Christian Ethics and Biomedical Innovation Stephen

Goundrey-Smith, 2024-11-05 In Christian Ethics and Biomedical Innovation Stephen Goundrey Smith outlines a strategy for future adoption of human enhancement technologies which will ensure that such technologies are a common good a strategy which is appropriate for a pluralistic society yet consistent with Christian ethical principles Drawing on the history of biomedical innovation to date in pharmaceutical medicine he argues that technological capability alone is not enough and that the responsible adoption of enhancement technologies will require active ethical deliberation and robust public policy discourse Goundrey Smith argues that biomedical technology ethics and public policy together form an essential triad for appropriate future enhancement technology adoption This approach helps to ensure that biomedical technologies introduced will be common goods and to reduce the risk of their instrumental use The use of any technology is closely linked to its sociopolitical and cultural context and drawing on Augustine's The City of God Goundrey Smith presents a theological vision for good biomedical technology innovation in human society

Assisted Human Reproduction Dani Singer, Myra

Hunter, 2006-02-22 With contributions from Eric Blyth Ken Daniels Julia Feast Robert Lee Nina Martin Alexina McWhinnie Derek Morgan Clare Murray Sharon Pettle Claire Potter Jim Richards and Francoise Shenfield The separation of procreation from conception has broadened notions of parenthood and created novel dilemmas A woman may carry a foetus derived from gametes neither or only one of which came from her or her partner or she may carry a foetus created using in vitro fertilisation IVF with the purpose of handing it to two other parents one neither or both of whom may be genetically related to the prospective child Parents may consist of single sex couples only one of them genetically related to the child the prospective mother may be past her menopause and genetic parenthood after death is now achievable In a world increasingly reliant on medical science how can the argument that equates traditional with natural and novel with unnatural unethical be justified Should there be legislation which is notoriously slow to change in a field driven by dazzling new possibilities at ever faster rate particularly when restrictions differ from country to country so that those who can afford it travel elsewhere for their treatment of choice Whose rights are paramount the adults hoping to build a family or the prospective child's future well being On what basis can apparently competing rights be regulated or adjudicated and how and to what extent can these be enforced in practice

Invitation to Christian Ethics Ken Magnuson, 2020-09-29 A comprehensive introduction to Christian ethics addressing today's most challenging moral issues Invitation to Christian Ethics is an indispensable guide for helping pastors counselors and everyday Christians navigate today's difficult moral questions Readers will benefit from Ken Magnuson's survey of ethics from a biblical perspective as well as contemporary theories of moral reasoning This survey is followed by twelve chapters devoted to some of the thorniest issues Christians encounter today such as Sexuality including homosexuality sexual identity and gender Marriage and divorce Infertility and assisted reproductive technologies Abortion

Physician assisted suicide Race relations Creation care Capital punishment Just war pacifism and the use of lethal force Magnuson provides biblical insight into each topic and presents key moral considerations He also answers specific practical questions that arise and concludes with a summary of his recommended approach to each issue Readers will learn how to grapple with difficult moral questions and will receive guidance for some of life's most challenging ethical conundrums Ethics will continue to be a line in the sand that separates Christians In this volume Magnuson gives us a biblically based logically sound historically rooted and future aware guide that the church so desperately needs in the face of sexual revolution moral relativism and advancing technology Brian Arnold President of Phoenix Seminary The Global Politics of Human Embryonic Stem Cell Science H. Gottweis, B. Salter, C. Waldby, 2009-01-15 Drawing on a wide range of interviews and primary and secondary sources this book investigates the dynamic interactions between national regulatory formation and the global biopolitics of regenerative medicine and human embryonic stem cell science **Soul of the Embryo** David Albert Jones, 2004-12-01 We are delighted to announce that this book has been short listed for the prestigious Michael Ramsey prize for the best in theological writing For more information please visit www.michaelramseyprize.org.uk A radical examination of the Christian tradition relating to the human embryo and how this relates to the debate today In recent years the moral status of the human embryo has come to the fore as a vital issue for a range of contemporary ethical debates concerning the over production freezing and discarding of embryos in IVF concerning the use of spare embryos for scientific experimentation and finally concerning the prospect of producing clone embryos These debates have involved not only general philosophical arguments but also specifically religious arguments Many participants have attempted to find precedent from the Christian tradition for the positions they wish to defend It is therefore extraordinary that until *The Soul of the Embryo* there has been no significant work on the history of Christian reflection on the human embryo Here David Albert Jones seeks to tell the story of this unfolding tradition a story that encompasses many different medical moral philosophical and theological themes He starts by examining the understanding of the embryo in the Hebrew Scriptures then moves through early Christianity and the Middle Ages to the Reformation and beyond Finally Albert Jones considers the application of this developed tradition to contemporary situation and questions which contemporary Christian view or views are best regarded as authentic developments of the tradition and which should be regarded as alien to the tradition **The Embryo Research Debate** Michael Joseph Mulkay, 1997-02-13 Scientific research involving human embryos was a major topic of public debate in Britain during the 1980s Despite strong support from the scientific community embryo research was initially condemned by many ordinary people as well as by special interest groups and came close to being banned by Act of Parliament Michael Mulkay describes the dynamics of the parliamentary struggle over the future of embryo research focusing on such issues as the clash between the anti abortion and pro research lobbies the tactics of the Government political ideology the media's role the importance of gender religion the impact of science fiction the lure of medical advance

