[Behavioral and neuroscientific analysis of economic decision making in animals](#) Tobias Kalenscher, Marijn Van Wingerden, The experimental analysis of animal behavior has a rich tradition in psychology behavioral ecology and many other scientific branches dedicated to the study of decision making However it has never enjoyed a similar popularity in economics This has recently changed with the dawn of neuroeconomics a discipline combining the analytic and experimental tools of psychology and economics with the technologies available in neuroscience to unravel the neurobiological mechanisms underlying economic behavior Since many of the sophisticated neuroscientific techniques can only be used on animals neuroeconomists have come up with a large and ever growing repertoire of animal models to probe economic decision making Besides the value of using animals as model systems to emulate human economic behavior the discipline of animal economic decision making exists in its very own right an abundance of animal species at various evolutionary stages show behavior that complies with many of the predictions of economic theory whilst at the same time demonstrating violations of optimal choice models that are reminiscent of similar anomalies found in human behavior Hence the analysis of animal choice does not only offer insights into the evolutionary origins of economic decision making it also testifies that the analysis of animal behavior is a convenient economical and sound way to test competing economic decision models in optimally controlled experimental environments to probe their neural implementation and to yield common

denominators in choice behavior In short economic theory provides more than just an alternative language to describe animal psychology its combination with biology psychology and neuroscience gives way to synergy effects that open up new venues for studying economic choice In this special issue we would like to gather the latest results from this cross disciplinary topic address the overlap and discrepancies in the neurobiology of economic decision making found between species and identify the challenges that lie ahead in translating results from species to species and ultimately to humans The exclusive focus on non human animals makes this Research Topic unique and distinct from previous special issues which covered a broader range of matters and subjects in the neurobiological analysis of decision making **Birth of Modern Facts** James W.

Cortada,2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e g mathematics science political science and more organized Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The Birth of Modern Facts builds on Cortada s prior books examining how information became a central feature of modern society most notably as a sequel to All the Facts A History of Information in the United States since 1870 OUP 2016 and Building Blocks of Society History Information Ecosystems and Infrastructures R L 2021 Treating Substance Abuse Scott T. Bernt P. Stigum,2015-12-29 As most econometricians will readily agree the data used in applied econometrics seldom provide accurate measurements for the pertinent theory s variables Here Bernt Stigum offers the first systematic and theoretically sound way of accounting for such inaccuracies He and a distinguished group of contributors bridge econometrics and the philosophy of economics two topics that seem worlds apart They ask How is a science of economics possible The answer is elusive Economic theory seems to be about abstract ideas or it might be said about toys in a toy community How can a researcher with such tools learn anything about the social reality in which he or she lives This book shows that an econometrician with the proper understanding of economic theory and the right kind of questions can gain knowledge about characteristic features of the social world It addresses varied topics in both classical and Bayesian econometrics offering ample evidence that its answer to the fundamental question is sound The first book to comprehensively explore economic theory and econometrics simultaneously *Econometrics and the Philosophy of Economics* represents an authoritative account of contemporary economic methodology About a third of the chapters are authored or coauthored by Heather Anderson Erik Birn Christophe Bontemps Jeffrey A Dubin Harald E Goldstein Clive W J Granger David F Hendry Herman Ruge Jervell Dale W Jorgenson Hans Martin Krolzig Nils Lid Hjort Daniel L McFadden Grayham E Mizon Tore Schweder Geir Storvik and Herman K van Dijk **Economics of Crime and Enforcement** Anthony M. Michael Taillard,2018-03-06 Market Insanity A Brief Guide to Diagnosing the Madness in the Stock Market is an engaging and accessible primer which applies modern behavioral finance to equity markets It helps readers understand how logical investment decisions can be betrayed by what Taillard calls the insanity all those behavioral quirks which cause us to achieve less than optimal utility The book describes how limited information habit the rules of the game asymmetric information and ego blend together in potentially toxic ways in market environments thus creating bubbles stock runs and more prosaically even normal equity prices In addition the book discusses the implications of these behaviors in depth In so doing it helps the reader to not only predict the madness within equity markets but also helps them develop solutions that address and mitigate outcomes Provides detailed and accurate descriptions of the most relevant behavioral anomalies for finance Entertainingly written by a veteran consultant with 15 years experience helping companies explain anomalous finance behavior in non economic language Shows how educated finance professionals can use behavioral insights to help build finance solutions Addresses the implications for equity markets in deviations from rationality paradigms Draws on a vast range of literature in explaining anomalous behavior including economic psychology economic psychology evolutionary psychology anthropology and animal behavior **Handbook of Operant Behavioral Economics** Derek D. Reed,Brent A. Kaplan,Shawn P.

Gilroy,2025-07-01 Handbook of Operant Behavioral Economics Demand Discounting Methods and Applications delves into the rapidly evolving field of behavioral economics focusing specifically on the operant approach that marries operant learning principles with microeconomic theory This comprehensive guide begins with a brief history of behavioral economics setting the stage for a more thorough review of operant demand and reward discounting It presents both human and nonhuman research methods offering critical insights into how these methodologies can be employed to study consumption behaviors and decision making processes This book also features quantitative models that elucidate operant demand and discounting along with practical applications that extend the relevance of these concepts to real world scenarios Additionally

it highlights the policy implications of applied behavioral economics bridging the gap between theory and practice With a strong emphasis on consumer behavior analysis as a foundational element this handbook equips readers with the knowledge to translate academic research into actionable policy Designed for graduate students clinicians and academics alike this resource is ideal for those looking to deepen their understanding of behavioral economics and its applications Integrates operant learning principles with economic theories to create a robust framework for understanding consumer behavior Identifies key policy implications derived from operant behavioral economics to inform evidence based decision making in various sectors Develops strategies for utilizing behavioral economics in educational settings enhancing teaching methodologies and student engagement Assesses the role of reward discounting in shaping consumer choices and its impact on long term decision making processes Facilitates interdisciplinary collaboration by highlighting connections between behavioral economics and fields such as psychology economics and public health Limits of Economic and Social

Knowledge S. DeCanio,2013-11-21 The book aims to show that the deterministic vision embodied in conventional economic modelling is neither consistent with nor supported by the state of the art in mathematics logic and physical science DeCanio recognizes that economic agents are intrinsically free and somewhat unpredictable which is essential for economic and social theory **Neuroeconomics** Laurie R. Santos,Michael L. Platt,2013-08-13 In this chapter we discuss why behavioral studies of irrational biases in non human primates are important for the field of neuroeconomics We begin with a review of how behavioral work on choice biases in monkeys is important for understanding the nature of human choice errors We then provide an introduction to the primate cognition approach including a short overview of the organization of the primate order We then briefly review the ecology and cognition of two primate species standardly used as models of human irrational decision making brown capuchins and rhesus macaques We next discuss empirical studies demonstrating that monkeys show human like irrational errors in three of the classic situations in which human participants fall prey to biases monkeys exhibit framing effects in risky decisions they show endowment effects and they are averse to ambiguous outcomes We conclude our chapter with a discussion of how future work in neuroeconomics can capitalize on these new behavioral findings in monkeys
