Happenings And Hearsay Experiences Of A Biological Anthropologist:

Happenings and Hearsay Gabriel Ward Lasker, 1999 One of the founders of modern human biology and physical anthropology Gabriel W Lasker holds a well established place in the history of science In a classic article published in Science in 1969 Lasker advanced the idea of plasticity the process of human adaptation to stressful environments by a series of modifications to the body during the course of physical growth and development This concept was a factor that led the scientific community to give up its reliance on the notion of genetically fixed racial types As he documents the rapidly changing field of anthropology and some of its leading figures Lasker gives his readers a peek inside the lives of people who have defined what it means to be human and one of those people is himself **Centralizing Fieldwork** Jeremy

MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology *Histories of American Physical Anthropology in the Twentieth Century* Michael

A. Little, Kenneth A. R. Kennedy, 2010-01-01 Histories of American Physical Anthropology in the Twentieth Century chronicles the history of physical anthropology or as it is now known biological anthropology from its professional origins in the late 1800 up to its modern transformation in the late 1900s In this edited volume 13 contributors trace the development of people ideas traditions and organizations that contributed to the advancement of this branch of anthropology that focuses today on human variation and human evolution Designed for upper level undergraduate students graduate students and professional biological anthropologists this book provides a brief and accessible history of the biobehavioral side of anthropology in America **Mildred Trotter and the Invisible Histories of Physical and Forensic Anthropology** Emily

Wilson, 2022-04-11 In the wake of World War II anatomist and anthropologist Mildred Trotter left the Midwest for a temporary post as the forensic anthropology expert for the Army in the Territory of Hawaii Her formidable task was to identify the remains of war dead in order to return them to their families in a national effort that continues to this day Mildred Trotter and the Invisible Histories of Physical and Forensic Anthropology is the first long overdue biography on this woman of immense stature in her field She was the first woman to serve as President of the American Association of Physical

Anthropologists and the first woman to be full professor at the Washington University School of Medicine in St Louis While primarily a biography of Trotter this book also examines aspects that are so often left out of retrospectives of science and scientific figures This includes scientific error the historical experiences of the few women and individuals from other marginalized groups active in the discipline sexism and scientific and social racism This book also provides novel historical context regarding her major and now well known tibia mismeasurement Mildred Trotter and the Invisible Histories of Physical and Forensic Anthropology is a must read for anyone interested in the history of science and women in science and for all practicing and aspiring biological and forensic anthropologists *Darwinism, Democracy, and Race* John Jackson, David Depew, 2017-07-06 Darwinism Democracy and Race examines the development and defence of an argument that arose at the boundary between anthropology and evolutionary biology in twentieth century America In its fully articulated form this argument simultaneously discredited scientific racism and defended free human agency in Darwinian terms The volume is timely because it gives readers a key to assessing contemporary debates about the biology of race By working across disciplinary lines the book's focal figures the anthropologist Franz Boas the cultural anthropologist Alfred Kroeber the geneticist Theodosius Dobzhansky and the physical anthropologist Sherwood Washburn found increasingly persuasive ways of cutting between genetic determinist and social constructionist views of race by grounding Boas's racially egalitarian culturally relativistic and democratically pluralistic ethic in a distinctive version of the genetic theory of natural selection Collaborators in making and defending this argument included Ashley Montagu Stephen Jay Gould and Richard Lewontin Darwinism Democracy and Race will appeal to advanced undergraduates graduate students and academics interested in subjects including Philosophy Critical Race Theory Sociology of Race History of Biology and Anthropology and Rhetoric of Science **Biographical Memoirs** National Academy of Sciences, 2004-02-01 Biographic Memoirs Volume 84 contains the biographies of deceased members of the National Academy of Sciences and bibliographies of their published works Each biographical essay was written by a member of the Academy familiar with the professional career of the deceased For historical and bibliographical purposes these volumes are worth returning to time and again **Life on Ice** Joanna Radin, 2017-03-27 Preface frozen spirits Introduction within cold blood The technoscience of life at low temperature Latent life in biomedicine's ice age Temporalities of salvage As yet unknown life for the future Before it's too late life from the past Collecting maintaining reusing and returning Managing the cold chain making life mobile When futures arrive lives after time Epilogue thawing spirits **Science for Segregation** John P. Jackson, Jr., 2005-08-01 In this fascinating examination of the intriguing but understudied period following the landmark Brown v Board of Education decision John Jackson examines the scientific case aimed at dismantling the legislation Offering a trenchant assessment of the so called scientific evidence Jackson focuses on the 1959 formation of the International Society for the Advancement of Ethnology and Eugenics IAAEE whose expressed function was to objectively investigate racial differences and publicize their findings

Notable figures included Carleton Putnam Wesley Critz George and Carleton Coon In an attempt to link race eugenics and intelligence they launched legal challenges to the Brown ruling each chronicled here that went to trial but ultimately failed The history Jackson presents speaks volumes about the legacy of racism as we can see similar arguments alive and well today in such books as *The Bell Curve* and in other debates on race science and intelligence With meticulous research and a nuanced understanding of the complexities of race and law Jackson tells a disturbing tale about race in America

In Defense of Anthropology Herbert S. Lewis, 2017-09-08 This book argues that the history and character of modern anthropology has been egregiously distorted to the detriment of this intellectual pursuit and academic discipline The critique of anthropology is a product of the momentous and tormented events of the 1960s when students and some of their elders cried Trust no one over thirty The Marxist postmodern and postcolonial waves that followed took aim at anthropology and the result has been a serious loss of confidence both the reputation and the practice of anthropology has suffered greatly The time has come to move past this damaging discourse Herbert S Lewis chronicles these developments and subjects the critique to a long overdue interrogation based on wide ranging knowledge of the field and its history as well as the application of common sense The book questions discourses about anthropology and colonialism anthropologists and history the problem of exoticizing the Other anthropologists and the Cold War and more Written by a master of the profession In *Defense of Anthropology* will require consideration by all anthropologists historians sociologists of science and cultural theorists

Human Evolutionary Biology Michael P. Muehlenbein, 2010-07-29 A wide ranging and inclusive text focusing on topics in human evolution and the understanding of modern human variation and adaptability
