**Changing Families** Irving E. Sigel, 2012-12-06 In a previous volume *Families as Learning Environments for Children* we presented a series of chapters that dealt with research programs on the role of families as learning environments for children Those studies were based on empirical data and sought answers to basic research questions with no explicit concern for the application of the results to practical problems Rather their purpose was to contribute primarily to conceptualization research methodology and psychological theory Now in this volume we turn our attention to intervention efforts to modify the way a family develops As in our previous conference the participants of the working conference on which the present volume is based are research scientists and scholars interested in application This group is distinct from practitioners however whose primary focus is service participants in this conference have as their primary interest research into the problems of processes of application Applied professional issues concerning the lives of families come from many varied sources from some that are distant and impersonal e g the law to direct face to face efforts educators therapists The variety of sources and types of applications are eloquent testimony to the degree to which families are subject to a host of societal forces whose implicit or explicit aim is to modify family functioning For example some educators may wish to alter family child rearing patterns to enhance child development the clinician seeks to help families come to terms and to cope with a schizophrenic child The list can be extended

**Evaluating Family Programs** Francine H. Jacobs, 2017-10-24 The diverse composition of American families and changing ways of raising our children have become subjects of intense scrutiny by researchers and policymakers in recent years Shifting demographics and work patterns growing numbers of women in the work force teenage pregnancy single parent families and the deinstitutionalization of the elderly disabled and mentally ill all these trends have significantly affected family life *Evaluating Family Programs* effectively bridges the gap between researchers and practitioners in order to bring practical understandable advice to providers of family programs and to program funders and policymakers Heather B Weiss and Francine H Jacobs have collected in this volume works which move outside the traditional approaches of their disciplines to create new models for delivering and evaluating services This sets a mood of genuine inquiry and excitement about successful aspects of programs while maintaining openness about the limitations of both research and practice By expanding the research model this work is an attempt to understand reciprocal influences of extended family culture community and social institutions It urges those who advocate program accountability to understand that not all types of evaluations are appropriate for all programs and it notes that limitations in current evaluation technologies make it difficult to evaluate outcomes *Evaluating Family Programs* reminds the reader that in order to develop sound family policy we must look at children and families in context Because policymakers program

administrators and informed citizens have come to rely more upon the results of evaluation research we must improve our methods while not losing sight of its limitations It is a thought provoking contribution to the efforts of those who seek to support the American family with compassion understanding and realism     The Child as Thinker Sara Meadows,2012-09-10 This second edition of The Child as Thinker has been thoroughly revised and updated to provide an informed and accessible overview of the varied and extensive literature on children s cognition Both theory and research data are critically examined and educational implications are discussed After a brief discussion of the nature and subject of cognition Sara Meadows reviews children s thinking in detail She discusses the ways children remember and organise information in general the acquisition of skills such as reading writing and arithmetic and the development of more complex reasoning as children grow to maturity As well as studies that typically describe a generalised child the book also reviews some of the main areas relevant to individual differences in normal cognitive development and critically examines three major models of cognitive development In outlining the work of Piaget information processing accounts and neo Vygotskian theories she also evaluates their different explanations of cognitive development and their implications for education Finally the book examines biological and social factors that may be involved in normal and suboptimal cognitive development Sara Meadows provides an important review of the crucial issues involved in understanding cognitive development and of the new data and models that have emerged in the last few years This book brings together areas and approaches that have hitherto been independent and examines their strengths and weaknesses The Child as Thinker is essential reading for all students of cognitive development     **Offender Rehabilitation and Treatment** James McGuire,2003-04-11 Criminal behaviour continues to be a matter of major public concern How society should respond to it and what should be done with those who repeatedly offend remain hotly disputed topics of conversation Offender Rehabilitation and Treatment draws together internationally renowned experts from the United Kingdom Europe North America and Australia Chapters summarise some of the most recent and exciting developments in this field and offer a systematic knowledge based approach to the effective reduction of criminal behaviour Offers coverage of a wide range of key topics in this area Links theory research and practice in a coherent and accessible style International focus with examples and authors from a number of countries     The Evaluation of Cultural Action Howard Richards,1984-11-10     **Ellis' Handbook of Mental Deficiency, Psychological Theory and Research** William E. MacLean Jr.,2012-12-06 In the 16 years since the publication of the second edition of this volume psychological theory and research in mental retardation has continued to expand and extend scientific theoretical and clinical understanding of this most complex and challenging human condition Explicit effort has been made to translate theory and research into useful and efficacious assessment intervention prevention and policy actions This third edition provides an opportunity to critique major conceptual developments and empirical research in an effort to stimulate further behavioral research of practical social importance The Handbook presents work by prominent contributors to a major scientific

endeavor that has grown dramatically during the last three decades The challenge for each author was to identify important theoretical and empirical issues provide a critical selective review of exemplary research and discuss the questions that remain unanswered in each area In short the goal for this third edition was to consolidate the knowledge gained during the past 30 years and to present a blueprint for future research in mental retardation the broader field of learning disabilities and other developmental disorders such as autism Providing totally different coverage and direction from the previous edition this text fills a crucial instructional need in graduate courses related to the psychology of mental retardation With its emphasis on psychological research and theory it offers an important alternative to many available texts that primarily emphasize the application of research
