Dividing Hispaniola Edward Paulino,2016-02-16 The island of Hispaniola is split by a border that divides the Dominican Republic and Haiti This border has been historically contested and largely porous Dividing Hispaniola is a study of Dominican dictator Rafael Trujillo's scheme during the mid twentieth century to create and reinforce a buffer zone on this border through the establishment of state institutions and an ideological campaign against what was considered an encroaching black inferior and bellicose Haitian state The success of this program relied on convincing Dominicans that regardless of their actual color whiteness was synonymous with Dominican cultural identity Paulino examines the campaign against Haiti as the construct of a fractured urban intellectual minority bolstered by international politics and U S imperialism This minority included a diverse set of individuals and institutions that employed anti Haitian rhetoric for their own benefit i.e sugar manufacturers and border officials Yet in reality these same actors had no interest in establishing an impermeable border Paulino further demonstrates that Dominican attitudes of admiration and solidarity toward Haitians as well as extensive intermixture around the border region were commonplace In sum his study argues against the notion that anti Haitianism was part of a persistent and innate Dominican ethos

Peripheral Migrants Samuel Martínez, 1995 Peripheral Migrants examines the circulation of labor from rural Haiti to the sugar estates of the Dominican Republic and its impact on the lives of migrants and their kin The first such study to draw on community based fieldwork in both countries the book also shows how ethnographic and historical approaches can be combined to reconstruct patterns of seasonal and repeat migration Samuel Martinez pays close attention to the economic maneuvers Haitians adopt on both sides of the border as they use Dominican money to meet their present needs and to assure future subsistence at home in Haiti The emigrants who adapt best he finds are those who maintain close ties to their home areas Yet in addition to showing how rural Haitians survive under severe poverty and oppression Martinez reveals the risks they incur by crossing the border as cane workers divided families increased short term deprivation and economic insecurity and all too often early death He further notes that labor circulation is not part of an unchanging cycle in rural Haiti but a source of income that is vulnerable to the downturns in the global economy Acknowledging various theoretical perspectives the author compares the Haitian migrations with similar population displacements worldwide As he shows the

Haitian workers exemplify an important if seldom studied category of migrants those who neither move to the cities nor emigrate to countries of the North but circulate between rural areas of the Third World Thus this book serves to broaden our understanding of this lower tier of the world s migrants
