Pollinators in the Anthropocene: How Multiple Environmental Stressors Are Shaping Pollinator Health Lars Straub, Fabio Sgolastra, Pierre Lau, Geoffrey Williams, 2023-10-03 There is consensus that loss of biodiversity is a defining feature of the Anthropocene with potentially severe consequences for human food security and well being Of particular concern are global declines in insect pollinators such as bees flies beetles and butterflies as their roles in sustaining ecosystem functions and ensuring food production are indispensable A wide array of abiotic and biotic stressors likely govern the observed insect declines and losses of wild and managed insect pollinators respectively For instance habitat destruction and fragmentation can not only lead to smaller and isolated populations that are vulnerable to environmental stochasticity or inbreeding depression but also lead to poor nutrition as floral abundance and diversity are reduced Further key stressors are pests and pathogens climate change intensified agriculture and environmental pollution e g pesticides These environmental stressors may interact with one another and generate complex effects that amplify the direct consequences of a single given stressor Unfortunately there is a lack of knowledge concerning how even the most important environmental stressors may

interact to affect insect pollinators The goal of this effort is to develop a platform that brings together the latest information on how abiotic and biotic stressors interact to impact insect pollinator health Only by bringing together different lines of evidence will we be able to better predict how these environmental stressors will affect insect pollinators An improved understanding will also facilitate the development of more effective and sustainable management strategies that will enable stakeholders to implement adequate and sustainable measures to safeguard insect pollinators This Research Topic welcomes both Original Research and Reviews as well as Commentary or Opinion articles that address the topic of environmental stressor interactions and their impact on insect pollinator health Submissions should be based on but not limited to How combined environmental stressors affect insect pollinators using molecular physiological behavioral ecological or evolutionary approaches Experimental or survey work conducted under laboratory semi field or field conditions Unravelling the mechanisms underlying combined stressor interactions What can be done to limit the impact of combined environmental exposure in the field

Introduction to Forestry and Natural Resources Donald L. Grebner, Pete Bettinger, Jacek P. Siry, Kevin Boston, 2021-01-19 Introduction to Forestry and Natural Resources Second Edition presents a broad completely updated overview of the profession of forestry The book details several key fields within forestry including forest management economics policy utilization and forestry careers Chapters deal specifically with forest regions of the world landowners forest products wildlife habitats tree anatomy and physiology and forest disturbances and health These topics are ideal for undergraduate introductory courses and include numerous examples and questions for students to ponder There is also a section dedicated to forestry careers Unlike other introductory forestry texts which focus largely on forest ecology rather than practical forestry concepts this book encompasses the economic ecological and social aspects thus providing a uniquely balanced text The wide range of experience of the contributing authors equips them especially well to identify missing content from other texts in the area and address topics currently covered in corresponding college courses Covers the application of forestry and natural resources around the world with a focus on practical applications and graphical examples Describes basic techniques for measuring and evaluating forest resources and natural resources including fundamental terminology and concepts Includes management policies and their influence at the local national and international levels

Environment and Development Antonio Augusto Rossotto Ioris, 2021-01-04 This book provides a comprehensive overview of emerging challenges facing different social groups policy makers and the international community related to economic growth social development and environmental change social inclusion and

regional development The book undertakes a critical assessment of the tensions associated with the failures of mainstream regulatory approaches and impacts of social and economic policies whilst widening the discussion on the interface between the expansion of the socio environmental demands equity and justice These are crucial challenges of great importance today and of equal relevance to the Global North and South The book explores one of the main contradictions of development the simplification of assessments and narrow consideration of alternatives Taking this dilemma as its departure point it goes on to examine the justification trends and limitations of Western based development and possible alternatives to fundamentally modify the basis and the rationale of the development process It considers theoretical and lived experiences of development paying attention to multiple scales local realities and economic frontiers Contributing authors explore policy recommendations and discuss effective practical tools for determining the values different people hold for ecosystem services and territorial resources They cover the monitoring of change in the provision of ecosystem services that might increase the well being of vulnerable groups as well as strategies to promote innovation and integrated equitable and sustainable development **Environmental Protection Research Catalog: Indexes** Smithsonian Science Information Exchange,1972

The Far Right and the Environment Bernhard Forchtner,2019-09-10 At the beginning of the twenty first century both the crisis of liberal democracy as visible in for example the rise of far right actors in Europe and the United States and environmental crises from declining biodiversity to climate change are increasingly in the public spotlight Whilst both areas have been analysed extensively on their own *The Far Right and the Environment* Politics Discourse and Communication provides much needed insights into their intersection by illuminating the environmental communication of far right party and non party actors in Europe and the United States Although commonly perceived as a left wing issue today concerns over the natural environment by the far right have a long ideology driven history Thus it is not surprising that some members of the far right offer distinctive ecological visions of communal life though for example climate change scepticism is voiced too Investigating this range of stances within their discourse about the natural environment provides a window into the wider politics of the far right and points to a close connection between the politics of identity and the imagination of nature Connecting the fields of environmental communication and study of the far right contributions to this edited volume therefore offer timely assessments of this often overlooked dimension of far right politics Treatise on Marine Ecology and Paleoecology National Research Council (U.S.). Committee on a Treatise on Marine Ecology and Paleoecology,1957

Environmental Health Ethics David B. Resnik,2012-06-11 *Environmental Health Ethics* illuminates the conflicts between protecting the environment and promoting human health In this study David B Resnik develops a method for making ethical decisions on environmental health issues He applies this method to various issues including pesticide use antibiotic resistance nutrition policy vegetarianism urban development occupational safety disaster preparedness and global climate change Resnik provides readers with the scientific and technical background necessary to understand these issues He

explains that environmental health controversies cannot simply be reduced to humanity versus environment and explores the ways in which human values and concerns health economic development rights and justice interact with environmental protection
