Economy Of Early Renaissance Europe:

The Economy of Early Renaissance Europe, 1300-1460 Harry A. Miskimin, 1975-09-05 Harry A Miskimin examines the economic structure of early Renaissance Europe in 1300 1460 **The Economy of Early [& Later] Renaissance Europe** Harry A.. Miskimin, 1975 **The European Reformation** Euan Cameron, 2012-03-01 Since its first appearance in 1991 The European Reformation has offered a clear integrated and coherent analysis and explanation of how Christianity in Western and Central Europe from Iceland to Hungary from the Baltic to the Pyrenees splintered into separate Protestant and Catholic identities and movements Catholic Christianity at the end of the Middle Ages was not at all a uniformly decadent or corrupt institution it showed clear signs of cultural vigour and inventiveness However it was vulnerable to a particular kind of criticism if ever its claims to mediate the grace of God to believers were challenged Martin Luther proposed a radically new insight into how God forgives human sin In this new theological vision rituals did not purify people priests did not need to be set apart from the ordinary community the church needed no longer to be an international body For a critical Reformation moment this idea caught fire in the spiritual political and community life of much of Europe Lay people seized hold of the instruments of spiritual authority and transformed religion into something simpler more local more rooted in their own community So were born the many cultures liturgies musical traditions and prayer lives of the countries of Protestant Europe This new edition embraces and responds to developments in scholarship over the past twenty years Substantially re written and updated with both a thorough revision of the text and fully updated references and bibliography it nevertheless preserves the distinctive features of the original including its clearly thought out integration of theological ideas and political cultures helping to bridge the gap between theological and social history and the use of helpful charts and tables that made the original so easy to use **An Economic History of Medieval Europe** Norman John Greville Pounds, 2014-06-06 A clear and readable account of the development of the European economy and its infrastructure from the second century to 1500 Professor Pounds provides a balanced view of the many controversies within the subject and he has a particular gift for bringing a human dimension to its technicalities He deals with continental Europe as a whole including an unusually rich treatment of Eastern Europe For this welcome new edition the first in twenty years text and bibliography have been reworked and updated throughout and the book redesigned and reset **An Austrian Perspective on the History of Economic Thought** Murray Newton Rothbard, **Canada in the European Age, 1453-1919** R.T. Naylor, 2006-07-10 When Canada in the European Age 1453 1919 was first published it reversed traditional methodology by placing Canada s evolution in the context of the rise and fall of empires around the world not just in the Americas R T Naylor contends that the struggle for property and political rights in early nineteenth century Newfoundland is incomprehensible without an understanding of events as distinct as the Afro American slave trade or the Napoleonic Wars the opening of the natural resource frontier of British Columbia makes sense only if seen as another manifestation of the same historical forces that

fired the opening shots in the Opium wars in China and the fate of Canada's native peoples may have been different in form but not in essence from that of the aboriginal inhabitants on almost every continent

The Making of Urban Europe, 1000-1994 Paul M. HOHENBERG, Lynn Hollen Lees, Paul M Hohenberg, 2009-06-30 Europe became a land of cities during the last millennium The story told in this book begins with North Sea and Mediterranean traders sailing away from Dorestad and Amalfi and with warrior kings building castles to fortify their conquests It tells of the dynamism of textile towns in Flanders and Ireland While London and Hamburg flourished by reaching out to the world and once vibrant Spanish cities slid into somnolence a Russian urban network slowly grew to rival that of the West Later as the tide of industrialization swept over Europe the most intense urban striving and then settled back into the merchant cities and baroque capitals of an earlier era By tracing the large scale processes of social economic and political change within cities as well as the evolving relationships between town and country and between city and city the authors present an original synthesis of European urbanization within a global context They divide their study into three time periods making the early modern era much more than a mere transition from preindustrial to industrial economies Through both general analyses and incisive case studies Hohenberg and Lees show how cities originated and what conditioned their early development and later growth How did urban activity respond to demographic and technological changes Did the social consequences of urban life begin degradation or inspire integration and cultural renewal New analytical tools suggested by a systems view of urban relations yield a vivid dual picture of cities both as elements in a regional and national hierarchy of central places and also as junctions in a transnational network for the exchange of goods information and influence A lucid text is supplemented by numerous maps illustrations figures and tables and by substantial bibliography Both a general and a scholarly audience will find this book engrossing reading