and the difficulty of maintaining ethical control He explains how the advocates of embryo research eventually triumphed and ends with an examination of the cultural tensions which linger after the debate **Bioengagement** Nigel M. de S. Cameron, Scott E. Daniels, Barbara White, 2000 *Experiments on Embryos* Anthony Dyson, John Harris, 2012-10-12 Covering scientific legal ethical historical theological and public policy aspects of human embryo research the cases for and against are put strongly and clearly Scientific evidence is cogently presented by leading embryologists Scientific and Technical Terms in Bioengineering and Biological Engineering Megh R. Goyal, 2018-01-03 This immensely valuable book provides a comprehensive easy to understand and up to date glossary of technical and scientific terms used in the fields of bioengineering and biotechnology including terms used in agricultural sciences The volume also includes terms for plants animals and humans making it a unique complete and easily accessible reference Scientific and Technical Terms in Bioengineering and Biological Engineering opens with an introduction to bioengineering and biotechnology and presents an informative timeline covering the important developments and events in the fields dating from 7000 AD to the present and it even makes predictions for developments up the year 2050 From ab initio gene prediction to zymogen and from agrobacterium to zoonosis this volume provides concise definitions for over 5400 specialized terms peculiar to the fields of bioengineering and biotechnology including agricultural sciences The use of consistent terminology is critical in presenting clear and meaningful information and this helpful reference manual will be essential for graduate and undergraduate students of biomedical engineering biotechnology nanotechnology nursing and medicine and health sciences as well as for professionals who work with medicine and health sciences Research Ethics Ana Smith Iltis, 2006-01-16 Medicine in the twenty first century is increasingly reliant on research to guarantee the safety and efficacy of medical interventions As a result the need to understand the ethical issues that research generates is becoming essential This volume introduces the principal areas of concern in research on human subjects offering a framework for understanding research ethics and the relationship between ethics and compliance Research Ethics brings together leading scholars in bioethics and the topics covered include the unique concerns that arise in specific areas of research such as gene therapy and stem cell research Individual chapters also address the ethical issues that occur when conducting research with specific populations such as infants or adolescents and the volume looks at important emerging questions in human subjects research namely financial conflicts of interest and the interpretation of scientific data Ethics and Theology United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Public Health and Safety, 1997 Outside the Womb Scott Rae, Joy Riley, 2011-01-01 The use of assisted reproductive technology ART is on the rise in our culture as an alternative for couples facing infertility issues and single women desiring to have children Is it right morally ethically biblically to engage this new technology Are there some aspects of ART that are more acceptable than others Outside the Womb The Ethics of Reproductive Technologies addresses the whole issue of making life providing valuable information both theologically and

scientifically for Christian couples to reflect upon as they consider the various fertility treatments Embryo Politics

Thomas Banchoff, 2011-05-15 Since the first fertilization of a human egg in the laboratory in 1968 scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic Embryo stem cell and cloning research have provoked impassioned political debate about their religious moral legal and practical implications National governments make rules that govern the creation destruction and use of embryos in the laboratory but they do so in profoundly different ways In Embryo Politics Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries the United States the United Kingdom Germany and France Banchoff's book the first of its kind demonstrates the impact of particular national histories and institutions on very different patterns of national governance Over time he argues partisan debate and religious secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research Only by recovering a robust and public ethical debate will we be able to govern revolutionary life science technologies effectively and responsibly into the future Revisiting the Regulation of Human Fertilisation and Embryology

