G. Popkova, Bruno S. Sergi, 2019-09-14 This proceedings book features selected papers from the 9th National Scientific and Practical Conference Digital Economy Complexity and Variety Vs Rationality which took place on April 17-18, 2019 in Vladimir, Russian Federation. It presents the latest research in the field of the digital economy, discussing its role in the creation of advantages for the state, entrepreneurship and society, as well as the emergence of new economic risks. The chapters address the following topics: the importance of economy's digital modernization tools for the formation of the digital economy in Russia; specific features and perspectives of digital modernization of the regional economy; an overview of the social consequences of transition to the digital economy; financial components of the digital economy; legal challenges regarding the digital reality for society and state; and the main challenges and threats to the profession of jurisprudence in the context of the digitization of the economy. Intended for representatives of the academic community and researchers interested in the formation of the digital economy and digital society, as well as undergraduates, postgraduates and masters of economic specialties, the book is also a valuable resource for companies that use or wish to implement digital technologies into their economic practices and public and government employees involved with monitoring, control and regulation of the digital economy.

Global Political Economy in the Information Age Gillian Youngs, 2007-01-24 This volume is an insightful, fresh and wide-ranging evaluation of the conceptual challenges of globalization and the new information era.

The Handbook of Internet Studies Mia Consalvo, Charles Ess, 2012-12-17 The Handbook of Internet Studies HANDBOOKS IN COMMUNICATION AND MEDIA. Highly recommended CHOICE. A state-of-the-art collection that represents and celebrates the diversity of theoretical and disciplinary approaches, marking this brave new field. A new must-have reference book for Internet studies. Caroline Haythornthwaite, University of Illinois. This indispensable volume reflects the complexity of Internet studies; indeed, the Internet itself, by bringing together a diverse set of voices, geographies, disciplines and arguments. It is not only an important resource for practitioners but will also spark the curiosity of those on the edges of the field, including humanists, social scientists and engineers alike. Michael Zimmer, University of Wisconsin. A comprehensive and useful volume that will appeal to students, teachers and researchers. I highly recommend it to those who have been following the field since its emergence in the 1990s, as well as to those new to the field. Steve Jones, University of Illinois at Chicago. This handbook is landmark, documenting that Internet studies have now come of age. Niels Ole Finnemann, Aarhus University. To fully understand the impact and significance of the Internet, it is essential to consider its historical, societal and cultural contexts. This handbook presents a wide range of original essays by established scholars in the field of Internet studies, exploring the role of the Internet in modern societies and the continuing development of its academic study.

and communication technologies have substantially affected most segments of our life leading to the Information Age or Information Revolution. On both individual and state scale, information has become a vital commodity by which one measures levels of knowledge, skills, well-being, prosperity and development. This academic work traces the evolution of the Information Age and the emerging trends of diplomacy and politics in today's world. It signals potential opportunities and threats while strategically forecasting current and future implications. Including three major chapters, the work is divided into eleven significant themes. It reviews the emergence of knowledge-based societies and highlights their main features. The course of globalization, the worldwide Internet development, the consequences of restricting the flow of information and the Revolution in Military Affairs are among the issues examined. Also thoroughly treated is the evolution of diplomacy with reference to information and intelligence gathering, analysis and policy making. The publication outlines the qualifications of diplomats and executives required at the present and coming stages of professionalism. In addition to examining contemporary traditional and non-traditional conflicts around the globe, it takes a look at U.S. hegemony policies in world affairs. Certain cultural and social issues directly linked to the Information Age are dealt with as well. They refer to the growing importance of culture and identity awareness in an era of increasing social interdependence and to the global evolution of languages and their use in everyday life and in current affairs. The book concludes with a set of observations in the aftermath of the September 11 attacks on the United States. The observations point to particular notions and developments that influence our way of living, politics and diplomacy. Furthermore, specific analysis is made to the U.S. invasion in Iraq in March 2003 and to its consequences.

The Internet in China Zixue Tai, 2007-05-07. The Internet in China examines the cultural and political ramifications of the Internet for Chinese society. The rapid growth of the Internet has been enthusiastically embraced by the Chinese government, but the government has also rushed to seize control of the virtual environment. Individuals have responded with impassioned campaigns against official control of information. The emergence of a civil society via cyberspace has had profound effects upon China. For example, in 2003, based on an Internet campaign, the Chinese Supreme People's Court overturned the ruling of a local court for the first time since the Communist Party came to power in 1949. The important question this book asks is not whether the Internet will democratize China, but rather in what ways the Internet is democratizing communication in China. How is the Internet empowering individuals by fostering new types of social spaces and redefining existing social relations?