Italy's Many Diasporas Donna R. Gabaccia, 2013-10-18 Italy's residents are a migratory people. Since 1800 well over 27 million left home but over half also returned home again. As cosmopolitans, exiles and workers of the world, they transformed their homeland and many of the countries where they worked or settled abroad. But did they form a diaspora? Migrants maintained firm ties to native villages, cities and families. Few felt much loyalty to a larger nation of Italians. Rather than form a nation unbound, the transnational lives of Italy's migrants kept alive international regional cultures that challenged the hegemony of national states around the world. This ambitious and theoretically innovative overview examines the social, cultural and economic integration of Italian migrants. It explores their complex yet distinctive identity and their relationship with their homeland, taking a comprehensive approach.

The Sovereign State and Its Competitors Hendrik Spruyt, 2020-05-05 The present international system composed for the most part of sovereign territorial states is often viewed as the inevitable outcome of historical development. Hendrik Spruyt argues that there was nothing inevitable about the rise of the state system, however. Examining the competing institutions that arose during the decline of feudalism among them urban leagues, independent communes, city states and sovereign monarchies, Spruyt disposes of the familiar claim that the superior size and war making ability of the sovereign nation state made it the natural successor to the feudal system. The author argues that feudalism did not give way to any single successor institution in simple linear fashion. Instead, individuals created a variety of institutional forms such as the sovereign territorial state in France, the Hanseatic League and the Italian city states in reaction to a dramatic change in the medieval economic environment. Only in a subsequent selective phase of institutional evolution did sovereign territorial authority prove to have significant institutional advantages over its rivals. Sovereign authority proved to be more successful in organizing domestic society and structuring external affairs. Spruyt's interdisciplinary approach not only has important implications for change in the state system in our time but also presents a novel analysis of the general dynamics of institutional change.

The Measure of Civilization Ian Morris, 2014-02-23 A groundbreaking look at Western and Eastern social development from the end of the ice age to today. In the past thirty years, there have been fierce debates over how civilizations develop and why the West became so powerful. The Measure of Civilization presents a brand new way of investigating these questions and provides new tools for assessing the long term growth of societies. Using a groundbreaking numerical index of social development that compares societies in different times and places, award winning author Ian Morris sets forth a sweeping examination of Eastern and Western development across 15 000 years since the end of the last ice age. He offers surprising conclusions about when and why the West came to dominate the world and fresh perspectives for thinking about the twenty first century. Adapting the United Nations approach for measuring human development, Morris's index breaks social development into four traits: energy capture, per capita, organization, information technology and war making capacity, and he uses archaeological, historical and

