Family Medicine John L. Buckingham,E.P. Donatelle,Thomas A. Jr. Johnson,Joseph E. Scherger,Robert B.

Taylor,2013-11-21 New material in a new format is contained in this third edition of Family Medicine The comprehensive text nevertheless remains true to the goal of previous editions in offering a scientific approach to health and illness within the context of the family Using up to date clinical material the book demonstrates how the family physician may provide comprehensive health care to persons of all ages The first part of Family Medicine discusses such topics as the conceptual basis of family as discipline and specialty problem differentiation family centered health care longitudinal care clinical reasoning and resource management The second part explores both problems related to organs and systems and problems related to the person family and community including pregnancy care of infants children adolescents and the elderly behavioral and psychiatric problems emergency and critical care sports medicine alcoholism and substance misuse environmental health and neoplastic and infectious diseases Family Medicine with its greatly expanded in depth coverage of the most commonly encountered clinical core problems and procedures in family medicine continues to be a textbook written and edited by family physicians for family physicians Quick Reference to Adult and Older Adult Forensics Mary E.

Muscari,Kathleen M. Brown,2010-05-20 2010 AJN Book of the Year Award Winner in Gerontologic Nursing This book is a wonderful guide to adult and elder forensics and an important reference for all health care providers who care for adults and the elderly Highly recommended CHOICE It s about time this book was written While excellent instructional texts exist this book fills a niche for the nonspecialty health professional encountering victims of violence in the routine course of care This book should not only be on the shelf in every ED but also in the armamentarium of providers working in the outpatient setting public health clinics residential facilities and student health clinics AJN Nurses and other health care professionals who work with victims and perpetrators of violence are often confronted with issues that they may not have prior training in such as identifying and managing victims of violent crime This book is designed to serve as a quick resource for practicing health care providers treating adults and older adults as well as students or practitioners new to the field The book not only

has full descriptions of principles of evidence but also offers detailed guidelines on how to conduct a forensic assessment of adults and older adults. Additionally, the authors examine the concepts of competency and guardianship and provide guidelines for navigating the justice system. The authors provide current, concise, and easy-to-use information in short chapters that assist practitioners with the prevention of crimes and the identification and management of both victims and offenders.

**Key features:**

- Presents general principles of forensics such as assessment and documentation principles of evidence and expert witness testimony.
- Covers a wide range of classes of adult victims including victims of intimate partner violence, human trafficking, stalking, and sexual assault.
- Discusses various types of offenders such as long-term offenders, those in correctional facilities, abusive parents, and female offenders.
- Includes a section on unnatural deaths covering suicide, homicide, and medicolegal death investigation.
