Casa SANAA (Spanish Edition) Sam Chermayeff, Agustín Pérez Rubio, 2021-03-29 Sanaa's housing projects both finished House A S House House in a Plum Grove Small House and Moriyama House and unfinished projects Flower House Garden House Seijo Apartments Ichikawa Apartments House in China and Eda Apartments SANAA's architecture embraces complexities within deceptively simple appearances. It has many elements that are impossible to understand unless actually experienced. In contrast with modern architecture SANAA has many aspects that cannot be revealed in representative media such as plans models and photographs. The representations of their architectural works incorporate ambiguity and chronological elements. This characteristic makes Sanaa one of the most innovative offices in the current architectural panorama.

Blurred Transparencies in Contemporary Glass Architecture Aki Ishida, 2020-04-22 Blurred Transparencies in Contemporary Glass Architecture brings to light complex readings of transparent glass through close observations of six pivotal works of architecture. Written from the perspectives of a practitioner the six essays challenge assumptions about fragility and visual transparency of glass. A material imbued with idealism and utopic vision glass has captured architects' imagination and glass's fragility and difficulties in thermal control continue to present technical challenges. In recent decades architecture has witnessed an emergence of technological advancements in chemical coating structural engineering and fabrication methods that resulted in new kinds of glass transparencies. Buildings examined in the book include a sanatorium with expansive windows delivering light and air to recovering tuberculosis patients a pavilion with a crystal clear glass plenum circulating air for heating and cooling a glass monument symbolizing the screen of personal devices that shortened the distance between machines and humans and a glass building symbolizing the social and material intertwining in the glass ceiling metaphor. Connecting material glass to broader cultural and social contexts Blurred Transparencies in Contemporary Glass Architecture enlightens students and practitioners of architecture as well as the general public with interest in design. The author demonstrates how glass is rarely crystal clear but is blurred both materially and metaphysically revealing complex readings of ideas for which glass continues to stand.

**Architecture of Threshold Spaces** Laurence Kimmel, 2021-12-30 This book explores the relationship between architecture and philosophy through a discussion on threshold spaces linking public space with publicly accessible buildings. It explores the connection between exterior and interior and how this creates and affects interactions between people and the social dynamics of the city. Building on an existing body of literature the book engages with critical philosophy and discusses how it can be applied to architecture. In a similar vein to Walter Benjamin's descriptions of the Parisian Arcades in the nineteenth century the book identifies the conditions under which thresholds reveal and impact social life. It utilises a wide range of illustrated international case studies from architects in Japan Norway Finland France Portugal Italy the USA Australia Mexico and Brazil. Within the examples thresholds become enhancers of social interactions and highlight broader socio political contexts in public and

private space Architecture of Threshold Spaces is an enlightening contribution to knowledge on contemporary architecture politics and philosophy for students academics and architects    **Thinking and Building on Shaky Ground** Yun Fu,2023-10-24

Building with earthquakes is a familiar yet persistent design problem for resilient construction on all continents This book elaborates on various factors for earthquake resilient architecture in six thematic chapters that explore the design strategies of lightness quickness exactitude visibility multiplicity and consistency These factors allow designers to develop contextual solutions that marry technical know how with social and cultural understanding ranging in scale from buildings to furniture and urban master plans 120 case studies from roughly 30 countries including some highly prestigious buildings provide a comprehensive overview of the different design strategies    **The Architecture of Art Museums**

Ronnie Self,2014-04-16 As a building type art museums are unparalleled for the opportunities they provide for architectural investigation and experimentation They are frequently key components of urban revitalization and often push the limits of building technology Art museums are places of pleasure education and contemplation They are remarkable by their prominence and sheer quantity and their lessons are useful for all architects and for all building types This book provides explicit and comprehensive coverage of the most important museums built in the first ten years of the 21st Century in the United States and Europe By dissecting and analyzing each case Ronnie Self allows the reader to get under the skin of each design and fully understand the process behind these remarkable buildings Richly designed with full technical illustrations and sections the book includes the work of Tadao Ando Zaha Hadid Peter Cook Colin Fournier Renzo Piano Yoshi Taniguchi Herzog de Meuron Jean Nouvel SANAA Daniel Libeskind Diller Scofidio Renfro Steven Holl Coop Himmelb 1 au Bernard Tschumi Sauerbruch Hutton and Shigeru Ban Jean de Gastines Together these diverse projects provide a catalogue of design solutions for the contemporary museum and a snapshot of current architectural thought and culture One of few books on this subject written by an architect Self s analysis thoroughly and critically appraises each project from multiple aspects and crucially takes the reader from concept to building This is an essential book for any professional engaged in designing a museum

**Spatial Transparency in Architecture** Camilo Rosales,2022-08-12 This volume explores the concept of spatial transparency a form of spatial continuity that articulates depth through permeable layered or porous three dimensional organizations where interstitial light is present Although transparency is a concept largely associated with the modern movement the use of glazed components and twentieth century architectural discourse spatial transparency is a form of depth awareness through intermediate domains takes place through the interstitial fabric of a structure and occurs when several consecutive domains are spatially and visually connected These immersive environments invite active participation not as one way communication but as a series of visual and experiential exchanges interdependencies and relationships Divided into four parts the book examines spatial transparency in massive opaque constructions light constructions glass assemblies and hybrid systems It analyzes both the phenomenon of visual connectivity and continuity through intermediate

spaces and spatial transparency's capacity for promoting and enabling graded interflowing environmental transactions. Using historical and contemporary examples it catalogs some of the most common and recurring configurations that manifest these characteristics. Over 20 international case studies from the Americas to Japan are presented to argue that environments exist in porous mediums and that by studying the openings voids light and materials of layered and or permeable organizations important insights about space making can be revealed. Written for students and academics this book explores various expressions of spatial transparency in architecture and helps connect their abstract ideas with significant built works analytical drawings and comparison charts.

