**History** Arthur H. Shaffer, 2017-07-12 This is an analysis of the American Revolutionary generation's attempt to create a national history that would justify the Revolution and develop a sense of nationhood. Shaffer pursues a number of themes and establishes a connection between the historians' republican ideology, political concerns and outlook, and the precise ways in which they interpreted American history. He also includes an analysis of their background, education, profession, political persuasion, personal ambitions and circumstances, and attitudes toward the problem of union during the 1780s. The writings here offer unusual insights into the mind of the Revolutionary generation. The histories produced during the early national period represent the beginnings of a genre of writing new to America, one characterized by the subjugation of history to the service of nationalism. It is this element of nationalism that gave this history its flavor, made possible its achievement, saddled it with difficulties, and although unintentionally produced a tone and emphasis different from that of the Enlightenment. The contribution of the Revolutionary generation of historians to the public identity represents an important aspect of the intellectual history of the early national period. With all their frequent vagueness and imprecision of formulation, almost incantatory repetitiousness, and patriotic sentimentality, the works of the first national generation of historians comprise a revealing effort to come to grips with the meaning of the Revolution and nationhood. This striving charted much of the course that American historiography was to travel thereafter.

**The Military-industrial Complex** Paul A. C. Koistinen, 1980 *1865 TO THE PRESENT A UNITED STATES HISTORY FOR HIGH SCHOOLS*, 1865

**Beating Plowshares Into Swords** Paul A. C. Koistinen, 1996 Koistinen describes how an undeveloped preindustrial economy forced Americans to fight defensive wars of attrition like the Revolution and the War of 1812. By the time of the Mexican War, however, a gradually maturing economy allowed the United States to use a much more offensive-minded strategy to achieve its goals. The book concludes with an exhaustive examination of the Civil War, a conflict that both anticipated and differed from the total wars of the industrialized era. Koistinen demonstrates that the North relied upon its enormous economic might to overwhelm the Confederacy through a strategy of annihilation, while the South bungled its own strategy of attrition by failing to mobilize effectively a much less developed economy.
