Murdock, F Larry Leistritz, 2019-06-26 Large scale industrial and energy development projects are profoundly affecting the social and economic climate of rural areas across the nation creating a need for extensive planning information both to prepare for the effects of such developments and to meet state and federal environmental impact assessment requirements This book examines alternative methods of modelling the economic demographic public service fiscal and social impacts of major development projects. The authors provide a synthesis of the conceptual bases estimation techniques data requirements and types of output available focusing on models that address multiple impact dimensions and produce information at the county and subcounty levels They also look at the kind of data each model produces in each impact category **Energy Abstracts for Policy Analysis** ,1984 *Agricultural* Economics Research ,1978 Methods for Assessing the Socioeconomic Impacts of Large-scale Resource Coal Development ,1983 **Spring Creek Mine, Mining and Reclamation Developments** Steve H. Murdock, 1983 **Plan** ,1979 Coping With Rapid Growth In Rural Communities Bruce A. Weber, 2019-03-04 This book integrates the most current research findings on the economic demographic fiscal and social consequences of rapid growth in rural communities and offers strategies that can be used to mitigate the often disruptive impact of that growth While working extensively with government officials and citizens in rural communities Drs Weber and Howell became aware of the need for a compilation and synthesis of the research on rural growth they subsequently invited scholars working in selected topic areas to contribute to that effort The resulting papers were refined during a meeting sponsored by the Western Rural Development Center edited and brought together in this volume Incorporating 1980 census data the book outlines the spectrum of changes associated with rapid growth in rural areas presents specific options for managing rapid growth and suggests a model that communities can use for impact assessment and for monitoring the effectiveness of various management strategies
