Subjects ,1905 **Einführung in die Ökologische Psychologie** Rudolf Miller,2013-03-09 Die Rolle des Menschen bei der Veränderung seiner Umwelt wird in den letzten Jahren zunehmend intensiver thematisiert. Die Diskussionen über Wechselwirkungen menschlichen Handelns hier in der Regel verstanden als gesellschaftliches Handeln und sich vollziehender Umweltveränderungen werden überwiegend von Politikern und/oder Naturwissenschaftlern geführt. In dieser Einführung sollen solche Theorien und Konzepte vorgestellt werden, die den Menschen in seiner Bestimmung durch die Umwelt und seine Wirkung auf die Umwelt gleichermaßen berücksichtigen. Wir gehen davon aus, daß der Mensch Bestandteil seiner Umwelt ist. Die Diskussion wissenschaftstheoretischer Positionen und methodischer Probleme bei der Erfassung und Beschreibung von Umwelt führt in vielen Fällen sehr schnell zu einer Auflösung dieser Einheit von Mensch und Umwelt. Es kann nicht das Ziel sein, in einem unreflektierten Zurück zur Natur die Lösung aller Probleme zu suchen. Die sachlich kritische Darstellung solcher psychologischen Ansätze, die die Mensch-Umwelt-Interaktion stärker akzentuieren, kann vielmehr dazu beitragen, neben dem Erkennen allgemeiner Gesetzmäßigkeiten menschlichen Handelns unsere Selbst- und Umweltwahrnehmung zu verbessern und unser eigenes Handeln in unserer sozialen und geographisch-physikalischen Umwelt bewußter zu gestalten. Diese Einführung richtet sich an Studierende und Berufstätige, die daran interessiert sind, sich intensiver mit den ökologisch-psychologischen Bedingungen und Konsequenzen ihres Handelns auseinanderzusetzen. Dabei wird über die breit angelegte Diskussion der wechselseitigen Bedingtheit von Individuum und Umwelt eine mögliche Vertiefung durch die selbständige Lektüre zusätzlicher Literatur vorbereitet. Frau Kruse, Herrn Lück sowie allen Kolleginnen und Kollegen danke ich für Hinweise und konstruktive Kritiken bei der Erstellung des Manuskriptes zu diesem Buch.

Multisensuale Markenführung Christiane Springer,2008-06-12 Christiane Springer entwickelt ein verhaltenstheoretisches Modell zur sensuellen Wahrnehmungs- und Wirkungsweise von Elementen eines Brandlands der Automobilwirtschaft und leistet damit einen wesentlichen Beitrag zur Erfassung und Erklärung der multisensualen Markenführung.

Dictionary of Philosophy and Psychology James Mark Baldwin,1905 **Occupational Safety and Accident Prevention** C.G. Hoyos,B.M. Zimolong,2014-06-28 Since the early 1970s there has been a considerable growth in the literature published on the topic of human reliability. However the main emphasis has been on technical aspects of human reliability rather than on an integrated safety approach combining safety engineering, organization and human factors. Up till now information on the subject of occupational safety which covers human reliability as one aspect has been widely scattered in technical reviews or briefly mentioned in textbooks. This book provides a comprehensive overview on occupational safety with special emphasis on the human element. Examples of empirical studies as well as suggestions for practical measures are included to help in the understanding and application of the contents of the text. Although the prime objective of the book is to cover occupational safety from a human factors point of view, nevertheless some of the related areas are also discussed. Among others they include problem solving in complex systems, judgmental and heuristic biases in decision making as well as characteristics of decision support systems in high risk

industry The inclusion of these topics clearly indicates the shift in attention of occupational safety from work activities on the shop floor to tasks of operators and supervisors in automated and semi automated systems The text will prove useful to students of psychology and human factors engineering Additionally it holds great utility for persons with an engineering background such as industrial engineers quality control engineers system and design engineers and safety practitioners
