Food Fight Richard J. Sexton, 2025 Society s most basic challenge is arguably to produce and distribute enough food for its citizens In 2023 733 million people faced hunger and 2 3 billion were moderately or severely food insecure Feeding a growing world population is becoming more difficult as food demands rise in the face of climate change pest resistance to traditional treatments and misguided government policies that limit how much food ends up on our plates Policies to support biofuels organic agriculture local foods and small farms and to oppose genetically modified foods all reduce food production on existing land This leads to higher food prices increased carbon emissions and less natural habitat as cropland expands Food Fight documents the challenges to adequately feeding the world in the twenty first century and illustrates the ways in which contemporary food policies in the United States Europe and beyond imperil food security Richard J Sexton provides a window into the world of modern agriculture and food supply chains He separates the wheat from the chaff to distinguish policies that will limit or expand the global food supply and he explains how we can construct a food system that forestalls future hunger and environmental degradation

Eggs Diane Toops,2014-04-15 Which came first the chicken or the egg In Hindu scripture the world began as an egg Laid by a swan floating on the waters of chaos after a year the egg split into silver and gold halves with the silver becoming the earth and the gold transforming into the sky Throughout history the egg has taken on numerous meanings outside of the famous philosophical dilemma it was used for curing the evil eye by the Mayans as protection against lightning in Greece and to signify rebirth in Christian tradition In Eggs Diane Toops offers a fascinating tour of egg history and lore looking at how its significance has represented the preoccupations of the cultures that consume it After explaining the many varieties of eggs and the places that favor them Toops sketches a history of its uses from its origins until the present day when it has become an integral part of modern cuisine She explores how eggs are today marketed as a health food and discusses the debates over their nutritional status Filled with appetizing recipes and beguiling images this protein packed book will enthrall anyone with an interest in cuisine or cultural history
