Hard Traveling A Portrait Of Work Life:

Hard Traveling Carlos Arnaldo Schwantes,1999-11-01 The nearly two hundred rare and dramatic photographs in this work depict life at work in Oregon Washington Idaho and Montana in the late nineteenth and early twentieth centuries Work often arduous low paid and dangerous defined the region during its period of supercharged development from the 1880s to the 1920s A final section records work during the depression and war years in the 1930s and 1940s Complementing the photographs are statements by workers themselves government analysts and later observers The author s essays and commentary on the photographs demonstrate that from the beginning of U S control wage labor was crucial to integrating the Pacific Northwest into national and international networks of trade commerce and industry The development of lumber mining fishing railroad and service industries in the New Northwest marked the transformation of the region from an isolated periphery to a functioning component of the world economy and culture Schwantes also deals with the tension between the supposed freedom and individualism of the frontier West on the one hand and the constraints of wage labor as practiced in the late nineteenth and early twentieth centuries on the other This tension gave rise to an often militant trade unionism and political radicalism that was particularly marked in the Northwest

A Global History of Gold Rushes Benjamin Mountford,Stephen Tuffnell,2018-10-16 Nothing set the world in motion like gold Between the discovery of California placer gold in 1848 and the

rush to Alaska fifty years later the search for the precious yellow metal accelerated worldwide circulations of people goods capital and technologies A Global History of Gold Rushes brings together historians of the United States Africa Australasia and the Pacific World to tell the rich story of these nineteenth century gold rushes from a global perspective Gold was central to the growth of capitalism it whetted the appetites of empire builders mobilized the integration of global markets and economies profoundly affected the environment and transformed large scale migration patterns Together these essays tell the story of fifty years that changed the world **The Pacific in the Age of Early Industrialization** Kenneth

Pomeranz, 2017-05-15 The essays selected for this volume show how the Pacific rapidly became part of an industrializing world Its raw materials notably rubber and copper were critical some of its handicraft industries were devastated by mechanized competition others survived and adapted contributing to distinctive patterns of industrialization that made Japan a new center of power and also laid the groundwork for later growth in Taiwan Korea and coastal China The Pacific coast of the Americas was also first drawn into an industrial world largely as an exporter of raw materials but North and South diverged rapidly portending futures even more different than those of Northeast and Southeast Asia By the 1930s when the uneven effects of industrialization would have much to do with plunging the Pacific into war one can already glimpse in outline the structural bases for many of the region's contemporary characteristics All this is set in context in the important introduction by Kenneth Pomeranz The Routledge History of Rural America Pamela Riney-Kehrberg, 2016-04-14 The

Routledge History of Rural America charts the course of rural life in the United States raising questions about what makes a place rural and how rural places have shaped the history of the nation Bringing together leading scholars to analyze a wide array of themes in rural history and culture this text is a state of the art resource for students scholars and educators at all levels This Routledge History provides a regional context for understanding change in rural communities across America and examines a number of areas where the history of rural people has deviated from the American mainstream Readers will come away with an enhanced understanding of the interplay between urban and rural areas a knowledge of the regional differences within the rural United States and an awareness of the importance of agriculture and rural life to American society The book is divided into four main sections regions of rural America rural lives in context change and development and resources for scholars and teachers Examining the essays on the regions of rural America readers can discover what makes New England different from the South and why the Midwest and Mountain West are quite different places The chapters on rural lives provide an entrance into the social and cultural history of rural peoples women children and men as well as a description of some of the forces shaping rural communities such as immigration race and religious difference Chapters on change and development examine the forces molding the countryside such as rural urban tensions technological change and increasing globalization The final section will help scholars and educators integrate rural history into their research writing and classrooms By breaking the field of rural history into so many pieces this volume adds depth and complexity to

the history of the United States shedding light on an understudied aspect of the American mythology and beliefs about the American dream

