## **Economics In Real Time:**

**Economics in Real Time** C. John McDermott, 2004 A new model for contemporary economic behavior **The Oxford Handbook of Economic Forecasting** Michael P. Clements, David F. Hendry, 2011-06-29 This Handbook provides up to date coverage of both new and well established fields in the sphere of economic forecasting The chapters are written by world experts in their respective fields and provide authoritative yet accessible accounts of the key concepts subject matter and techniques in a number of diverse but related areas It covers the ways in which the availability of ever more plentiful data and computational power have been used in forecasting in terms of the frequency of observations the number of variables and the use of multiple data vintages Greater data availability has been coupled with developments in statistical theory and economic analysis to allow more elaborate and complicated models to be entertained the volume provides explanations and critiques of these developments These include factor models DSGE models restricted vector autoregressions and non linear models as well as models for handling data observed at mixed frequencies high frequency data multiple data vintages methods for forecasting when there are structural breaks and how breaks might be forecast Also covered are areas which are less commonly associated with economic forecasting such as climate change health economics long horizon growth forecasting and political elections Econometric forecasting has important contributions to make in these areas along with how their developments inform the mainstream **Time in Contemporary Intellectual Thought** P.J.N. Baert, 1999-12-09 In this book fifteen authors from a wide spectrum of disciplines ranging from the natural sciences to the arts offer assessments of the way time enters their work the definition and uses of time that have proved most productive or problematic and the lessons their subjects can offer for our understanding of time beyond the classroom and laboratory walls The authors have tried without sacrificing analytical rigour to make their contribution accessible to a cross disciplinary readership Each chapter reviews time s past and present application in its respective field considers the practical and logical problems that remain and assesses the methods researchers are using to escape or resolve them Particular attention is paid to ways in which the technical treatment of time for problem solving and model building around specific phenomena call on or clash with our intuitive perceptions of what time is and does The spans of time considered range from the fractions of seconds it takes unstable particles to disintegrate to the millions of years required for one species to give way to another Like all central conceptual words time is understood on several levels By inviting input from a broad range of disciplines the book aims to provide a fuller understanding of those levels and of the common ground that lurks at their base Much agreement emerges not only on the nature of the problems time presents to modern intellectual thought but also on the clues that recent discoveries may offer towards possible solutions *Output Gap Uncertainty and Real-Time Monetary Policy* Francesco Grigoli, Alexander Herman, Mr. Andrew Swiston, Mr. Gabriel Di Bella, 2015-01-23 Output gap estimates are subject to a wide range of uncertainty owing to data revisions and the difficulty in distinguishing between cycle and trend in real

time This is important given the central role in monetary policy of assessments of economic activity relative to capacity We show that country desks tend to overestimate economic slack especially during recessions and that uncertainty in initial output gap estimates persists several years Only a small share of output gap revisions is predictable ex ante based on characteristics like output dynamics data quality and policy frameworks We also show that for a group of Latin American inflation targeters the prescriptions from typical monetary policy rules are subject to large changes due to output gap revisions These revisions explain a sizable proportion of the deviation of inflation from target suggesting this information is not accounted for in real time policy decisions

*Unified Economics* Beizhan Liu, 2019-09-02 This book consists of three sections the first section is the theory system of Unified Economics that I proposed as a pioneer This theory system currently contains a total of about 30 theories Unified economics unified microeconomics medium sized economics and macroeconomics together Unified economics achieves the touchability and calculability of economic reality as advocated by Beizhan school of thought Unified economics analyzed various properties of regional economy comprehensively and established a more complete and national economic evaluation system with uniqueness The second section mainly includes my elaboration on the election finance system The third section mainly includes my elaborations on other economic issues such as currency finance economy real estate economy and so on I hope that my economic theories and thoughts can provide strong guidance for the economic development of all countries in the world and provide strong theoretical supports for the realization of equitable development common development and sustainable development in the world Many theories and thoughts in this book are brand new the innovative concepts included inside include economic bubble volume and economic bubble degree economic wheel economic potential energy sentinel value internationalization index of economic wheel economic tightness degree market demand degree and market demand volume economic development degree market transformation rate market inventory rate market inventory volume monetized inventory volume management team size social ratio management team size employment ratio achievement management consumption ratio cost management consumption ratio the per capita management cost of the management team management team per capita profit value of public management economic green potential energy environmental economic cost economic equality degree economic equality fall economic monopoly degree economic monopoly volume the advantages of regional economy regional economic competitiveness benefit acquiring capability adequacy degree adequacy volume advantage set and advantage sequence the livelihood of people interest acquisition property of people s livelihood interest contribution property of people s livelihood interest acquisition property of finance interest contribution property of finance economic efficiency marketized economic efficiency environmental production cost ratio integrated cost marketized production value green production value marketized production value ratio green production value ratio marketized GDP regional economic participation degree three forms of currency productive currency consumption currency and silent currency regional currency total regional pure

