Who Benefits from Global Violence and War Marc Pilisuk, 2007-12-30 Military economic and environmental violence in the era of globalization cause immense suffering and may ultimately threaten the existence of life as we know it but author Pilisuk explains that the future can change if we understand and act upon the roots of violence A professor emeritus of psychology and human and community development Pilisuk explains how most violence is the product of a human built social order in which some people and institutions control most of the resources make the decisions that necessitate violence and operate with minimal accountability The common root of war poverty environmental destruction and other forms of violence is spotlighted Such violence says Pilisuk is a natural consequence of a system inordinately influenced by a relatively small interconnected group of corporate military and government leaders with the power to instill fear to increase their excessive fortunes and to restrict information particularly about their own clandestine dealings This text includes scholarship hailing from across disciplines combined with information from investigative journalism and insights from nonprofit watchdog groups all shedding light on centralized power and its effects Pilisuk presents material including the range of tactics used to manipulate and destroy adversaries the human capacity to kill as a challenge and how media is used by powerful groups to manipulate fear and maintain their power Here readers find solid social science to support what whistleblowers and social critics are observing about a system that needs change

**The Restoration Economy** Storm Cunningham, 2002-11-02 The Restoration Economy reveals the previously undocumented trillion dollar global industries that are restoring our natural and manmade environments Restorative development is rapidly overtaking new development because we are running out of things to develop Most natural areas are already either farmed or degraded and cities have built all the way to their borders However there is no lack of things to redevelop and restore Storm Cunningham surveys the wide range of restoration industries and points out the connections among them He shows for example how the restoration of a river ecosystem can have a major

impact on the commercial success of a redeveloped historic urban waterfront Written for a broad range of audiences The Restoration Economy is an entertaining blend of business science and economics that details exciting new business and investment opportunities in this dynamic economic sector      **Confessions of an Economic Hit Man** John

Perkins,2004-11-09 Economic hit men John Perkins writes are highly paid professionals who cheat countries around the globe out of trillions of dollars Their tools include fraudulent financial reports rigged elections payoffs extortion sex and murder John Perkins should know he was an economic hit man His job was to convince countries that are strategically important to the U S from Indonesia to Panama to accept enormous loans for infrastructure development and to make sure that the lucrative projects were contracted to U S corporations Saddled with huge debts these countries came under the control of the United States government World Bank and other U S dominated aid agencies that acted like loan sharks dictating repayment terms and bullying foreign governments into submission This New York Times bestseller exposes international intrigue corruption and little known government and corporate activities that have dire consequences for American democracy and the world It is a compelling story that also offers hope and a vision for realizing the American dream of a just and compassionate world that will bring us greater security      *Korea Update* ,1995      **A World After**

**Climate Change and Culture-Shift** Jim Norwine,2013-10-07 In this book an international team of environmental and social scientists explain two powerful current change engines and how their effects and our responses to them will transform Earth and humankind into the 22nd century c 2100 This book begins by detailing the current state of knowledge about these two ongoing accelerating and potentially world transforming changes climate change in the form of global warming and a profound emerging shift of normative cultural condition toward the assumptions and values often associated with so called postmodernity such as tolerance diversity self referentiality and dubiety replaced with certainty Next the contributors imagine explain and debate the most likely consequent transformations of human and natural ecologies and economies that will take place by the end of the 21st century In 16 compellingly original provocative and readable chapters A World after Climate Change and Culture Shift presents a one of a kind vision of our current age as a hinge or axial century one driven by the most radical combined change of nature and culture since the rise of agriculture at the end of the last Ice Age some 10 millennia ago This book is highly recommended to scholars and students of the environmental and social sciences as well as to all readers interested in how changes in nature and culture will work together to reshape our world and ourselves I cannot think of a book more geared to advancing the art and science of geography Yi Fu Tuan J K Wright and Vilas Professor Emeritus of Geography University of Wisconsin Madison Outstanding unique and exceptional timeliness of topic and ambition of vision Richard Marston University Distinguished Professor Kansas State University past president Association of American Geographers      **In Harm's Way** Kathleen Kern,2009-01-01 In 1984 Evangelicals for Social Action founder Ron Sider posed the questions What would happen if we in the Christian church developed a new nonviolent peacekeeping force ready to

move into violent conflicts and stand peacefully between warring parties Everyone assumes that for the sake of peace it is moral and just for soldiers to get killed by the hundreds of thousands even millions Do we not have as much courage and faith as soldiers Christian Peacemaker Teams CPT has been trying to answer those questions since 1986 CPT has responded to invitations from grassroots organizers on five continents who are using nonviolent strategies to confront systemic oppression This book provides a glimpse into the mistakes and successes the triumphs and tragedies that teams have shared in with local co workers in various nations It also continues to pose the question What would happen if CPT s efforts were multiplied by millions of Christians with a radical commitment to Jesus s nonviolent gospel *Economic and Political Contention in Comparative Perspective* Maria Kousis, Charles Tilly, 2015-12-03 European and American specialists in economic and political processes move beyond earlier debates to look seriously systematically and innovatively at social change and protest with particular attention to the influence of economic change and variation on contentious politics The essays take up two widely recognized but much contested questions in contentious politics how threats and opportunities faced by potential participants in joint political action affect the likelihood character and consequences of that action and how economic change and variation either a constitute significant political threats and opportunities or b shape responses to political threats and opportunities Contributors Maria Kousis Charles Tilly Marc Giugni Julie Berclaz Marc Steinberg Jeffery Broadbent Klaus Eder John K Glenn Dieter Rucht Richard Hogan Maryjane Osa Cristina Corduneanu Husi Net Loss Nathan Newman, 2015-12-16 How has the Internet been changing our lives and how did these changes come about Nathan Newman seeks the answers to these questions by studying the emergence of the Internet economy in Silicon Valley and the transformation of power relations it has brought about in our new information age Net Loss is his effort to understand why technological innovation and growth have been accompanied by increasing economic inequality and a sense of political powerlessness among large sectors of the population Newman first tells the story of the federal government s crucial role in the early development of the Internet with the promotion of open computer standards and collaborative business practices that became the driving force of the Silicon Valley model He then examines the complex dynamic of the process whereby regional economies have been changing as business alliances built around industries like the Internet replace the broader public investments that fueled regional growth in the past A radical restructuring of once regionally focused industries like banking electric utilities and telephone companies is under way with changes in federal regulation helping to undermine regional planning and the power of local community actors The rise of global Internet commerce itself contributes to weakening the tax base of local governments even as these governments increasingly use networked technology to market themselves and their citizens to global business usually at the expense of all but their most elite residents More optimistically Newman sees an emerging countertrend of global use of the Internet by grassroots organizations such as those in the antiglobalization movements that may help to transcend this local powerlessness
