

# HARMONIC ANALYSIS ON COMPACT POLAR HOMOGENEOUS SPACES

JING-SONG HUANG

In this paper we are concerned with the existence of discrete series for semisimple homogeneous spaces. This leads to the definition of polar homogeneous spaces. We first study the harmonic analysis on compact polar homogeneous spaces. The proof of the existence of discrete series and the Plancherel formula for non-compact and non-symmetric polar homogeneous spaces will be given in a consequent paper.

## 1. Introduction.

One of the greatest achievements of mathematics in twentieth century is Harish-Chandra's work on discrete series for semisimple Lie groups. Suppose  $G$  is a semisimple Lie group with a maximal compact Lie group  $K$ . Harish-Chandra proved that  $G$  has discrete series if and only if the real rank of  $G$  is equal to the rank of  $K$  ([HC]). In other words,  $G$  has discrete series if and only if  $G$  has a compact Cartan subgroup. Harish-Chandra also obtained a classification of the discrete series for semisimple Lie groups. Harish-Chandra's results on discrete series have been generalized to semisimple symmetric spaces. Flensted-Jensen ([FJ]) proved that a semisimple symmetric space  $G/H$  has discrete series if

$$(1.1) \quad \text{rank of } G/H = \text{rank of } K/K \cap H.$$

Later on Oshima and Matsuki ([OM]) proved if  $G/H$  has discrete series then it must satisfy the rank condition (1.1). That is to say, the semisimple symmetric space  $G/H$  has discrete series if and only if it has a compact Cartan subspace. Oshima and Matsuki also gave a description of all discrete series for semisimple symmetric spaces. Since the group  $G$  can be regarded as symmetric space  $G \times G/d(G)$ , the results of Flensted-Jensen, Oshima and Matsuki are the generalizations of Harish-Chandra's work.

If  $G$  is a semisimple Lie group and  $H$  a closed reductive subgroup, it is very natural to ask the following question: when does the semisimple homogeneous space  $G/H$  has discrete series? Based on the observation of the results mentioned above, we would guess  $G/H$  has discrete series if
