Religion and the Order of Nature Seyyed Hossein Nasr,1996-09-26 The current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts In this book Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that has been advanced by modern secular science What is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans His goal is to negate the totalitarian claims of modern science and to re open the way to the religious view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The

resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth **Creativity in Business** Michael Ray,Rochelle Myers,1988-12-24 This exploration of innovative thinking in companies of all kinds shows us how creativity in business can enrich us and those who work with us

Brooks,2007-04-24 This book captures the essence of Charlotte Selver s practice of Sensory Awareness like no other publication It is an invitation to experience life firsthand again as we did when we were children In a culture where we have grown accustomed to accumulating knowledge from teachers and experts it is rare to find a book that actually invites us to trust our own senses again It is the authors intent to give back to the reader authority over his or her own experience and learning processes Much of the book focuses on reviving the senses in order to open the mind and body to direct learning The book imitates an actual Sensory Awareness class involving the reader as a student guiding him or her along a journey with and through the senses to a way of living that is in accordance with the natural functioning of the human organism in its environment The range of explorations include a renewed connection to the support of the earth as a foundation for trust the central role of gravity for our health and for finding orientation in life a study of breathing that promotes health and vitality and connecting and interacting with other people A handbook to a more genuine and connected way of living the work is also a beautifully crafted account of Sensory Awareness showing these profound teachers at work with their students and with the reader *Walking Your Talk* Lavinia
