El Lobo Readings On The Mexican Gray Wolf:

El Lobo Tom Lynch, 2005 A collection of writings that explore how the Mexican gray wolf was almost in the blink of an eye driven to the brink of extinction The Return of the Mexican Gray Wolf Bobbie Holaday, 2016-12-15 The return of the Mexican gray wolf to Arizona's Blue Range in 1998 marked more than a victory for an endangered species Long hated by ranchers the gray wolf had been hunted to the brink of extinction until one woman took on the challenge of restoring it to its natural habitat Inspired by the plight of the Mexican gray wolf retiree Bobbie Holaday formed the citizens advocacy group Preserve Arizona's Wolves P A W S in 1987 and embarked on a crusade to raise public awareness She soon found herself in the center of a firestorm of controversy with environmentalists taking sides against ranchers and neighbors against neighbors This book tells her story for the first time documenting her eleven year effort to bring the gray wolf back to the Blue As Holaday quickly learned ranchers exerted considerable control over the state legislature and politicians in turn controlled decisions made by wildlife agencies Even though the wolf had been listed as endangered since 1976 opposition to it was so strong that the Arizona Game and Fish Department had been unable to launch a recovery program In The Return of the Mexican Gray Wolf Holaday describes first hand the tactics she and other ordinary citizens on the Mexican Wolf Recovery Team adopted to confront these obstacles Enhanced with more than 40 photographs 32 in color her account chronicles both the triumphs of reintroduction and the heartbreaking tragedies the wolves encountered during early phases Thanks to Holaday's perseverance eleven wolves were released into the wild in 1998 and the Blue Range once again echoed with their howls Her tenacity was an inspiration to all those she enlisted in the cause and her story is a virtual primer for conservation activists on mobilizing at the grassroots level The Return of the Mexican Gray Wolf shows that one person can make a difference in a seemingly hopeless cause and will engage all readers concerned with the preservation of wildlife All royalties go to the Mexican Wolf Trust Fund administered by the Arizona Game and Fish Department Animals and the Human Imagination Aaron Gross, Anne Vallely, 2012-04-24 This interdisciplinary and cross cultural collection reflects the growth of animal studies as an independent field and the rise of animality as a critical lens through which to analyze society and culture on par with race and gender **Navajo and the Animal People** Steve Pavlik, William B Tsosie, 2014-07-01 This text examines the traditional Navajo relationship to the natural world Specifically how the tribe once related to the Animal People and particularly a category of animals which they collectively referred to as the naatl eetsoh the ones who hunt These animals like Native Americans were once viewed as impediments to progress requiring extermination **Varmints and Victims** Frank Van Nuys, 2015-11-09 It used to be If you see a coyote shoot it Better yet a bear Best of all perhaps A wolf How we've gotten from there to here where such predators are reintroduced protected and in some cases revered is the story Frank Van Nuys tells in Varmints and Victims a thorough and enlightening look at the evolution of predator management in the American West As controversies over predator control rage on Varmints and Victims puts the debate into

historical context tracing the West's relationship with charismatic predators like grizzlies, wolves and cougars from unquestioned eradication to ambivalent recovery efforts. Van Nuys offers a nuanced and balanced perspective on an often emotional topic exploring the intricacies of how and why attitudes toward predators have changed over the years. Focusing primarily on wolves, coyotes, mountain lions and grizzly bears, he charts the logic and methods of management practiced by ranchers, hunters and federal officials. Broad in scope and rich in detail, this work brings new, much needed clarity to the complex interweaving of economics, politics, science and culture in the formulation of ideas about predator species and in policies directed at these creatures. In the process, we come to see how the story of predator control is in many ways the story of the American West itself, from early attempts to connect the frontier region to mainstream American life and economics to present ideas about the nature and singularity of the region.

The Bioregional Imagination Cheryll Glotfelty, Karla Armbruster, Tom Lynch, 2012-03-01. Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective. Although bioregional ideas occur regularly in ecocritical writing, until now no systematic effort has been made to outline the principles of bioregional literary criticism and to use it as a way to read, write, understand and teach literature. The twenty-four original essays here are written by an outstanding selection of international scholars. The range of bioregions covered is global and includes such diverse places as British Columbia's Meldrum Creek and Italy's Po River Valley, the Arctic and the Outback. There are even forays into cyberspace and outer space. In their comprehensive introduction, the editors map the terrain of the bioregional movement, including its history and potential to inspire and invigorate place-based and environmental literary criticism. Responding to bioregional tenets, this volume is divided into four sections. The essays in the Reinhabiting section narrate experiments in living in place and restoring damaged environments. The Rereading essays practice bioregional literary criticism both by examining texts with strong ties to bioregional paradigms and by opening other, less obvious texts to bioregional analysis. In Reimagining, the essays push bioregionalism to evolve by expanding its corpus of texts, coupling its perspectives with other approaches or challenging its core constructs. Essays in the Renewal section address bioregional pedagogy, beginning with local habitat studies and concluding with musings about the Internet. In response to the environmental crisis, we must reimagine our relationship to the places we inhabit. This volume shows how literature and literary studies are fundamental tools to such a reimagining.

