**Moral Dilemmas and Moral Theory** H. E. Mason, 1996 The essays in this work focus on the theoretical significance of moral dilemmas

Ethics for Evaluation Rob D. van den Berg, Penny Hawkins, Nicoletta Stame, 2021-12-30 In Ethics for Evaluation the diverse perspectives on ethical guidance in evaluation are untangled and ordered in a theoretical framework focusing on evaluations doing no harm tackling bad and doing good Divided into four parts a diverse group of subject experts present a practical look at ethics utilizing practical experience to analyze how ethics have been applied in evaluations and how new approaches can shape the future of ethics The chapters collectively create a common understanding of the potential role of ethics to infuse

policy decisions and stakeholder initiatives with evaluations that provide better insight and potential solutions for problems going beyond what works to what needs to be done and what would help. The methodological scope ranges from working in contexts of fragility, conflict and violence to participatory and decolonized approaches including the ethical imperatives posed by global crises such as climate change, inequity and exploitative international relations. *Ethics for Evaluation* presents evaluators, commissioners of evaluation, policymakers and practitioners with inspiration for an ethical perspective on how evaluation can contribute towards solving problems. It presents a solid foundation for inclusive terminology and ethics guidance that would be the heart of a global exercise in professionalization of ethical evaluation practice. **Making Hard Choices in Journalism Ethics** David E. Boeyink, Sandra L. Borden, 2010-04-05 This book teaches students how to make the difficult ethical decisions that journalists routinely face. By taking a case-based approach, the authors argue that the best way to make an ethical decision is to look closely at a particular situation rather than looking first to an abstract set of ethical theories or principles. This book goes beyond the traditional approaches of many other journalism textbooks by using cases as the starting point for building ethical practices. Casuistry, the technical name of such a method, develops provisional guidelines from the bottom up by reasoning analogically from an easy ethical case, the paradigm, to harder ethical cases. Thoroughly grounded in actual experience, this method admits more nuanced judgments than most theoretical approaches.

**Kindness of Strangers** Deni Elliott, 2006 In *The Kindness of Strangers*, Deni Elliott examines ethically questionable situations that have arisen in response to institutional dependency on external benefactors. Major concerns analyzed include the increased professionalism of fundraising and of donating, an increased willingness of institutions to cater to the demands of donors, creation of dual roles for faculty, students and staff when they are fundraisers and donors in addition to playing their primary roles in higher education, business-university research partnerships that put business values in conflict with academic values, the commercialization of student athletics and endowment use and investment.
