Economic Democracy The Political Struggle Of The Twentyfirst Century:

Economic Democracy: The Political Struggle of the 21st Century J. W. Smith, 2017-10-03 This title was first published in 1999 The author contends that economic democracy is the economic system the U S purports to have but has thus far failed to achieve because it like all the economic powers that have gone before seeks to control the economies of weaker nations It is the shocking lack of economic democracy and the efforts of so many to achieve it that fuels today s conflicts and will fuel those of the 21st century To show how and why this comprehensive work provides a detailed analysis of the history of numerous aspects of the development of the Neo Mercantilist world economy the geopolitical systems put in place by the developed world to manage and perpetuate that economy and the numerous proposals and modeling plans that have been offered over the years for the achievement of economic democracy

Economic Democracy J. W. Smith, 2005 Permanent global peace and sustainable development Eliminating monopolies we are told are not there Creating a modern commons Increasing economic efficiency equal to the invention of money the printing press and electricity The efficiency increase measures the previously wasted labor capital and resources Each person works 2 3 days per week without loss of food fiber shelter or recreation Under full and equal rights poverty can be eliminated in 10 years Under full and equal rights within 50 years each citizen of the world can have a quality life Plunder by trade and Capital destroying capital eliminated through superefficient capitalism Empowering the powerless

The Schizophrenic Society Roger Boyd, 2015-03-04 Why does humanity seem unable to step off its unsustainable path even with so many direct symptoms from climate change to ecological destruction and peak resources becoming more and more apparent Striving to answer this question The Schizophrenic Society marshals many different insights from such areas as history sociology politics philosophy psychology economics and anthropology The resulting story is an important one that exposes both human and societal shortcomings when grappling with the fundamental issue that we re faced with the continued growth in humanity s claims upon Earth s finite resources In plain language the author takes us on a journey back to the dawn of agriculture and complex societies and demonstrates how over time humanity has built up a set of delusional beliefs about its ability to control the natural world of which it is an integral part He explains how the recent exploitation of fossil fuels has provided a last hurrah for human civilization and its delusional beliefs and then goes on to challenge the faulty logic of the new religion of Economics which derides anyone who questions the possibility of infinite growth on a finite planet Boyd then takes us into the future where he shows us what life will look like if humanity maintains its current path succumbing to modern media s continuous push for consumption He warns us that change will not be easy that the rich and powerful benefit in the short term from the status quo and that to expect them to readily adopt changes that will reduce their wealth and power for the good of the whole is naive

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social

issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

The Wealth of (Some) Nations Zak Cope, 2019-03-20 In this provocative new study Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today Using a rigorous political economic framework he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent unequal exchange and colonial tribute The result is a polarised international class structure with a relatively rich Global North and an impoverished exploited Global South Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public health education pensions and social security As a result the internationalism of populations in the Global North is weakened and transnational solidarity is compromised The only way forward Cope argues is through a renewed anti imperialist politics rooted in a firm commitment to a radical labour internationalism

The Way for Mankind (Book Two) Jean-Marie Paglia, 2011-10-26 This book is an analysis of our world's present condition seen from a spiritual vantage point This holistic view exposes the major problems we face arms budgets twisted democracy nuclear energy overpopulation giant cities etc and allows us to consider what the solutions might be We cannot do this without the coherent and unified vision of the world that can be found in the tradition of Tao This ageless wisdom offers a profound and little known understanding of the origin and structure of the world It gives us the means to understand what we are what our destiny might be and how we might best live Among the leads to follow to get us out of the mess we have created is the realization that our way of thinking is flawed when we restrict ourselves to rational thought at the expense of the mystical intimations necessary to save us and for us to be truly ourselves

