Ecological View Of History:

An Ecological View of History Tadao Umesao, 2003 Table of contents Global Ecology in Historical Perspective Kazunobu Ikeya, William Balée, 2023-03-10 This book primarily examines human animal and human plant interactions in Asian forests Southeast Asia and Japan and inland waters China For comparison cases from the Americas whales in the Arctic sea turtles in the Caribbean and plants in the Amazon and Central Asia are also included The relationship between plants animals and humans in Asia is quite unique from a global perspective For example satoyama in Japan means ecotone area or the boundary between a village and a forest There as the number of inhabitants declines bears wild boars and other animals increasingly ravage crops sometimes attacking humans as well By showing the regional nature of human animal and human plant interactions in Asia this book provides for the first time a framework for understanding the world s animal and plant human relationships It is assumed that the relationships between humans and animals and plants during this period were diverse including hunting taming semi domestication and full domestication At the same time for regions outside of Asia the extent to which these diverse relationships were adapted and how diversity was formed is explained from the perspective of historical ecology Customers can expect to derive perspectives on the coexistence of human animal and plant animal relationships from this book in the near future The conservation of rare species diverse habitats and biodiversity is a central theme in considering the relationship between modern civilization and the global environment In post industrial Japan one focus has been the protection of iconic animals such as storks crested ibis dugongs and sea turtles while damage to crops and humans by deer wild boars monkeys bears and other common animals has become an important social issue How can the world s 7.7 billion plus people live in harmony with other species We would like to get some hints on how to solve the problems we are facing Environmental History in the Pacific World J.R. McNeill, 2022-03-01 This volume brings together a set of key articles from the last 30 years pertaining to the environmental history of the Pacific basin It aims to treat the islands and waters of the Pacific as well as the lands around the Rim from New Zealand to Japan to California to Chile and is the first work of environmental history to take this inclusive view of the Pacific basin The focus is mainly on recent centuries but as environmental history requires at times the work also takes the very long view of millennia Several of the articles seek to bring a broad Pacific perspective to bear on their subjects while others use Pacific basin examples to try to establish broader theoretical points of interest to all who are drawn to the study of the interactions between nature and culture The book includes a bibliography of Pacific basin environmental history and an introduction that aims to sketch the contours and possible future directions of the field *Environmental History and the American South* Paul Sutter, Christopher J. Manganiello, 2009 This reader gathers fifteen of the most important essays written in the field of southern environmental history over the past decade Ideal for course use the volume provides a convenient entrance into the recent literature on the region as it indicates the variety of directions in which the field is growing As coeditor Paul S Sutter writes in his

introduction recent trends in environmental historiography a renewed emphasis on agricultural landscapes and their hybridity attention to the social and racial histories of environmental thought and practice and connections between health and the environment among them have made the South newly attractive terrain This volume suggests then that southern environmental history has not only arrived but also that it may prove an important space for the growth of the larger environmental history enterprise The writings which range in setting from the Texas plains to the Carolina Lowcountry address a multiplicity of topics such as husbandry practices in the Chesapeake colonies and the aftermath of Hurricane Andrew The contributors varied disciplinary perspectives including agricultural history geography the history of science the history of technology military history colonial American history urban and regional planning history and ethnohistory also point to the field's vitality Conveying the breadth diversity and liveliness of this maturing area of study Environmental History and the American South affirms the critical importance of human environmental interactions to the history and culture of the region Contributors Virginia DeJohn Anderson William Boyd Lisa Brady Joshua Blu Buhs Judith Carney James Taylor Carson Craig E Colten S Max Edelson Jack Temple Kirby Ralph H Lutts Eileen Maura McGurty Ted Steinberg Mart Stewart Claire Strom Paul Sutter Harry Watson Albert G Way *A Companion to Global Environmental History* J. R. McNeill, Erin Stewart Mauldin, 2015-05-04 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil Germany and China Ecological Perspective on Human Affairs Harold Hance Sprout, Margaret T. Sprout, 2015-12-08 of interest and value to all serious students of international politics and indeed of human affairs generally The American Political Science Review Originally published in 1965 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Turning Points of Environmental History** Frank Uekötter, 2010-11-21 From the time when humans first learned to harness fire cultivate crops and domesticate livestock they have altered their environment as a means of survival In the modern era however natural resources have been devoured and defiled in the wake of a consumerism that goes beyond mere subsistence In this volume an international group of environmental historians documents the significant ways in which humans have impacted their

surroundings throughout history John McNeill introduces the collection with an overarching account of the history of human environmental impact Other contributors explore the use and abuse of the earth's land in the development of agriculture commercial forestry and in the battle against desertification in arid and semi arid regions Cities which first appeared some 5 500 years ago have posed their own unique environmental challenges including dilemmas of solid waste disposal sewerage disease pollution and sustainable food and water supplies The rise of nation states brought environmental legislation which often meant selling off natural resources through eminent domain Perhaps the most damaging environmental event in history resulted from a perfect storm of effects cheap fossil fuels especially petroleum and the rapid rise of personal incomes during the 1950s brought an exponential increase in energy consumption and unforeseen levels of greenhouse gases to the earth's atmosphere By the 1970s the deterioration of air land and water due to industrialization population growth and consumerism led to the birth of the environmental and ecological movements Overall the volume points to the ability and responsibility of humans to reverse the course of detrimental trends and to achieve environmental sustainability for existing and future populations
