A Very Queer Family Indeed Simon Goldhill,2016-10-03 We can begin with a kiss though this will not turn out to be a love story at least not a love story of anything like the usual kind So begins A Very Queer Family Indeed which introduces us to the extraordinary Benson family Edward White Benson became Archbishop of Canterbury at the height of Queen Victoria s reign while his wife Mary was renowned for her wit and charm the prime minister once wondered whether she was the cleverest woman in England or in Europe The couple s six precocious children included E F Benson celebrated creator of the Mapp and Lucia novels and Margaret Benson the first published female Egyptologist What interests Simon Goldhill most however is what went on behind the scenes which was even more unusual than anyone could imagine Inveterate writers the Benson family spun out novels essays and thousands of letters that open stunning new perspectives including what it might mean for an adult to kiss and propose marriage to a twelve year old girl how religion in a family could support or destroy relationships or how the death of a child could be celebrated No other family has left such detailed records about their most intimate moments and in these remarkable accounts we see how family life and a family s understanding of itself took shape during a time when psychoanalysis scientific and historical challenges to religion and new ways of thinking about society were developing This is the story of the Bensons but it is also more than that it is the story of how society transitioned from the high Victorian period into modernity

The Pleasures of Memory Sarah Winter,2011 What are the sources of the commonly held presumption that reading literature should make people more just humane and sophisticated Rendering literary history responsive to the cultural histories of reading publishing and education The

Pleasures of Memory illuminates the ways in which Dickens's serial fiction shaped not only the popular practice of reading for pleasure and instruction but also the school subject we now know as English. Winter shows how Dickens's serial fiction instigated specific reading practices by reworking the conventions of religious didactic tracts from which most Victorians learned to read. Incorporating an influential associationist psychology of learning founded on the cumulative functioning of memory, Dickens's serial novels consistently led readers to reflect on their reading as a form of shared experience. Dickens's celebrity authorship, Winter argues, represented both a successful marketing program for popular fiction and a cultural politics addressed to a politically unaffiliated social activist Victorian readership. As late nineteenth century educational reforms consolidated British and American readers into mass populations served by state school systems, Dickens's beloved novels came to embody the socially inclusive and humanizing goals of democratic education.

Nineteenth-Century Anti-Catholic Discourses D. Peschier, 2005-06-21 By the middle of the nineteenth century much clearly gendered anti-Catholic literature was produced for the Protestant middle classes. *Nineteenth Century Anti Catholic Discourses* explores how this writing generated a series of popular Catholic images and looks towards the cultural, social and historical foundation of these representations. Diana Peschier places the novels of Charlotte Brontë within the framework of Victorian social ideologies, in particular the climate created by rise of anti-Catholicism, and thus provides an alternative reading of her work.

A History of Autofiction Alexandra Effe, 2025-10-02 Mapping the largely neglected history of autofictional literature and describing developments against socio-historical changes, cultural trends, and philosophical/psychological discussions around self and mind, this book both explores and historicizes autofiction's contemporary boom. Beginning with the genre's emergence in 18th century England against changes in publishing culture and author concept, and then tracing forms and functions of autofictional literature up to the contemporary moment, *A History of Autofiction* highlights why select narrative strategies are abandoned, transformed, or repurposed, which forms affordances, and effects of autofictional modes are persistent and which were particular to a given period. With focus on salient authors,

and texts from anglophone autofiction around the world and shining spotlights on insightful socio historical and biographical contexts Alexandra Effe foregrounds autofictional elements of works not previously considered for these dimensions and offers fresh perspectives on a range of canonical autofictional texts interdisciplinary in approach the book sheds light on autofictional phenomena through research in neuroscience psychology and philosophy of mind while demonstrating that autofictional literature holds insights for cognitive science Developing a cognitive holistic approach to the triad of author text and reader the book allows for a novel and more encompassing understanding of an important current cultural trend and of its diachronic development

The Portrait's Subject Sarah Blackwood, 2019-10-22 Between the invention of photography in 1839 and the end of the nineteenth century portraiture became one of the most popular and common art forms in the United States In The Portrait's Subject Sarah Blackwood tells a wide ranging story about how images of human surfaces came to signal expressions of human depth during this era in paintings photographs and illustrations as well as in literary and cultural representations of portrait making and viewing Combining visual theory literary close reading and archival research Blackwood examines portraiture's changing symbolic and aesthetic practices from daguerreotype to X ray Portraiture the book argues was a provocative art form used by writers artists and early psychologists to imagine selfhood as hidden deep and in need of revelation ideas that were then taken up by the developing discipline of psychology The Portrait's Subject reveals the underappreciated connections between portraiture's representations of the material human body and developing modern ideas about the human mind It encouraged figures like Frederick Douglass Nathaniel Hawthorne Thomas Eakins Harriet Jacobs and Henry James to reimagine how we might see inner life offering a rich array of metaphors and aesthetic approaches that helped reconfigure the relationship between body and mind exterior and interior In the end Blackwood shows how nineteenth century psychological discourse developed as much through aesthetic fabulation as through scientific experimentation