*Macroeconomic Modelling, Economic Policy and Methodology* Mikael Randrup Byrialsen, Hamid Raza, Finn Olesen, 2022-10-27 Demonstrating that there are superior alternatives to the modern macroeconomic mainstream and its DSGE dynamic stochastic general equilibrium models this book presents the cutting edge in macroeconomic modelling economic policy and methodology from the perspective of heterodox economic thinking The first part of the book explores methodological issues advocating for a stronger ethical consideration in macroeconomics and for the adoption of a strategy of pluralism to ensure that macroeconomic theory is capable of adapting to real world issues The second part highlights recent trends in empirical Stock Flow Consistent models by collecting a group of the most well developed empirical models of five different economies the Danish the Dutch the French the Italian and the Argentinian models In all five cases the models are used to discuss various policy aspects of the individual economies Finally the book explores issues of macroeconomic policy which are largely neglected by mainstream economists including financial in stability and macro imbalances The book emphasizes the need for investigating sectoral balances which are crucial elements for investigating imbalances from the heterodox perspective This

book will be of significant interest to students and scholars of macroeconomics economic modelling economic methodology and heterodox economics more broadly      Forecasting in the Presence of Structural Breaks and Model Uncertainty David E. Rapach, Mark E. Wohar, Hamid Beladi, Kwan Choi, 2008-02-29 Forecasting in the presence of structural breaks and model uncertainty are active areas of research with implications for practical problems in forecasting This book addresses forecasting variables from both Macroeconomics and Finance and considers various methods of dealing with model instability and model uncertainty when forming forecasts      *The Theory of Economic Personality* Taner Güney, 2023-12-19 Do individuals have an economic personality Is there a model for real life human economic behavior Can real life economic behaviors be predicted This book identifies the theory of economic personality Economic personality leads an individual to exhibit predictable behaviors without the need to be rational in cases of uncertainty So this book argues that the individual is not rational what is rational however is the systematic repetition of behaviors dictated by people's economic personalities

Principles of Commodity Economics and Finance Daniel P. Ahn, 2019-04-09 A rigorous but practical introduction to the economic financial and political principles underlying commodity markets Commodities have become one of the fastest growing asset classes of the last decade and the object of increasing attention from investors scholars and policy makers Yet existing treatments of the topic are either too theoretical ignoring practical realities or largely narrative and nonrigorous This book bridges the gap striking a balance between theory and practice It offers a solid foundation in the economic financial and political principles underlying commodities markets The book which grows out of courses taught by the author at Columbia and Johns Hopkins can be used by graduate students in economics finance and public policy or as a conceptual reference for practitioners After an introduction to basic concepts and a review of the various types of commodities energy metals agricultural products the book delves into the economic and financial dynamics of commodity markets with a particular focus on energy The text covers fundamental demand and supply for resources the mechanics behind commodity financial markets and how they motivate investment decisions around both physical and financial portfolio exposure to commodities and the evolving political and regulatory landscape for commodity markets Additional special topics include geopolitics financial regulation and electricity markets The book is divided into thematic modules that progress in complexity Text boxes offer additional related material and numerous charts and graphs provide further insight into important concepts
