An Introduction to

Crime and Criminology Hennessey Hayes, Tim Prenzler, 2014-10-01 An Introduction to Crime Criminology 4e continues to bring together some of Australia's most widely respected authorities on criminology. The text explores popular knowledge and understanding about crime contrasting it with what we know about crime from official sources as well as from crime victims. The authors present and analyse the various ways that crime is defined and measured, the many and varied dimensions of crime, the broad range of theories offered to explain crime as well as some of the main ways governments and other agencies respond to and attempt to prevent crime.

Recent Advances in Intrusion Detection Engin Kirda, Somesh Jha, Davide Balzarotti, 2009-09-11 On behalf of the Program Committee it is our pleasure to present the proceedings of the 12th International Symposium on Recent Advances in Intrusion Detection systems RAID 2009 which took place in Saint Malo France during September 23-25. As in the past, the symposium brought together leading researchers and practitioners from academia, government, and industry to discuss intrusion detection research and practice. There were six main sessions presenting full research papers on anomaly and specification based approaches, malware detection and prevention, network and host intrusion detection and prevention, intrusion detection for mobile devices, and high performance intrusion detection. Furthermore, there was a poster session on emerging research areas and case studies. The RAID 2009 Program Committee received 59 full paper submissions from all over the world. All submissions were carefully reviewed by independent reviewers on the basis of space, topic, technical assessment, and overall balance. The final selection took place at the Program Committee meeting on May 21 in Oakland, California. In all, 17 papers were selected for presentation and publication in the conference proceedings. As a continued feature, the symposium accepted submissions for poster presentations which have been published as extended abstracts reporting early stage research, demonstration of applications, or case studies. Thirty posters were submitted for a numerical review by an independent three-person subcommittee of the Program Committee based on novelty, description, and evaluation. The subcommittee recommended the acceptance of 16 of these posters for presentation and publication. The success of RAID 2009 depended on the joint effort of many people.

Technologies of InSecurity Katja Franko Aas, Helene Oppen, Gundhus, Heidi Mork Lomell, 2008-08-21 *Technologies of InSecurity* examines how general social and political concerns about terrorism, crime, migration, and globalization are translated into concrete practices of securitisation of everyday life. Who are we afraid of in a globalizing world? How are issues of safety and security constructed and addressed by various local actors and embodied in a variety of surveillance systems? Examining how various forms of contemporary insecurity are translated into and reduced to issues of surveillance and social control, this book explores a variety of practical and cultural aspects of technological control as well as the discourses about safety and security surrounding them. Insecurity is a politically and socially constructed phenomenon with a variety of meanings and modalities. And exploring the inherent duality and dialectics between our striving for security and the simultaneous production of insecurity, *Technologies of InSecurity* considers how mundane objects and activities are becoming bearers of risks which need

to be neutralised As ordinary arenas such as the workplace the city centre the football stadium the airport and the internet are imbued with various notions of risk and danger and subject to changing public attitudes and sensibilities the critical deconstruction of the nexus between everyday surveillance and in security pursued here provides important new insights about how broader political issues are translated into concrete and local practices of social control and exclusion
