**Hadrian and the City of Rome** Mary Taliaferro Boatwright, 2021-01-12 How Hadrian left an enduring mark on the architecture and urban topography of ancient Rome The Pantheon the Temple of Venus and Roma Hadrian's Mausoleum transformed into Castel Sant Angelo and his villa at Tivoli epitomize for many the power and resources of Rome at its zenith Because other urban changes during Hadrian's principate A D 117 138 left less visible traces however few people realize how powerfully he transformed the capital city not only by erecting these and other monumental edifices but also by renovating buildings even entire districts and by reorganizing the building industry and neighborhood life Mary Taliaferro Boatwright compiles and assesses the varied evidence for Hadrian's buildings and his administrative changes and evaluates his effect on the capital city in a topographical and historical context A comprehensive catalogue follows the illustrated text *Hadrian and the City of Rome* Mary T. Boatwright, 1987 The description for this book Hadrian and the City of Rome will be forthcoming [Hadrian and the City of Rome](#) Mary Taliaferro Boatwright, 1987 The Description for this book Hadrian and the City of Rome will be forthcoming [Hadrian and the Cities of the Roman Empire](#) Mary Taliaferro Boatwright, 2018-06-05 Cities throughout the Roman Empire flourished during the reign of Hadrian A D 117 138 a phenomenon that not only strengthened and legitimized Roman dominion over its possessions but also revealed Hadrian as a masterful negotiator of power relationships In this comprehensive investigation into the vibrant urban life that existed under Hadrian's rule Mary T Boatwright focuses on the emperor's direct interactions with Rome's cities exploring the many benefactions for which he was celebrated on coins and in literary works and inscriptions Although such evidence is often as imprecise as it is laudatory its collective analysis undertaken for the first time together with all other related material reveals that over 130 cities received at least one benefaction directly from Hadrian The benefactions mediated by members of the empire's municipal elite touched all aspects of urban life they included imperial patronage of temples and hero tombs engineering projects promotion of athletic and cultural competitions settlement of boundary disputes and remission of taxes Even as he manifested imperial benevolence Hadrian reaffirmed the self sufficiency and traditions of cities from Spain to Syria the major exception being his harsh treatment of Jerusalem which sparked the Third Jewish Revolt Overall the assembled evidence points to Hadrian's recognition of imperial munificence to cities as essential to the peace and prosperity of the empire Boatwright's treatment of Hadrian and Rome's cities is unique in that it encompasses events throughout the empire drawing insights from archaeology and art history as well as literature economy and religion **The Architecture of Roman Temples** John W. Stamper, 2005-02-16 This book examines the development of Roman temple architecture from its earliest history in the sixth century BC to the reigns of Hadrian and the Antonines in the second century AD John Stamper analyzes the temples formal qualities the public spaces in which they were located and most importantly the authority of precedent in their designs He also traces Rome's temple architecture as it evolved over time and how it accommodated changing political and religious

contexts as well as the affects of new stylistic influences

Kalleres, 2015-10-13 Although it would appear in studies of late antique ecclesiastical authority and power that scholars have covered everything an important aspect of the urban bishop has long been neglected his role as demonologist and exorcist When the emperor Constantine made Christianity the official religion of the realm bishops and priests everywhere struggled to Christianize the urban spaces still dominated by Greco Roman monuments and festivals During this period of upheaval when congregants seemingly attended everything but their own orthodox church many ecclesiastical leaders began simultaneously to promote aggressive and insidious depictions of the demonic In *City of Demons* Dayna S Kalleres investigates this developing discourse and the church sponsored rituals that went along with it showing how shifting ecclesiastical demonologies and evolving practices of exorcism profoundly shaped Christian life in the fourth century      **Onomastics of the "Chanson de Roland"** Gustav A. Beckmann, 2023-03-20 This ambitious study of all proper names in the *Chanson de Roland* is based for the first time on a systematic survey of the whole geographical and historical literature from antiquity to after 1100 for the *Geographica* and on working through almost the entire documentary tradition of France and its neighbouring regions from 778 to the early 12th century for the personal names The overall result is clear the surviving song is more tightly and profoundly structured even in smaller scenes than generally assumed it is also richer in depicting reality and it has a very long prehistory which can be traced in outline albeit with decreasing certainty almost back to the Frankish defeat of 778 Here are some individual results for the first time a detailed and ultimately simple explanation not only of the pagan catalogue of peoples but also of the overarching structure of Baligant's empire the organisation of North Africa the corpus of the Twelve Anti Pairs as well as the pagan gods are given

and individual names such as Bramimunde and Jurfaret toponyms such as Marbrise and Marbrose are explained From Roland's Spanish conquests v 196 200 the course of the elapsed set anz toz plains is reconstructed Even the names of the weapons prove to be a small structured group in that they are very discreetly adapted to their respective pagan or Christian owner On the Christian side the small list of relics in Roland's sword is also carefully devised not least in what is left out a relic of the Lord this is reserved for Charlemagne's Joise The author explains for example why from the archangel triad only Michael and Gabriel descend to the dying Roland whereas the angel Cherubin descends in Rafael's place Munjoie requires extensive discussion because here a hitherto insufficiently recorded toponym has been secondarily charged by the poet with traditional theological associations The term Ter e major is attested for the first time in reality namely in the late 11th century in Norman usage For the core of France the fourth cornerstone along with Besan on Wissant and Mont Saint Michel is Xanten and its centre is Aachen The poet's artful equilibration of Charles's ten eschieles and their leaders is traced The Capetian barrier emerges as a basic fact of epic geography Approximately the last quarter of the study is devoted to the prehistory of the song going backwards in time still quite clearly visible is an Angevin Song of Roland from around 1050 in which Marsil e Olivier Roland Ganelon Turpin and Naimés already have roles similar to those in the preserved Song Behind it between about 970 and shortly after 1000 is the Girart de Vienne from the Middle Rh ne already recognised by Aebischer with the newly invented Olivier contra Roland Finally in faint outlines an oldest attainable also Middle Rh ne adaptation of the Roland material from shortly after 870 emerges For the Chanson de Roland Gaston Paris and Joseph B dier were thus each right on the main point that was close to their hearts the surviving song has both the thoroughly sophisticated structure of great art that B dier recognised in it and the imposingly long prehistory that Paris conjectured

**Monumentality and the Roman Empire** Edmund Thomas, 2007-11-16 The quality of monumentality is attributed to the buildings of few historical epochs or cultures more frequently or consistently than to those of the Roman Empire It is this quality that has helped to make them enduring models for builders of later periods This extensively illustrated book the first full length study of the concept of monumentality in Classical Antiquity asks what it is that the notion encompasses and how significant it was for the Romans themselves in moulding their individual or collective

aspirations and identities Although no single word existed in antiquity for the qualities that modern authors regard as making up that term its Latin derivation from monumentum a monument attests plainly to the presence of the concept in the mentalities of ancient Romans and the development of that notion through the Roman era laid the foundation for the classical ideal of monumentality which reached a height in early modern Europe This book is also the first full length study of architecture in the Antonine Age when it is generally agreed the Roman Empire was at its height By exploring the public architecture of Roman Italy and both Western and Eastern provinces of the Roman Empire from the point of view of the benefactors who funded such buildings the architects who designed them and the public who used and experienced them Edmund Thomas analyses the reasons why Roman builders sought to construct monumental buildings and uncovers the close link between architectural monumentality and the identity and ideology of the Roman Empire itself **Southern Europe**
