpose let it be to help us bring the Sacred Hoop of All the Nations back together again so we and all that lives may stand as one in silent awe before that Great Mystery.

Behavioural and Ecological Consequences of Urban Life in Birds Caroline Isaksson, Amanda D. Rodewald, Diego Gil, 2018-06-19 Urbanization is next to global warming the largest threat to biodiversity. Indeed it is becoming increasingly evident that many bird species get locally extinct as a result of urban development. However many bird species benefit from urbanization especially through the abundance of human provided resources and increase in abundance and densities. These birds are intriguing to study in relation to its resilience and adaption to urban environments.
