### **EU Corporate Law and EU Company Tax Law**

Luca Cerioni,2007-01-01 With the European Union striving to become the world s most competitive economy the developments in the two closely interconnected areas of European corporate law and European company tax law are of utmost importance This book focuses on the crucial issues raised by these developments on their far reaching implications and on the key challenges to the future legislative choices The book illustrates the key developments in EU corporate law and EU company tax law the EU planned initiatives in these areas and at a time when member states increasingly tend to use company law and company tax provisions to attract businesses and investments it suggests how future developments can contribute to the undistorted functioning of the internal market and to the strategic Lisbon objective The explanation of these legislative and case law developments is of use to students and indicates new opportunities for business expansion strategies throughout the European Community The book concludes that new optional but attractive EU company law vehicles and company tax regimes would be in these two areas the only legal and effective means towards an undistorted functioning of the internal market and towards the Lisbon objective This ultimately gives rise to a far reaching challenge for all debates on the future patterns of European integration Luca Cerioni introduces new themes for academic research and discussion subjects for decision makers and at the same time uniquely makes these accessible to a much wider international public of students businesses and practitioners

**Tax Coordination in the European Community** Sijbren Cnossen, 2013-06-29 The results of the work of the Conference on Tax Coordination in the European Community appear at a time when the Community has undertaken as a priority task the completion of the internal market The Commission's programme and proposed timetable for the achievement of that goal are spelt out in the White Paper which was endorsed by the European Council at Milan in June 1985 an endorsement which was repeated at the Council's subsequent meeting in Luxembourg in December 1985 The Commission wholly endorses the views of the Conference as regards the need for urgent action to remove the grave restrictions on the free movement of the factors of production which continue to exist within the Community It is the Commission's firm view that only a true dismantling of fiscal frontiers can permit the creation of an area without internal frontiers for which the Single European Act provides To that end a certain approximation of rates of indirect taxation is indispensable if unacceptable distortion of competition is to be avoided It is noteworthy that the Conference attaches great importance to the Community's problems in the field of direct taxation This work will be particularly useful to the Commission which intends to produce a further White Paper on company taxation in the near future As the Conference rightly notes action in this field is important for equalisation of the conditions of competition necessary for the completion of the internal market

released in 2001 Company Taxation in the Internal Market recommends targeted measures in the short run and comprehensive ones in the long run crossing the border line of the currently prevailing transfer pricing approach inter alia in order to combat compliance costs in the field of transfer pricing Eighteen national reports from countries all over the world and a general report deal with the basics of administrative and compliance costs of taxation in general as well as compliance costs in the field of transfer pricing in particular The book is completed by three special reports on certain issues The findings of the reports included is greatly influenced by the discussions on the occasion of the Jean Monnet Conference on this topic which was held in spring 2006 in Rust Austria under the academic guidance of the Institute for Austrian and International Tax Law at the Vienna University of Economics and Business Administration Back cover *Fiscalité en Europe* European Tax Consultants Congress Staff, 2013-11-11

**Tax Treaties: Building Bridges between Law and Economics**, 2010 In this book experts from the field of economics take a different view of tax treaty issues than experts from the field of law In order to encourage the much needed communication between these two groups a cross disciplinary conference was held to discuss selected tax treaty issues from both a legal and economic perspective Twenty five conference papers on eight topics were prepared by lawyers and economists The papers on legal issues were presented and discussed by economists and vice versa The interdisciplinary focus of the conference not only allowed an exchange of knowledge between two groups who think differently about similar issues but also made it possible to better grasp the impact of the thinking of one group on the areas of interest to the other group The outcome of the conference is reflected in this book By showing the legal and the economic approaches to an issue this book improves the general understanding of the two disciplines and demonstrates how the decisions in one discipline may influence the other discipline and its concepts Twenty two contributions are included written by the most distinguished academics practitioners and representatives of several international tax administrations and both tax and economic institutions