Endangered: Biodiversity on the Brink (Volume 2 of 2) (Large Print 16pt), Wildlife Politics Bruce Rocheleau, 2017-03-30. Attitudes towards charismatic animals such as tigers, lions, bears and wolves vary greatly and change over time, resulting in bitter political debates. This comprehensive book identifies and analyses the factors that influence policies across the globe, highlighting how this impacts conservation as a whole. Issues such as overexploitation, hunting, ecotourism and the struggle to prevent illegal wildlife trafficking are examined, and science's role in policymaking is assessed. The conflicting forces behind legislation, including institutions, interest groups and the media, are analysed with particular focus on the significance of the Endangered Species

Act covering over forty five species that have become matters of political debate in sixty seven different countries Case studies and conceptual frameworks provide a clear understanding of the key topics shedding light on this important yet often overlooked area of environmental politics

Outback and Out West Tom Lynch,2022-11 Outback and Out West examines the ecological consequences of a settler colonial imaginary by comparing expressions of settler colonialism in the literature of the American West and Australian Outback Tom Lynch traces exogenous domination in both regions which resulted in many similar means of settlement including pastoralism homestead acts afforestation efforts and bioregional efforts at belonging Lynch pairs the two nations texts to show how an analysis at the intersection of ecocriticism and settler colonialism requires a new canon that is responsive to the social cultural and ecological difficulties created by settlement in the West and Outback Outback and Out West draws out the regional Anthropocene dimensions of settler colonialism considering such pressing environmental problems as habitat loss groundwater depletion and mass extinctions Lynch studies the implications of our settlement heritage on history art and the environment through the cross national comparison of spaces He asserts that bringing an ecocritical awareness to settler colonial theory is essential for reconciliation with dispossessed Indigenous populations as well as reparations for ecological damages as we work to decolonize engagement with and literature about these places

Animal Teeth and Human Tools Christy G. Turner II,Nicolai D. Ovodov,Olga V. Pavlova,2013-07-11 The culmination of more than a decade of fieldwork and related study this unique book uses analyses of perimortem taphonomy in Ice Age Siberia to propose a new hypothesis for the peopling of the New World The authors present evidence based on examinations of more than 9000 pieces of human and carnivore bone from 30 late Pleistocene archaeological and palaeontological sites including cave and open locations which span more than 2000 miles from the Ob River in the West to the Sea of Japan in the East The observed bone damage signatures suggest that the conventional prehistory of Siberia needs revision and in particular that cave hyenas had a significant influence on the lives of Ice Age Siberians The findings are supported by more than 250 photographs which illustrate the bone damage described and provide a valuable insight into the context and landscape of the fieldwork for those unfamiliar with Siberia

Wolves and the Wolf Myth in American Literature S. K. Robisch,2009 This book presents a new perspective on the role of the wolf in American literature The wolf is one of the most widely distributed canid

species historically ranging throughout most of the Northern Hemisphere For millennia it has also been one of the most pervasive images in human mythology art and psychology Wolves and the Wolf Myth in American Literature examines the wolf s importance as a figure in literature from the perspectives of both the animal s physical reality and the ways in which writers imagine and portray it Author S K Robisch examines more than two hundred texts written in North America about wolves or including them as central figures From this foundation he demonstrates the wolf s role as an archetype in the collective unconscious its importance in our national culture and its ecological value Robisch takes a multidisciplinary approach to his study employing a broad range of sources myths and legends from around the world symbology classic and popular literature films the work of scientists in a number of disciplines human psychology and field work conducted by himself and others By combining the fundamentals of scientific study with close readings of wide ranging literary texts Robisch astutely analyzes the correlation between actual living wolves and their representation on the page and in the human mind He also considers the relationship between literary art and the natural world and argues for a new approach to literary study an ecocriticism that moves beyond anthropocentrism to examine the complicated relationship between humans and nature

Endangered Animals Brian Miller, Richard P. Reading, 2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case studies of animal species that have been pushed to the brink of extinction Each case study provides the following information Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future and Prognosis Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to recovery efforts which will enable them to evaluate conservation practice and to draw their own conclusions for improvement *Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur* ,2007
