Ibáñez,Nikolaos Georgantzis,2017-08-22 Psychologists studying cognitive processes and personality have increasingly benefited from the wealth of theory methodology and decision making paradigms used in economics and game theory Similarly for the economists personality traits and basic cognitive processes offer a set of coherent explanatory constructs in economic behavior Given the debate on preference invariance and behavioral consistency across contexts and domains the papers in this topic shed light on the existence and effect of stable sets of idiosyncratic features on economic decision making While the effects of personality and cognition on economic decisions remain under explored the papers contributed in this topic offer more than a stimulus for further research The general message could be

that personality and cognitive processes offer the stable idiosyncratic ground on which individual decisions are made