current government data to quantify patterns Morris reveals that for 90 percent of the time since the last ice age the world's most advanced region has been at the western end of Eurasia but contrary to what many historians once believed there were roughly 1 200 years from about 550 to 1750 CE when an East Asian region was more advanced Only in the late eighteenth century CE when northwest Europeans tapped into the energy trapped in fossil fuels did the West leap ahead Resolving some of the biggest debates in global history The Measure of Civilization puts forth innovative tools for determining past present and future economic and social trends *From Settler to Citizen* Ross Frank, 2007-01-29 Ross Frank has written a model study of New Mexico's Vecinos a historical narrative as absorbing as it is illustrative of complex social processes Joyce Appleby author of *Inheriting the Revolution* The first Generation of Americans This is a richly dense and sophisticated history of eighteenth century New Mexico that focuses on the economic and cultural foundations of identity Deftly reading subtle changes in material culture and the organization of space Frank provides historians of the Americas with a fresh perspective on the impact of the Bourbon Reforms at the margins of empire Ramon Gutierrez author of *When Jesus Came the Corn Mothers Went Away* Marriage Sexuality and Power in New Mexico 1500-1846 **A History of Corporate Finance** Jonathan Barron Baskin, Paul J. Miranti, 1999-12-28 An overview of the role of institutions and organisations in the development of corporate finance **Venice as the Polity of Mercy** Richard MacKenney, 2018-12-21 This study re-examines Venice's political economy from the viewpoint of its ordinary people or *popolani* who despite the commonly held view that they were excluded from political life by the nobility or *nobili* actually organized and ran for themselves hundreds of corporations within the city state Mercy was central to this *popolani*'s Christian values and those who offered mercy to their fellow men and women in temporary hardship were investing in the expectation of reciprocity in their own time of need Beginning by tracing a formative linking of religion economy and polity from the thirteenth to the fifteenth centuries Venice as the Polity of Mercy then chronicles the collapse of this triad during the struggles between church and state in the mid sixteenth and seventeenth centuries followed by a revitalizing reconnection of economy and polity within a different religious climate after the plague of 1630 As such Richard Mackenney's book offers up a revitalized image of Renaissance Venetian society as dynamic rather than static as well as a new understanding of the city's significance through a reconfiguration of its history and artwork *Crises and Transformation in the Mediterranean World* Jordi Catalan Vidal, 2023-08-16 This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day It considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705-1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia's past might shed light on the long term consequences of the Great Recession of 2007-9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies

and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With a comprehensive overview of major events in Catalonian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics *Structures and Assertions* Thomas Allan Brady, Heiko Augustinus Oberman, James D. Social Justice in the Ancient World K D Irani, Morris Silver, 1995-10-18 This edited collection focuses on the problem of social justice or more particularly how the demand for social justice was articulated and implemented in ancient civilizations including from east to west the Chinese Indian Iranian Babylonian Assyrian Israelite Egyptian Greek and Roman These essays are supplemented by discussions of the functioning of social justice in early and medieval Islam and in the postmedieval Anglo Saxon world The volume contains extended discussions of specific legal regulations royal edicts and socioeconomic practices in the various civilizations and examinations of their social political and economic consequences Written by leading scholars in their respective fields this volume will be of great interest to researchers dealing with the ancient world and the evolution of political philosophy and legal and economic rights **Zecca** Alan M. Stahl, 2003-04-01 Winner of the Professional Scholarly Publishing Award in Economics from the Association of American Publishers Within a few months of assuming the position of curator of medieval coins at the American Numismatic Society in 1980 Alan M Stahl was presented with a plastic bag containing a hoard of 5 000 recently discovered coins most of which turned out to be from medieval Venice The course of study of that hoard and a later one containing more than 14 000 coins led him to the Venetian archives where he examined thousands of unpublished manuscripts To provide an even more accurate account of how the Zecca mint operated in Venice in the thirteenth through fifteenth centuries Stahl commissioned scientific analyses of the coins using a variety of modern techniques uncovering information about their content and how they had been manufactured The resulting book *Zecca The Mint of Venice in the Middle Ages* is the first to examine the workings of a premodern mint using extensive research in original documents as well as detailed study of the coins themselves The first of the book's three sections traces the coinage of Venice from its origins in the ninth century as a minor and unofficial regional Italian coinage to its position at the dawn of the Renaissance as the dominant currency of Mediterranean trade The second section entitled *The Mint in the Life of Medieval Venice* illustrates the mechanisms of the control of bullion and the strategies for mint profit and explores the mint's role in Venetian trade and the emergence of a bureaucratized government The third section *Within the Mint* examines the physical operations that transformed raw bullion into coins and identifies the personnel of the mint situating the holders of each position in the context of their social and professional backgrounds Illustrated with photos of Venetian coinage from the world's major collections *Zecca* also includes a listing of all holders of offices related to the

medieval Venetian mint and summaries of all major finds of medieval Venetian coins
