Climate and Economic Development in the Tropics Douglas Harry Kedgwin Lee,1957 **Economic Growth and Development in the Tropics** Sook Rei Tan,Haejin Jang,Jacob Wood,2024-02-06 The living standards and scale of development around the world are vastly unequal One notable observation is that much of the poverty stricken area is located between the tropics of Cancer and Capricorn By contrast affluent nations are situated in more temperate zones Such a phenomenon gives weight to the geography hypothesis that seeks to explain the occurrence of global economic inequality by placing an emphasis on the importance of natural elements such as location and climate in determining the economic conditions of a nation This book concentrates exclusively and in depth on the key economic phenomena and factors which shape tropical economies today It examines contemporary economic problems confronting the tropical countries and provides policy recommendations that align with the United Nations Sustainable Development Goals set in the 2030 Agenda It contains research works and case studies of tropical economies that are related to the area of development and environment economics The book s themes range from economic growth poverty reduction income inequality economic globalization international trade capital flow financial development and institutional development to environmental sustainability within the Tropics Recognizing the dynamism and diversity of the tropics the book encompasses empirical and policy analyses that address the key economic issues and challenges in the region so as to provide an important platform from which new policymaking initiatives can flourish This book will draw readership primarily from the fields of economics and public policy particularly under the subject areas of development and environment economics as well as discussions in the sustainability policy space **Tropical Exports and Economic Development** Barbara Ingham,1981-06-18 **The tropics and economic development** Andrew Martin Kamarck,1976 **Tropical Development, 1880-1913** William Arthur Lewis,2005-11-03 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company *Tropical Development* William Arthur,2013-11-05 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **Economic Development in the Tropics** B. W. Hodder,1971 The Nature of Development Roger D. Stone,1992 A few years ago Roger Stone undertook a formidable challenge to travel to representative villages in the tropical corners of the developing world to see how and whether economic development plans had improved the quality of the people s lives while also preserving each region s rich plant and animal life In *The Nature of Development* Stone reports on his findings and offers a lively prescription for sustainable economic growth that is environmentally sane and economically sound By commercial and missionary airplane bus off road vehicle and dugout canoe and of course by means of wearying foot journeys Roger Stone reached his far flung destinations all over Latin America Asia and Africa Once there he lived walked

and talked at length with many diverse peoples the Awa of Ecuador and Colombia the Oku who live near Kilum Mountain in Cameroon the Hatam of the Arfak Mountains in Indonesia s Irian Jaya province the resourceful if underequipped wardens of Zambia s national park service the fishermen and farmers of a St Lucia that Caribbean tourists seldom discover While in the Amazon basin he found sad tales of people without a future and of relentless environmental losses More often though he returned with stories of hope and encouragement For as The Nature of Development shows conservation and economic development agencies can work together and the governments of poor and rich countries alike can cooperate to improve human lives and stop disastrous ecological losses in the world s richest habitats As new imperatives replace the global preoccupation with warfare and reckless modes of development Stone s book carries a resonant and important message about how we have mistreated our habitats in the past and how we can achieve a new environmental world order

Economic Development E. Wayne Nafziger, 2006 In this fourth edition of his textbook E Wayne Nafziger analyzes the economic development of Asia Africa Latin America and East Central Europe This comprehensive and clearly written text explains the growth in real income per person and income disparities within and between developing countries The author explains the reasons for the fast growth of Pacific Rim countries Brazil Poland and recently India and the increasing economic misery and degradation of large parts of sub Saharan Africa The book also examines China and other post socialist economies as low and middle income countries without however overshadowing the primary emphasis on the third world The text is replete with real world examples The exposition emphasizes the themes of poverty inequality unemployment the environment and deficiencies of people in less developed countries The guide to the readings through bibliography and websites with links to development resources makes the book useful for students writing research papers The Geography of Tropical African Development A. M. O'Connor, 2014-06-28 This best selling textbook focuses on the changes in geographical patterns that have taken place in recent years i e on the geographical pattern of recent and current economic change The area covered includes the countries lying between the limits of the Tropic of Cancer and the Tropic of Capricorn In this second edition substantial changes have been made in every chapter in order to keep up to date in respect of both the geographical pattern of development and prevailing attitudes towards it The discussion is still largely confined to the twenty year period between 1956 and 1976 and to the economic component of development **The Tropics and Economic Development** Andrew Martin Kamarck, 1979 **The Development of Tropical Lands** Michael Nelson, 2013-11-26 First Published in 2011 Latin America today is similar to Canada in the early 1900s a sleeping giant basically underpopulated whose potential rests on the exploitation of enormous land forest mineral and water reserves This study carried out over the period 1967-69 has involved travel throughout much of Latin America north of the Tropic of Capricorn and discussions with people in many different fields including highway construction forestry colonization and agricultural industries in the forest frontier regions and capital cities of the continent The collection of data required about twelve months of the author in the