The Port of Missing Men Aaron Goings, 2020-07-26 A compelling biography of the Ghoul of Grays Harbor In the early twentieth century so many dead bodies surfaced in the rivers around Aberdeen Washington that they were nicknamed the floater fleet When Billy Gohl 1873 1927 a powerful union official was arrested for murder local newspapers were quick to suggest that he was responsible for many of those deaths perhaps even dozens thus launching the legend of the Ghoul of Grays Harbor More than a true crime tale *The Port of Missing Men* sheds light on the lives of workers who died tragically illuminating the dehumanizing treatment of sailors and lumber workers and the heated clashes between pro and anti union forces Goings investigates the creation of the myth exploring how so many people were willing to believe such extraordinary stories about Gohl He shares the story of a charismatic labor leader the one man who could shut down the highly profitable Grays Harbor lumber trade and provides an equally intriguing analysis of the human costs of the Pacific Northwest's early extraction economy

Company Towns of the Pacific Northwest Linda Carlson, 2017-09-01 Company town The words evoke images of rough and tumble loggers and gritty miners of dreary shacks in isolated villages of wages paid in scrip good only at price gouging company stores of paternalistic employers But these stereotypes are outdated especially for those company towns that flourished well into the twentieth century This new edition updates the status of the surviving towns and how they have changed in the fifteen years since the original edition and what new life has been created on the sites of the ones that were razed In the preface Linda Carlson reflects on how wonderful it has been to meet people who lived in these towns or had parents who did and to hear about their memorable experiences

Repositioning North American Migration History Marc S. Rodriguez, 2004 An in depth look at trends in North American internal migration This volume gathers established and new scholars working on North American immigration transmigration internal migration and citizenship whose work analyzes the development of migrant and state level institutions as well as migrant networks With contemporary migration research most often focused on the development of transnational communities and the ways international migrants maintain relationships with their sending region that sustain the circular flow of people ideas and traditions across national boundaries it is useful to compare these to similar patterns evident within the terrain of internal migration To date however international and internal migration studies have unfolded in relative isolation from one another with each operating within these distinct fields of expertise rather than across them Although there has been some important linking there has not been a recent major consideration of human migration that works across and within the various borders of the North American continent Thus the volume presents a variety of chapters that seek to consider human migration in comparative perspective across the internal international divide Marc S Rodriguez is Assistant Professor of History at Princeton University Donna R Gabbaccia is the Mellon Professor of History at the University of Pittsburgh James R Grossman is the Vice President of Research and Education at the Newberry Library Chicago Contributors Josef Barton Wallace Best

Donna Gabbaccia James Gregory Tobias Higbie Mae Ngai Walter Nugent Annelise Orleck Kunal Parker Kimberly Phillips Bruno Ramirez Marc Rodriguez Repositioning North American Migration History is a volume in Studies in Comparative History sponsored by Princeton University's Shelby Cullom Davis Center for Historical Studies A History of America in Ten Strikes Erik Loomis, 2018-10-02 Recommended by The Nation the New Republic Current Affairs Bustle In These Times An entertaining tough minded and strenuously argued The Nation account of ten moments when workers fought to change the balance of power in America A brilliantly recounted American history through the prism of major labor struggles with critically important lessons for those who seek a better future for working people and the world Noam Chomsky Powerful and accessible A History of America in Ten Strikes challenges all of our contemporary assumptions around labor unions and American workers In this brilliant book labor historian Erik Loomis recounts ten critical workers strikes in American labor history that everyone needs to know about and then provides an annotated list of the 150 most important moments in American labor history in the appendix From the Lowell Mill Girls strike in the 1830s to Justice for Janitors in 1990 these labor uprisings do not just reflect the times in which they occurred but speak directly to the present moment For example we often think that Lincoln ended slavery by proclaiming the slaves emancipated but Loomis shows that they freed themselves during the Civil War by simply withdrawing their labor He shows how the hopes and aspirations of a generation were made into demands at a GM plant in Lordstown in 1972 And he takes us to the forests of the Pacific Northwest in the early nineteenth century where the radical organizers known as the Wobblies made their biggest inroads against the power of bosses But there were also moments when the movement was crushed by corporations and the government Loomis helps us understand the present perilous condition of American workers and draws lessons from both the victories and defeats of the past In crystalline narratives labor historian Erik Loomis lifts the curtain on workers struggles giving us a fresh perspective on American history from the boots up Strikes include Lowell Mill Girls Strike Massachusetts 1830 40 Slaves on Strike The Confederacy 1861 65 The Eight Hour Day Strikes Chicago 1886 The Anthracite Strike Pennsylvania 1902 The Bread and Roses Strike Massachusetts 1912 The Flint Sit Down Strike Michigan 1937 The Oakland General Strike California 1946 Lordstown Ohio 1972 Air Traffic Controllers 1981 Justice for Janitors Los Angeles 1990 Empire of Timber Erik Loomis, 2016 This is the first book to center labor unions as actors in American environmental policy *The Pacific Northwest* Carlos A. Schwantes, 1996-01-01 Carlos Arnaldo Schwantes has revised and expanded the entire work which is still the most comprehensive and balanced history of the region This edition contains significant additional material on early mining in the Pacific Northwest sea routes to Oregon in the early discovery and contact period the environment of the region the impact of the Klondike gold rush and politics since 1945 Recent environmental controversies such as endangered salmon runs and the spotted owl dispute have been addressed as has the effect of the Cold War on the region's economy The author has also expanded discussion of the roles of women and minorities and updated statistical information *Western Lives*

