Economic Methodology A Bibliography With References To Works In The Philosophy Of Science 1860 1988:

The Rise of Political Economy as a Science Deborah A Redman, 2003-01-01 Reviews the epistemological ideas that inspired the classical economists the methodological principles of Bacon Descartes Hobbes Newton Locke Hume Stewart Herschel and Whewell The classical age of economics was marked by an intense interest in scientific methodology It was moreover an age when science and philosophy were not yet distinct disciplines and the educated were polymaths The classical economists were acutely aware that suitable methods had to be developed before a body of knowledge could be deemed philosophical or scientific They did not formulate their methodological views in a vacuum but drew on a rich collection of philosophical ideas Consequently issues of methodology were at the heart of political economy's rise as a science The classical era of economics opened under Adam Smith with political economy understood as an integral part of a broader system of social philosophy by the end it had emerged via J S Mill as a separate science albeit one still inextricably tied to the other social sciences and to ethics The Rise of Political Economy as a Science opens with a review of the epistemological ideas that inspired the classical economists the methodological principles of Bacon Descartes Hobbes Newton Locke Hume Stewart Herschel and Whewell These principles were influential not just in the development of political economy but in the rise of social science in general The author then examines science in eighteenth and nineteenth century Britain with a particular emphasis on the all important concept of induction Having laid the necessary groundwork she proceeds to a history and analysis of the methodologies of four economist philosophers Adam Smith Robert Malthus David Ricardo and J S Mill selected for their historical importance as founders of economics and for their common Scottish intellectual lineage Concluding remarks put classical methodology into a broader historical perspective

Philosophico-Methodological Analysis of Prediction and its Role in Economics Wenceslao J. Gonzalez, 2015-02-19

This book develops a philosophico methodological analysis of prediction and its role in economics Prediction plays a key role in economics in various ways It can be seen as a basic science as an applied science and in the application of this science First it is used by economic theory in order to test the available knowledge In this regard prediction has been presented as the scientific test for economics as a science Second prediction provides a content regarding the possible future that can be used for prescription in applied economics Thus it can be used as a guide for economic policy i e as knowledge concerning the future to be employed for the resolution of specific problems Third prediction also has a role in the application of this science in the public arena This is through the decision making of the agents individuals or organizations in quite different settings both in the realm of microeconomics and macroeconomics Within this context the research is organized in five parts which discuss relevant aspects of the role of prediction in economics I The problem of prediction as a test for a science II The general orientation in methodology of science and the problem of prediction as a scientific test III The methodological framework of social sciences and economics Incidence for prediction as a test IV Epistemology and methodology of economic prediction Rationality and empirical approaches and V Methodological aspects of economic prediction From description to prescription Thus the book is of interest for philosophers and economists as well as policy makers seeking to ascertain the roots of their performance The style used lends itself to a wide audience

Regulation and Economic Analysis R.L.

Gordon, 2013-03-09 Regulation and Economic Analysis A Critique Over Two Centuries argues that long experience with the practice of regulation creates a broad anti intervention consensus among economists This consensus is based on comparison of real intervention to real markets rather than an ideological preconception It is shown that economic theory can support all possible positions on intervention Much theory is too abstract to support any policy position many arguments about how intervention might help contain qualifications expressing doubts about whether the potential can be realized many theories illustrate the drawbacks of intervention The vast literature on these issues concentrates either on specific cases or polemics that exaggerate both sides of the argument Regulation and Economic Analysis seeks to show the depth of the discontent develop interpretations of economic theory that follow from skepticism about statism and provide selected illustrations The discussion begins with examination of general equilibrium theory and proceeds to discuss market failure with stress on monopoly and particularly what is deemed excessive concern with predatory behavior International trade issues transaction costs property rights economic theories of government the role of special institutions such as contracts the defects of macroeconomic and equity arguments for regulating individual markets environmental economics and the defects of public land management policies are examined

Reconstructing Political Economy William K. Tabb, 2002-01-22 This volume offers an original perspective on the questions the great economists have asked and looks at their significance for today's

world Written in a provocative and accessible style it examines how the diverse traditions of political economy have conceptualised economic issues events and theory Going beyond the orthodoxies of mainstream economics it shows the relevance of political economy to the debates on the economic meaning of our times Reconstructing Political Economy is a timely and thought provoking contribution to a political economy for our time In this light it offers fresh insights into such issues as modern theories of growth the historic relations between state and market and the significance of globalisation for modern societies

Theories of Knowing and Knowledge Production Kofi Kissi Dompere, 2024-09-26 The book is devoted to exploring the organizational dimensions of the general space of problem solution dualities within epistemic fields to examine the diversity and unity of knowing and information knowledge production in science and non science and how to account for and explain the forces of variety transformations as induced by decision choice actions in creating the functor space and the space of categorial converters as well as to integrate decision choice qualities of curiosity creativity hope despair success failure and their relationships with epistemic anomalies in the production of intellectual investment flows and capital stocks and the rise and fall of institutions in response to the dynamics of the open space of problem solution dualities with open algorithms under the principle of non satiation The conditions and sources of uncertainties in human actions are traced though the space of ontic epistemic dualities as generated by cognitive capacity limitations leading to the concepts of imagination possibility and probability with corresponding worlds and then link to the discussions on thinking reasoning processes with goals objectives and visions of education in social set ups The concepts and phenomena of anticipation necessity expectation freedom anomaly curiosity creativity hope despair success and failure contained in the space of imaginations are defined under the concepts of onticity and epistemicity where their roles in the dualistic polar journeys are discussed analyzed and connected to epistemic transversality conditions under the principle of opposites relative to the conditions of input output and cost benefit dualities The book is to fill in some of the important phenomena needed in my investigation of theory of knowing as a production of intellectual investment flows and information knowledge accumulation as the production of intellectual capital stocks relative to the disequilibrium dynamics of human intellectual heritage based on fuzzy paradigm of thought thus providing an added foundation in integrating subjective elements into the development of open artificial intelligence where cost benefit values operate to determine varieties over the spaces of true false and yes no dualities in machine learning
