Economic Equality in the Co-Operative Commonwealth H. Stanley Jevons, 2023-03-31 Originally published in 1933 in the midst of the Great Depression this book discussed the possibility of a new and orderly economic system to realize social justice The author argued that nothing but the complete equality of reward could ensure a stable order Although utopian in its outlook the book addressed many of the concerns of the then existing order The book explains the origin of differences between different people give a brief account of the economic theory of the capitalist system and investigates the economics of the growing demand for social and economic equality It then discusses in more detail the most efficient economic organization to provide and safeguard the welfare of the population on the basis of equality followed by a discussion of the economic principles involved in price fixing and foreign trade

Aldohni, 2012-05-23 During the last ten years the Islamic banking sector has grown rapidly at an international level as well as in individual jurisdictions including the UK Islamic finance differs quite substantially from conventional banking using very different mechanisms and operating according to a different theory as it is based on Islamic law Yet at the same time it is always subject to the law of the particular financial market in which it operates This book takes a much needed and comprehensive look at the legal and regulatory aspects which affect Islamic finance law and examines the current UK and international banking regulatory frameworks which impact on this sector The book examines the historical genesis of Islamic banking looking at how it has developed in Muslim countries before going on to consider the development of Islamic banking in the UK and the legal position of Islamic banks within English law The book explores company contract and some elements of tax law and traces the impact it has had on the development of Islamic banking in the UK before going on to argue that the current legal and regulatory framework which affects the Islamic banking sector has on certain occasions had an unintended adverse impact on Islamic banking in the UK The book also provides an overview of the Malaysian experience in relation to some of the main legal and regulatory challenges in the context of Islamic banking and finance **Governance and Civil**

Cameron, 2018-05-10 The practice of slavery has been common across a variety of cultures around the globe and throughout history Despite the multiplicity of slavery's manifestations many scholars have used a simple binary to categorize slave holding groups as either genuine slave societies or societies with slaves This dichotomy as originally proposed by ancient historian Moses Finley assumes that there were just five genuine slave societies in all of human history ancient Greece and Rome and the colonial Caribbean Brazil and the American South This book interrogates this bedrock of comparative slave studies and tests its worth Assembling contributions from top specialists it demonstrates that the catalogue of five must be expanded and that the model may need to be replaced with a more flexible system that emphasizes the notion of intensification The issue is approached as a question allowing for debate between the seventeen contributors about how best to conceptualize the comparative study of human bondage **Hedley Bull On International Society** NA NA, 2019-06-12 Hedley Bull was one of the most important figures in the academic study of international relations Although his work ranged widely one simple but powerful idea constantly recurs that sovereign states form among themselves a society and that this society must be understood on its own terms The end of the Cold War and developments
