## Half Hours With Great Scientists:

**Half-Hours with Great Scientists** Charles G. Fraser, 1948-12-15 The present age is sometimes called the Scientific Age This does not imply that every member of the community is an expert scientist far from it It does mean however that the labours of the scientists have given the age certain features which influence the life of every citizen to some degree Accordingly it is desirable that as many as possible should have some understanding of the scientists work of their aims their point of view and their methods If we had a wishing rug or some sort of spare time car that could transport us at will to any place and time we might visit the scientists of every age see them at work listen to their discussions and even take a hand in the proceedings The wishing rug is not available but the literature of science will serve the purpose for anyone who will do the necessary searching reading and thinking Unfortunately some of that literature is decidedly inaccessible To meet the difficulty this book has been written in the hope of bringing some of the most important passages of the literature of science within the reach of everyone Every part of the vast edifice of science is necessarily the work of some human being and most of us become more interested in the building and are able to understand and appreciate it better when we know who were the architects and builders and when how and why they did their work The story of science is a noble epic of the struggle of man from ignorance toward knowledge and wisdom and toward the mastery of nature and of himself One purpose of science is to systematize experience and a knowledge of the story of science has helped many in that process of organization This book therefore offers the reader a cordial invitation to embark on a tour of visits with great scientists to learn from them the parts they played in the advancement of science and of the human race Here is a treasure house of fascinating information for all who are interested in the world around us and the history of man's understanding of it *Half-hours with great*