Kirsty Horsey, 2015-06-19 The Human Fertilisation and Embryology Act 2008 was a major update to the UK's laws on the use and regulation of reproductive technology and assisted reproduction Since the enactment of the new law the sector's regulatory body the Human Fertilisation and Embryology Authority HFEA has also consulted on various related topics including barriers to egg and sperm donation in the UK multiple births single embryo transfer and using IVF technology to prevent mitochondrial disease This book critically considers recent developments in human fertilisation legislation asking whether the 2008 Act has achieved its stated aim of being fit for purpose Bringing together a range of international experts the book evaluates the fresh risks and challenges emerging from both established and existing technologies and techniques in the field of human fertilisation and embryology as well as offering valuable insights into the social and regulatory challenges that lie ahead Key topics include problems with DIY assisted conception the lack of reform in respect of the regulation of surrogacy arrangements and mitochondrial DNA transfer As a review of the status of assisted reproduction legislation this book will be of great use and interest to students researchers and practitioners in medical law bioethics medicine and child welfare *"Ethics, Law and Society"* Jennifer Gunning, 2017-07-05 This key collection brings together a selection of papers commissioned and published by the Cardiff Centre for Ethics Law Society It incorporates contributions from a group of international experts along with a selection of short opinion pieces written in response to specific ethical issues The collection addresses issues arising in biomedical and medical ethics ranging from assisted reproductive technologies to the role of clinical ethics committees It examines broader societal issues with particular emphasis on sustainability and the environment and also focuses on issues of human rights in current global contexts The contributors collect responses to issues arising from high profile cases such as the legitimacy of war in Iraq to physician related suicide

The volume will provide a valuable resource for practitioners and academics with an interest in ethics across a range of disciplines

Technologies of Procreation Jeanette Edwards, 1993 An anthropology research team drawn from four British universities explores how assisted conception techniques create the potential for a redefinition of relationships because it is now possible to create life on behalf of another person They draw data and ideas from ethnographic studies household interviews and debates in Parliament and among clinicians Distributed by St Martin s Press Annotation copyright by Book News Inc Portland OR

South African Journal of Philosophy ,1996 **The Ethics of Embryonic Stem Cell Research** Katrien Devolder, 2015-01-22 Embryonic stem cell research holds unique promise for developing therapies for currently incurable diseases and conditions and for important biomedical research However the process through which embryonic stem cells are obtained involves the destruction of early human embryos Katrien Devolder focuses on the tension between the popular view that an embryo should never be deliberately harmed or destroyed and the view that embryonic stem cell research because of its enormous promise must go forward She provides an in depth ethical analysis of the major philosophical and political attempts to resolve this tension One such attempt involves the development of a middle ground position which accepts only types or aspects of embryonic stem cell research deemed compatible with the view that the embryo has a significant moral status An example is the position that it can be permissible to derive stem cells from embryos left over from in vitro fertilisation but not from embryos created for research Others have advocated a technical solution Several techniques have been proposed for deriving embryonic stem cells or their functional equivalents without harming embryos An example is the induced pluripotent stem cell technique Through highlighting inconsistencies in the arguments for these positions Devolder argues that the central tension in the embryonic stem cell debate remains unresolved This conclusion has important implications for the stem cell debate as well as for policies inspired by this debate

The Image of God, Personhood and the Embryo Calum MacKellar, 2017-04-25 Why are human embryos so important to many Christians What does theology say concerning the moral status of these embryos Answers to these questions can only be obtained by considering the manner in which Christian theology understands the great theme of the image of God This book examines the most important aspects in which this image and the related Christian notion of personhood can be used in the context of theological arguments relating to the moral status of the human embryo Thoughtful in approach and ecumenical in perspective the author combines a thorough knowledge of the science of embryology with a broad knowledge of the theological implications Part I Historical and Contemporary Christian Perspectives 1 The Moral Status of the Embryo 2 The Image of God 3 Being a Person from a Christian Perspective Part II The Image of God Personhood and the Embryo 4 Creation and the Embryo 5 Incarnation and the Embryo 6 Substantive Aspects and the Embryo 7 Relational Aspects and the Embryo 8 Functional Aspects and the Embryo Conclusion Appendix The Moral Status of New Kinds of Embryo
