Gallego, Sandra Hollingsworth, 2000. This critical exploration of the theories and purposes of literacy challenges current assumptions about the discourse of schooling. Authors Margaret Anne Gallego and Sandra Hollingsworth along with eminent scholars delve into the lives and literacies that have traditionally been excluded from public classrooms and focus on the disenfranchisement that results from such politics. They propose an alternative set of literacies helping non-mainstream students to learn the dominant language of power while preserving their community and personal identities. Through socio-political analyses the contributors argue persuasively for expanding what counts as literacy to include visual media and technological literacy, multiple sign systems for special education students, community-based literacy and personal literacies. This practical and fresh collection is an essential resource for educators, theorists and researchers who wish to expand the existing definitions of literacy to include multiple perspectives. **Cultural Studies** Lawrence Grossberg, Janice Radway, 2005-06-28. First published in 1995, Routledge is an imprint of Taylor & Francis, an informa company. *Points of View* James Moffett, Kenneth R. McElheny, 1995-08-01. Since its original publication in 1966, this volume has attained classic status. Now its contents have been updated and its cultural framework enlarged by the original editors. Many of the 44 stories come from a new writing generation with a contemporary consciousness and this brilliant blending of masters of the past and the brightest talents of the present achieves the goal of making a great collection even greater. **The Interdisciplinary Teacher's Handbook** Stephen Tchudi, Stephen Lafer, 1996. No matter what you teach or how long you've been teaching, *The Interdisciplinary Teacher's Handbook* will help you inspire the curiosity and motivation at the heart of students' best learning experiences. True advocates of localized exploration-based methodology, Tchudi and Lafer present a thoughtful approach to interdisciplinary teaching with lots of advice on developing your own program and curriculum. Rather than reduce interdisciplinary education to either theory or practice, Tchudi and Lafer offer a full explanation of how the two areas can work together. They provide a rationale for interdisciplinary teaching so that you can understand the why before accepting the how. Since the teacher's attitude is as important as the student's, Tchudi and Lafer include brief exercises that ask you to reflect on your most powerful learning experiences so that you can discover ways in which interdisciplinary methods match your natural thought processes. These Intermusings enable you to introduce new methods with an experiential understanding of how underlying theories work. Tchudi and Lafer never lose sight of the day-to-day difficulties teachers and administrators face. They offer practical information on several levels. The second part of the book is filled with Interdisciplinary Jumpstarters: ideas for organizing interdisciplinary projects on a number of topics, complete with lists of additional materials. Throughout the book, Tchudi and Lafer suggest resources for interdisciplinary teaching that are commonly overlooked, such as local businesses, government agencies and people and places with histories and stories to tell. Administrators and teachers
