Dellink, Arjan Ruijs, 2008-03-25

Reduction of poverty is a tremendous and persistent challenge for the global community Given that the livelihood of millions is at stake there is an urgent need to reconsider the causes of and the remedies for poverty Poverty and its reduction are closely linked to the natural resources base The quality and bounty of the local environment certainly affect living conditions of the poor and their poverty is often seen as a contributing factor to the degraded condition of the local environment Teasing apart the direction of causality in this resource poverty nexus is a serious empirical challenge This book contributes to an improved understanding of the economic dimensions of environmental and natural resource management and poverty alleviation The ten chapters of the book offer an overview of the current knowledge concerning the relation between poverty environment and natural resource use Three sides of the debate receive particular attention First the relation between resource use and poverty is discussed from a theoretical point of view Second it is questioned whether payments for environmental services or considering values of resources can be an effective tool for stimulating both sustainable resource use and poverty alleviation Third alternative strategies to break the land degradation poverty cycle are discussed

Environmental and Natural Resource Economics Kentaka Aruga, 2022-02-07 This textbook discusses environmental and natural resource economics It presents foundational knowledge for applying economics to understand environmental economics as well as for managing environmental problems and optimizing the level of natural resource extraction Environmental and Natural Resource Economics bridges knowledge between the major natural environmental issues and which economic policies could be applied for reducing human impacts on such issues It is distinctive from other environmental economics textbooks by covering not only basic concepts introduced in environmental economics but also explains economic models developed in resource economics for optimizing the use of non renewable and renewable

resources for sustainability This textbook will help students understand how to apply economics for utilizing policies to mitigate environmental issues caused from the output side of economic activities such as emitting pollutants or generating wastes and those derived from the input side such as natural resource extractions
