Encyclopedic Dictionary of Named Processes in Chemical Technology, Fourth Edition Alan E. Comyns, 2014-02-21 Since the third edition of this reference was completed there have been major changes in the global chemical industry. With less emphasis on new processes for making basic chemicals and more emphasis on pollution prevention and waste disposal petrochemical processes are giving way to biochemical processes. These changes are reflected in the new processes being developed many of which have their own names. In addition niche improvements are still being made in petrochemistry and some of these processes have new names as well. Gathering and defining a large portion of special named processes that may fall outside standard chemical texts or be scattered among industry manuals. Encyclopedic Dictionary of Named Processes in Chemical Technology Fourth Edition provides a single source reference on an extensive array of named processes. It provides concise descriptions of those processes in chemical technology that are known by special names that are not self explanatory.
