Green Finance Strategies for Post-COVID-19 Economic Recovery in Southeast Asia Asian Development Bank, 2020-10-01 The coronavirus disease COVID 19 pandemic has seen governments across developing Asia move significant amounts of

capital into relief efforts that have saved countless lives and livelihoods But emerging economic recovery packages must not upset the sensitive balance between economic growth and the region s natural capital Many global thinkers are advocating the critical role of green infrastructure in supporting economic growth and livelihoods while safeguarding the Paris Agreement targets This publication examines green and innovative finance mechanisms that can be incorporated into government recovery strategies to incentivize green infrastructure investment These mechanisms can play a key role in catalyzing much needed funds from private capital for a green and sustainable regional recovery OECD Regional Development Studies Regions Matter Economic Recovery, Innovation and Sustainable Growth OECD,2009-11-24 Recently OECD countries have promoted a new approach to regional policy This report reviews the main dimensions of this policy shift drawing on recent work by OECD including analysis of regional data policy reviews and case studies **Productive public investment in agriculture for economic recovery with rural well-being: an analysis of prospective scenarios for Uganda** Sánchez, M.V., Cicowiez, M., Pereira Fontes, F.,2022-02-21 This study highlights how through a series of scenarios public investments promoting agricultural productivity in Uganda could drive growth in agrifood production with favourable impacts on the economy on well being and on poverty especially in rural areas Using a modelling tool to represent the Ugandan economy with its multiple sectors and current fiscal constraints the study ranked the subsectors of Uganda s agriculture that through the productivity impact of public investments representing 0.25 percent of GDP on average about 373 billion 2017 Uganda shillings during the years 2023-2025 will generate the greatest socio economic benefits maximizing the cost effectiveness of the public investments Generally economic growth and the welfare of households as measured by their consumption will be positively impacted but the impacts will ultimately depend on the sector that receives the investment which is shown in a ranking The agricultural sectors targeted for government investment will increase their output and food prices will thus fall and this will stimulate growth in non agricultural sectors both by increasing final demand for non agricultural products and by lowering input prices and fostering upstream processing Lower food prices will have a significant impact since food represents a relatively large proportion of the consumption basket of poorest households Furthermore labour income for rural households will increase with productivity growth and this will reduce rural poverty The findings of this study provide important information about the priorities of Uganda s National Development Plan NDP III and vision for agriculture as well as new priorities to be considered for enabling economic recovery with increased well being post COVID 19 **Credit Growth and Economic Recovery in Europe After the Global Financial Crisis** Sergei Antoshin,Mr.Marco Arena,Nikolay Gueorguiev,Mr.Tonny Lybek,Mr.John Ralyea,Mr.Etienne B Yehoue,2017-11-17 This paper reviews the empirical relationships between credit growth economic recovery and bank profitability in Europe after the global financial crisis GFC We find that the post GFC recoveries in Europe have been weaker than previous recoveries with the double dip recessions in 2011-12 in many countries and the worldwide reach of the GFC explaining the

underperformance Bank lending has been subdued as well but this appears to have only held back the recovery relatively moderately A 10 percent increase in bank credit to the private sector is associated with a rise of 0.61 percent in real GDP and 2.212 percent in real private investment These relationships have not changed significantly during and after the GFC Loan quality customer deposits bank equity price index and bank capital appear to be closely linked to bank lending As expected bank profitability is positively and significantly influenced by credit growth but this relationship has weakened after the GFC