**Metaphors in Architecture and Urbanism** Andri Gerber, Brent Patterson, 2014-03-15 Architecture and urbanism seem to be weak disciplines constantly struggling for a better understanding of their nature and disciplinary borders. The huge amount of metaphors appearing in the discourse of both not only reference to their creative nature but also indicate their weakness and the missing piece strengthening their own understanding a definition of space for architecture and of city for urbanism. But using metaphors in this field implies a problem though metaphors achieve to bring opposites together there remains the question how literal they can actually become in order to relate to these subjects properly. In this volume several authors from various fields using different approaches discuss this question.

**Graphical Heritage** Luis Agustín-Hernández, Aurelio Vallespín Muniesa, Angélica Fernández-Morales, 2020-05-11 This book presents the proceedings of the 18th International Conference on Graphic Design in Architecture EGA 2020 focusing on heritage including architectural and graphic heritage as well as the graphics of heritage. Consisting of two parts Representation and Analysis and Concept and Creation this second volume gathers selected contributions on topics ranging from graphic representation to the graphic presentation of ideas i.e. artistic creation to bridge the gap between graphic heritage and the graphics of heritage. Given its scope this volume will appeal to architectural and graphic designers artists and engineers providing them with extensive information on new methods and a source of inspiration for future research and interdisciplinary collaborations.

Decodificando sejima-sanaa Aida González-Llavona,2021-05-19 Este libro ofrece un análisis de la obra de Sejima Sanaa desde la Casa Platform I 1989 hasta el Centro Rolex 2010 centrado en aspectos relativos a la forma arquitectónica la estructura portante y las relaciones de ambas entre sí y con otros aspectos de su arquitectura Dicho análisis dibuja dos trayectorias una relativa a la forma y otra a la estructura Ambas parten de preceptos heredados de la modernidad arquitectónica del S XX que se van paulatinamente transgrediendo hasta que las lógicas formales y estructurales de la mayor parte de las obras de Sejima Sanaa del S XXI no se pueden explicar sólo desde la lógica del proyecto moderno El análisis formal se aborda de modo sugerente intentando imaginar y describir la posible génesis proyectual de la forma como desde que pensamiento con qué estrategias instrumentos y desarrollo las propuestas formales que propone Sejima Sanaa podrían haber sido pensadas La respuesta a estas preguntas se traduce en el despliegue de una serie de hipotéticos procesos proyectuales lo que podemos llamar decodificaciones de la forma que veros milmente podrían haber dado lugar a los proyectos realizados por Sejima Sanaa El proceso de decodificación ha operado con dos premisas solo se entienden las cosas cuando se entiende como han podido ser originadas pensadas construidas y no cabe el perseguir descubrir los procesos reales sino proponer y describir procesos veros miles cuyo interés es en su alcance pedagógico no en la identificación de ninguna verdad biográfica o histórica Este libro ofrece además otras lecturas y análisis sobre aspectos inevitablemente relacionados con lo anterior referidos sobre todo a la naturaleza del espacio arquitectónico y al emplazamiento de la arquitectura en el lugar Espera servir para entender mejor las lógicas inherentes a las propuestas proyectuales de Sejima Sanaa y para encontrar algunas claves sobre un proyectar contemporáneo que estando arraigado en la modernidad arquitectónica del S XX también la trasciende

El Croquis ,2006 Sanaa José Jaraíz,2021-06-01 En los últimos tiempos el estudio japonés SANAA ha realizado una serie de obras que le han puesto en el punto de mira de la arquitectura internacional y que se ha visto reflejado en la concesión en el año 2010 del premio Pritzker a Kazuyo Sejima y Ryue Nishizawa por toda una carrera de trabajo interrumpido SANAA ha construido una serie de edificios que han supuesto una gran influencia en el contexto de la arquitectura mundial y que están contribuyendo al trabajo de muchos arquitectos jóvenes tanto en Japón como fuera de Japón su trabajo se estudia y analiza en las escuelas de arquitectura de medio mundo Este libro estudia el parque de SANAA desde las diversas formas en las que este se presenta parques por continuidad o parques por acumulación como una excusa para el estudio de los que se basa su modo de proyectar Dichos mecanismos forman parte ya de una forma de proyectar contemporánea y su estudio permite la comprensión de algunos de los fenómenos arquitectónicos más interesantes que se están produciendo en la arquitectura de nuestro tiempo La revelación de estos mecanismos supone el sacar a la luz gran parte de los procesos y desarrollos de proyecto que por la lógica manera de dibujar de visita lenta y pausada por el edificio El libro se convierte entonces en una investigación en la que el autor como un detective rastrea los proyectos de SANAA buscando aquellos mecanismos que permiten discernir el verdadero significado de conceptos como laberinto jerárquico orden atmósfera o experiencia a lo largo de
