*Hard Work Is Not Enough* Katrinell M. Davis, 2016-11-14

The Great Recession punished American workers, leaving many underemployed or trapped in jobs that did not provide the income or opportunities they needed. Moreover, the gap between the wealthy and the poor had widened in past decades as mobility remained stubbornly unchanged. Against this deepening economic divide, a dominant cultural narrative took root: immobility, especially for the working class, is driven by shifts in demand for labor. In this context and with right-to-work policies proliferating nationwide, workers are encouraged to avoid government dependency by arming themselves with education and training.

Drawing on archival material and interviews with African American women transit workers in the San Francisco Bay Area, Katrinell Davis grapples with our understanding of mobility as it intersects with race and gender in the postindustrial and post-civil rights United States. Considering the consequences of declining working conditions within the public transit workplace of Alameda County, Davis illustrates how worker experience on and off the job has been undermined by workplace norms and administrative practices designed to address flagging worker commitment and morale. Providing a comprehensive account of how political, social, and economic factors work together to shape the culture of opportunity in a postindustrial workplace, she shows how government manpower policies, administrative policies, and drastic shifts in unionization have influenced the prospects of low-skilled workers.

**Hard Work** Roy Williams, Tim Crothers, 2011-10-11

Williams recounts his rough early years, his long tenure as head coach at the University of Kansas, how he recruits, teaches, and motivates his players, how he's shepherded teams through some of the most nail-biting games at both Kansas and UNC, and how he suffered through one of the roughest seasons of his tenure and came out on the other side to be

Five Generations of a Mexican American Family in Los Angeles Christina Chavez, 2007-04-09 Despite their citizenship and English monolingualism Mexican Americans have long been known to remain largely working class which academically has meant that they tend to be mostly high school graduates with low rates of college attendance and completion Attempting to understand this phenomenon Five Generations of a Mexican American Family in Los Angeles chronicles the home work and school lives of the author s multigenerational family throughout the twentieth century Using oral histories of 33 members across five generations the Fuentes story illuminates the interaction between race ethnicity and class at home in the labor market and in schools which circumscribe the opportunity and resources or lack thereof for academic success Generally findings show that these factors work together to reproduce the family s social standing over generations Equally important the analysis reveals how the persistence and strength of the Fuentes heritage cultural values buena educaci n and familism have insulated them

from the continued threat of racial discrimination and economic hardship in American life The Fuentes story provides the reader with a keen view of the process by which Fuentes moved from immigrants to ethnic Americans and shows how they have gracefully survived the harsh and unpredictable nature of being of a racial minority and the working class

**Marginalized Black Men** Alford A. Young Jr.,2011-10-30 While we hear much about the culture of poverty that keeps poor black men poor we know little about how such men understand their social position and relationship to the American dream Moving beyond stereotypes this book examines how twenty six poverty stricken African American men from Chicago view their prospects for getting ahead It documents their definitions of good jobs and the good life and their beliefs about whether and how these can be attained In its pages we meet men who think seriously about work family and community and whose differing experiences shape their views of their social world Based on intensive interviews the book reveals how these men have experienced varying degrees of exposure to more privileged Americans differences that ground their understandings of how racism and socioeconomic inequality determine their life chances The poorest and most socially isolated are perhaps surprisingly most likely to believe that individuals can improve their own lot By contrast men who regularly leave their neighborhood tend to have a wider range of opportunities but also have met with more racism hostility and institutional obstacles making them less likely to believe in the American Dream Demonstrating how these men interpret their social world this book seeks to de pathologize them without ignoring their experiences with chronic unemployment prison and

substance abuse It shows how the men draw upon such experiences as they make meaning of the complex circumstances in which they strive to succeed
