Kraybill, 2017-11-14 The rhetoric and political communication of the 2016 Presidential Election was arguably unconventional, partisan and polarizing, becoming a defining characteristic of the tone and feel of the campaign. In this volume we examine how rhetoric and various political communication strategies influenced and shaped the contours of the election and ultimately its outcome. Witnessing the most diverse electorate in U.S. political history, we look at how voters were primed for an anti-establishment outsider candidate and how various rhetorical and communication appeals were used to strategically engage different groups of voters and at times leave out or even scapegoat others. We also analyze how rhetoric and political communication shaped the debate on key issues such as climate change, immigration, national security, gender and representation. In an age where having a social media presence is an essential campaign tool, we examine how Twitter was used by candidates and its impact on the electorate and news coverage. Overall, we demonstrate that political rhetoric and communication is impactful, bearing electoral consequences and the potential for policy outcomes, giving the reader much to consider as we approach the next midterm and general election. **Communicating Politics** Mitchell S. McKinney, 2005

Half of our eligible citizens fail to cast a presidential ballot, and many more than half routinely ignore state and local elections. Does this phenomenon point to a crisis of democracy, or does such behavior simply reflect indifference or even contentment among the public? Should we be alarmed that so many of our citizens seem disinterested and unwilling to participate in the various activities and forms of association that constitute civic life? If we are concerned by such matters, what might be done to reengage those who are seemingly disengaged? This book explores these questions and examines the well-being of our civic condition at the beginning of the twenty-first century. Grounded in a communication perspective, we view the fundamental nature of a democracy as that of a civic dialogue, an ongoing conversation between our elected leaders or political candidates and the citizens they lead or wish to lead. Accordingly, the studies presented in this volume examine our civic sphere and the electoral process as a communicative interaction between elected officials, political candidates, the media, and citizens.
