S. Barwich, 2020-07-14 An NRC Handelsblad Book of the Year Offers rich discussions of olfactory perception the conscious and subconscious impacts of smell on behavior and emotion Science Decades of cognition research have shown that external stimuli spark neural patterns in particular regions of the brain We think of the brain as a space we can map here it responds to faces there it perceives a sensation But the sense of smell only recently attracting broader attention in neuroscience doesn't work this way So what does the nose tell the brain and how does the brain understand it A S Barwich turned to experts in

neuroscience psychology chemistry and perfumery in an effort to understand the mechanics and meaning of odors She discovered that scents are often fickle and do not line up with well defined neural regions Upending existing theories of perception Smellosophy offers a new model for understanding how the brain senses and processes odors A beguiling analysis of olfactory experience that is fast becoming a core reference work in the field Irish Times Lively authoritative Aims to rehabilitate smell s neglected and marginalized status Wall Street Journal This is a special book It teaches readers a lot about olfaction It teaches us even more about what philosophy can be Times Literary Supplement

Postle, 2015-01-08 Essentials of Cognitive Neuroscience guides undergraduate and early stage graduate students with no previous neuroscientific background through the fundamental principles and themes in a concise organized and engaging manner Provides students with the foundation to understand primary literature recognize current controversies in the field and engage in discussions on cognitive neuroscience and its future Introduces important experimental methods and techniques integrated throughout the text Assists student comprehension through four color images and thorough pedagogical resources throughout the text Accompanied by a robust website with multiple choice questions experiment vidoes fMRI data web links and video narratives from a global group of leading scientists for students For Instructors there are sample syllabi and exam questions

Los Alamos Science ,1988 Aranzio's Seahorse and the Search for Memory and Consciousness Alan J. McComas, 2022-09-30 Alan J McComas recounts the research that led to recognition of the hippocampus a structure deep within the brain as being primarily responsible for memory This intriguing and exciting account includes observations on patients with memory loss as well as insights from ingenious laboratory experiments

Advances in Multimedia Modeling Tat-Jen Cham, Jianfei Cai, Chitra Dorai, Deepu Rajan, Tat-Seng Chua, Liang-Tien Chia, 2007-07-05 The two volume set LNCS 4351 and LNCS 4352 constitutes the refereed proceedings of the 13th International Multimedia Modeling Conference MMM 2007 held in Singapore in January 2007 Based on rigorous reviewing the program committee selected 123 carefully revised full papers of the main technical sessions and 33 revised full papers of four special sessions from a total of 392 submissions for presentation in two volumes

Modern Discoveries in Neuroscience... And What They Reveal About You (Collection) Dale Purves, Miriam Boleyn-Fitzgerald, Andrew Koob, 2012-02-20 3 remarkable books reveal what neuroscientists have just learned about your brain and you Neuroscientists have made absolutely stunning discoveries about the brain discoveries that are intimately linked to everything from your health and happiness to the age old debate on free will In these three extraordinary books leading scientists and science journalists illuminate these discoveries helping you understand what they may mean and what may come next In Brains How They Seem to Work Dale Purves reviews the current state of neuroscientific research previewing a coming paradigm shift that may transform the way scientists think about brains yet again Building on new research on visual perception he shows why common ideas about brain networks can t be right uncovers the factors that determine our subjective experience sheds

new light on the so called ghost in the machine and points towards a far deeper understanding of what it means to be human

Next in Pictures of the Mind Miriam Boleyn Fitzgerald uses images from the latest fMRI and PET scanners to illuminate science's new understanding of the brain as amazingly flexible resilient and plastic Through masterfully written narrative and stunning imagery you'll watch human brains healing growing and adapting gain powerful new insights into the interplay between environment and genetics begin understanding how people can influence their own intellectual abilities and emotional makeup and join scientists in tantalizing discoveries about everything from coma to PTSD and Alzheimer's Finally in The Root of Thought Andrew Koob shows why glial cells once thought to be merely brain glue may actually hold the key to understanding intelligence treating psychiatric disorders and brain injuries and perhaps even curing Alzheimer's and Parkinson's You'll learn how these crucial cells grow and develop why almost all brain tumors are comprised of them and even their apparent role in your every thought and dream From world renowned scientists and science journalists including Dale Purves Miriam Boleyn Fitzgerald and Andrew Koob