The Cooperative Movement Richard C. Williams, 2016-03-23 Richard Williams surveys the history of the cooperative movement from its

origins in the 18th century and deals with the theory of cooperation as contrasted with the Standard Economic Model based on competition. The book contains the results of field studies of a number of successful cooperatives both in the developed and developing world. It includes insights from personal interviews of cooperative members and concludes by considering the successes and challenges of the cooperative movement as an alternative to the global neo colonialism and imperialism that now characterizes free market capitalist approaches to globalization. The book considers democratic and local control of essential economic activities such as the production, distribution and retailing of goods and services. It suggests that cooperative approaches to these economic activities are already reducing poverty and resulting in equitable distributions of wealth and income without plundering the resources of developing countries. Marxisms in the 21st Century Michelle Williams, Vishwas Satgar, 2013-12-01. The current resurgence of Marxism is based on new sources of inspiration and creativity from movements that seek democratic, egalitarian and ecological alternatives to capitalism. The Marxism of many of these movements is neither dogmatic nor prescriptive but rather open, searching, utopian. It revolves around four primary factors: the importance of democracy for an emancipatory project, the ecological limits of capitalism, the crisis of global capitalism and the learning of lessons from the failures of Marxist inspired experiments. Marxisms in the Twenty First Century challenges vanguardist Marxism featured in South Africa and beyond. Featuring leading thinkers from the Left, the book offers provocative ideas on interpreting our current world and serves as an excellent introduction to new ways of thinking about Marxism to students and scholars in the field. Many anti capitalist traditions and themes including democracy, globalisation, feminism, critique and ecology inform and shape the contributions in this volume. **Resistance Against Empire** Derrick Jensen, 2010-06-01. A scathing indictment of U.S. domestic and foreign policy, this collection of interviews gathers incendiary insights from 10 of today's most experienced and knowledgeable activists. Whether it's Ramsey Clark describing the long history of military invasion, Alfred McCoy detailing the relationship between CIA activities and the increase in the global heroin trade, Stephen Schwartz reporting the obscene costs of nuclear armaments or Katherine Albrecht tracing the horrors of the modern surveillance state, this investigation of global governance is sure to inform, engage and incite readers. Full list of interviewees: Stephen Schwartz, author of *Atomic Audit: The Costs and Consequences of U.S. Nuclear Weapons Since 1940*, is a guest scholar at the Brookings Institute and the director of the U.S. Nuclear Weapons Cost Study Project. Katherine Albrecht is the director of CASPIAN (Consumers Against Supermarket Privacy Invasion and Numbering) and is widely recognized as one of the world's leading experts on consumer privacy. Robert McChesney is the author of seven books concerned with the contradiction between a for-profit corporate media and the communications requirements of a democratic society. J.W. Smith is the author of *The World's Wasted Wealth* and is the director of The Institute for Cooperative Capitalism. Juliet Schor is co-founder of the Center for a New American Dream and has written three books focused on trends in work and leisure, consumerism, the relationship between work and family, women's issues and economic justice. Philipsen, 2015-05-26 The story of GDP and why we need a better measurement of growth In one lifetime GDP or Gross Domestic Product has ballooned from a narrow economic tool into a global article of faith As *The Little Big Number* demonstrates this spells trouble While economies and cultures measure their performance by it GDP only measures output It ignores central facts such as quality costs or purpose Sustainability and quality of life are overlooked Losses don't count The world can no longer afford GDP rule GDP ignores real development Dirk Philipsen demonstrates how the history of GDP reveals unique opportunities to fashion smarter goals and measures *The Little Big Number* explores a possible roadmap for a future that advances quality of life rather than indiscriminate growth **Inter-African Development and Development**

Special Bibliography Series, 1957 *Rules, Rubrics and Riches* Shailaja Fennell, 2013-02-01 *Rules Rubrics and Riches* highlights the limitations of existing approaches to understanding the relationship of the law to the process of development It interrogates neoclassical economic thinking that draws on the narrow rubric of self interest to understand the acquisition of riches It takes issue with both the traditional law

and development movement that was unable to shake colonial overtones and the more recent law and economics school that continues to emphasise the centrality of rational man at the micro level and the superiority of linear models of economic progress at the macro level Written as an analysis of and commentary on the contribution of the law to international development using legal cases and development trajectories in China India and Malaysia the book makes the case that individuals do not operate in a vacuum but rather within the social contexts of larger human structures such as family community and nation Rules Rubrics and Riches is distinctive in the view that demanding equality for the individual is inappropriate if this occurs without looking at the broader context of the need for equity within families communities and nations The book offers a new frame for law and development thinking that point to a new set of rules using a broader rubrics to ensure a sustainable accumulation of riches It will be of interest to students and scholars working in the fields of law and development development studies and international and comparative law
