The Management of Insects in Recreation and Tourism Raynald Harvey Lemelin, 2013. An insight into the booming industry of insect leisure and tourism using case studies and examples from around the world. Lake Tourism C. Michael Hall, Tuija Härkönen, 2006-05-03. Lakes are an essential element of some of the world's most popular tourism destinations. However, increased pressure from visitors and the tourism industry as well as from other, sometimes competing, land and water uses has made the sustainable development of lakes increasingly problematic. This book represents the first attempt to bring together some of the key elements of lake tourism within a single volume in order to present the urgent need for an integrated approach to lacustrine tourism systems management. The book presents comprehensive overviews of lake tourism including branding and marketing, visitor management and planning, historical and cultural dimensions, and environmental quality. The volume is international in scope with cases from Europe, North America, and Oceania. The book concludes by noting that tourism needs to be established as a complimentary land and water use at a time when lakes and their watersheds are facing challenges in the form of climate and environmental change, increasing numbers of visitors, as well as an overall increase in competing demands for water.

Tourism Recreation Research, 2006. *Forest Tourism and Recreation* Xavier Font, John Tribe, 2000-01-01. Annotation: The demand for ecotourism and outdoor recreation is increasing and the pressures on land use are becoming more obvious. A large part of the experience of ecotourism and recreational landscape depends on the maintenance of forested land. Effective management of tourism and recreation in forests can provide extra income to help offset the costs of sustainable timber production and encourage biodiversity conservation. This multi-author book considers the compatibility between tourism, forestry, and conservation, the management of natural resources, and the involvement of stakeholders and the community. Issues are presented through case studies from a range of countries and topics covered include National Parks, peri-urban forestry, and wilderness management, as well as practitioner-oriented contributions.
