Message from the President's Committee on Mental Retardation United States. President's Committee on Mental Retardation,1966 **Community Occupational Therapy with Mentally Handicapped Adults** Debbie Isaac,2013-12-20

The philosophy of normalization and promotion of the plight of children and adults with mental handicaps has drawn more public attention in recent years Governments in a number of countries have embarked upon policies involving the closure of institutions move ment of people with mental handicaps back into the community and development of community orientated programmes although their reasons for this may be economically rather than ideologically motivated Occupational therapists have moved into the community along with other health professionals in order to set up community services for people with mental handicaps My own experience of working in a multidisciplinary team in Central London for 2V2 years helping adults with mental handicaps to move out of an institution has been a source of motivation to write this book The amount of written material available on the occupational therapy approach to re settlement and de institutionalization is limited in comparison with the massive amount of information written by and for other practitioners Additionally the number of texts written by and for occupational therapists with this dient group are few Despite excellent support from OT colleagues I experienced considerable frustration trying to define and perform my role not helped by a shortage of texts to draw on The Essentials of Postgraduate Psychiatry Robin Murray,1997-08-21 The third edition of this highly successful postgraduate psychiatry text offers a comprehensive review of the characteristic causes and treatment of the main psychiatric disorders As with earlier editions it is subdivided into four parts models and principles origins presentation and course of major clinical symptoms psychiatry in the social forensic and medical contexts treatments both biological and psychological It is also extensively referenced throughout and emphasises the relationship of research findings to clinical practice The text has been extensively revised and updated in line with the most recent developments in psychiatric practice and thinking In particular more discussion is given to measurement issues concepts of illness brain function and neurophysiology The highly distinguished team of contributors has also been enhanced through the introduction of one or two of the newer stars in the field This new edition will without doubt be valued by all members of the multidisciplinary mental health care team as well as general practitioners who seek an authoritative yet readable account of modern psychiatry *Management of Communication Needs in People with Learning Disability* Sam Abudarham,Angela Hurd,2002-04-29 This practically oriented book has been predominantly targeted at undergraduate speech and language therapy students speech and language therapists who have recently started work in this field and other professionals working with people with learning disabilities All the authors have had practical experience and or conducted research in this field The presentation of the chapters follow a need to know order starting with an exploration of a range of Service Delivery issues continuing with theoretical and practical issues related to Appraisal and Assessment of Communication Needs and quickly moving on to management issues starting with Management Models which is followed by a chapter on Early Intervention work on Pre symbolic and Pre linguistic development and

transition from Word to Phrase For those requiring to extend their knowledge in more specialised areas a number of chapters deal with subjects such as the use of Augmentative and Alternative Communication and working with Parents and Members of Related Professions The last two chapters address topics which have more recently attracted attention these being the management of the communication needs of service users with Challenging Behaviour and those with Dual Diagnosis learning disability and mental illness combined Most chapters include case studies to illustrate a number of practice issues Whereas the main focus is on children with learning disability where appropriate discussion relevant to adults with learning disability is included

Anger Treatment for People with Developmental Disabilities John L. Taylor, Raymond W. Novaco, 2005-12-17 Anger and aggression are prevalent problems among people with developmental disabilities and constitute primary reasons for them to be admitted and re admitted to institutions They are also a key reason for the prescribing of behaviour control and anti psychotic medication to this client group Stimulated by growing research in this area mental health and criminal justice professionals have begun to see the benefits of anger assessment and cognitive behavioural anger treatment for people with developmental disabilities There is no prior text to guide anger treatment provision to this client group This text presents a manual guided cognitive behavioural anger treatment protocol grounded in a solid theoretical framework and empirical evidence for its efficacy in clinical practice The assessment and treatment approach is designed to engage and motivate patients with recurrent and deep rooted anger problems and their manifestation in serious aggressive behaviour Accompanying the treatment protocol are a number of worksheets handouts and exercise sheets for clinicians and clients that can be accessed online