Richard W. Etulain, University of New Mexico. Center for the Southwest, 2004 The life stories of many individuals are woven together to tell the history of the American West from the earliest days of westward expansion to the twentieth century

Industrial Cowboys David Igler, 2005-01-28 The process by which two neighborhood butchers turned themselves into landed industrialists depended to an extraordinary degree on the acquisition manipulation and exploitation of natural resources Igler examines the broader impact of western industrialism as exemplified by Miller Lux on landscapes and waterscapes bringing to the forefront the important issues of land reclamation water politics San Francisco's unique business environment and the city's relation to its surrounding hinterlands He provides a rich discussion of the social relations engineered by Miller Lux from the dispossession of Californio rancheros to the ethnic segmentation of the firm's massive labor force Jacket *Federal Fathers & Mothers* Cathleen D. Clements Center for Southwest Studies Southern Methodist University **The Sagebrush Curtain** Melvin Adams, 2019-08-08 This book contains a diversity of natural and human stories about the southeast quarter of Oregon state an area seemingly empty and barren to many people driving through it This surprising view of the region features the botany geology wildlife and history of the area wrapped in a memoir of the author's youth spent there Born in the sagebrush community of Lakeview in 1941 the author moved on following high school graduation But as with many native sons and daughters from out of the way places the urge to return to his roots proved irresistible I endeavored to write this collection about the Oregon desert because of my childhood there says Adams but also because it is a place of startling mystery subdued danger and beauty **Race, Radicalism, Religion, and Restriction** Kristofer Allfeldt, 2003-03-30 In 1924 America passed legislation that effectively outlined which immigrants were to be considered beneficial to the national body and which were not Albert Johnson a Washington State Congressman sponsored the Act This study examines the role of the Pacific Northwest in the change of national sentiment that led up to this legislation Throughout the period this region experienced massive growth in its immigrant population Its forests and small towns were the scenes of many clashes with the alien radicals resulting in the creation of anti Catholic legislation and the laws against land ownership by the Japanese Analyzing issues of race religion and political radicalism Allfeldt determines that the region was highly influential in the national debate Most immigration studies of this era focus on the East Coast or on California but Allfeldt finds that Northwestern politicians and populists responding to regional events as much as national sentiments often set the national immigration agenda Diverse organizations such as the APA the Ku Klux Klan and the IWW gained powerful local support and had significant influence on the region's attitudes towards immigrants Rather than following California's lead in the opposition to Asian immigration the Northwest actually set the path for its southern neighbor in many important aspects
