Breaking Through to Effective Teaching Patricia Martinez-Miller,Laureen Cervone,2008 School leaders search for effective and practical ways to live out what research tells us makes a difference in student learning Research literature is easy to embrace theoretically but it is much more difficult to turn research into compelling collective action How do we create the climate where the trusting members of a professional learning community improve the results of their practice What does it take to be the small learning community that includes students and parents as well as professional educators What will we do to harness the positive power of community to transform the learning and achievement of all students This walk through protocol provides both a process and a tool for inquiry based professional development community engagement and ultimately student self direction It starts with a school s commitment to build an inquiry model that assumes the capacity for extraordinary learning on the part of students teachers administrators and families The protocol can be employed narrowly to guide the improving practice of a couple of teachers with a passion for biology for example or more broadly Many of the improving schools highlighted in the chapters of this book chose the walk through protocol as a frame for school wide professional development that led to exceptional growth in learning and student achievement This process allows schools to create a community where all members approach learning as an inquiry and are proactive designers of their success

Improving Teaching Effectiveness: Implementation Brian M. Stecher,Michael S. Garet,Laura S. Hamilton,Elizabeth D. Steiner,Abby Robyn,Jeffrey Poirier,Deborah Holtzman,Eleanor S. Fulbeck,Jay Chambers,Iliana Brodziak de los Reyes,2016-06-06 To improve the U S education system through more effective classroom teaching in school year 2009 2010 the Bill and Melinda Gates Foundation announced its Intensive Partnerships for Effective Teaching Researchers from the RAND Corporation and the American Institutes for Research evaluated implementation of key reform elements of the program in three public school districts and four charter management organizations

International Beliefs and Practices That Characterize Teacher Effectiveness Grant, Leslie W.,Stronge, James H.,Xu, Xianxuan,2021-06-18 Research surrounding teacher quality and teacher effectiveness has continued to grow and

become even more prominent as teaching has become more professionalized globally and countries have invested more comprehensively in teacher education certification and professional development To better understand teacher effectiveness it is important to have a global viewpoint to truly understand how beliefs and practices vary in each country and can lead to different characterizations of what makes an effective teacher This includes both cross cultural commonalities and unique differences in conceptualization of teacher effectiveness and practices With this comprehensive international understanding of teacher effectiveness a better understanding of best practices teacher models philosophies and more will be developed International Beliefs and Practices That Characterize Teacher Effectiveness identifies shares and explores the predominant conceptual understandings of beliefs and practices that characterize effective teachers in different countries This book provides international and cross cultural perspectives on teacher effectiveness and examines the prominent philosophies of teaching and pedagogical practices that characterize teachers in selected countries Each chapter includes a background such as history and undergirding philosophy within each country effective teacher models prominent applications of teacher effectiveness practices and special or unique features of teaching in the specific countries mentioned This book is essential for practicing educators in various countries teacher educators faculty and students within schools and colleges researchers in international comparative studies organizations engaged in international education and administrators practitioners and academicians interested in how teacher effectiveness is characterized in different countries and regions across the world

The Active Teacher Ron Nash, 2009-06-02 Master proactive teaching skills that motivate students to learn Written by a nationally known teacher coach this thought provoking book helps educators bring their teaching skills to a new level of excellence and build a partnership with their students With a focus on the three Rs routines rules and relationships the author helps readers Create and sustain a classroom community that promotes respect and achievement Fully involve students in learning while addressing a wide range of cognitive styles Strengthen collaboration with students colleagues and parents Use feedback and assessment to develop professionally and improve students academic performance *On Becoming an Effective Teacher* Carl R Rogers, Harold C Lyon, Reinhard Tausch, 2013-08-22 On Becoming an Effective Teacher describes exemplary practices like Teach For America which highlight the power of person centered teaching to bring about higher student achievement and emotional intelligence Lyon situates the classic with the cutting edge integrating wisdom with research anecdote with practical advice to find truths that reveal paths toward effective teaching Jeffrey Cornelius White Psy D LPC Professor of Counseling Missouri State University USA Author of Learner Centered Instruction Building Relationships for Student Success This fascinating book reveals through current research and contemporary applications that Carl Rogers pioneering and radical approach to education is as relevant today as it was in the 1970s and 80s Brian Thorne University of East Anglia UK Carl Rogers is one of the most influential psychologists of the twentieth century His influence is similarly outstanding in the fields of education counselling psychotherapy conflict resolution and peace On

Becoming an Effective Teacher presents the final unpublished writings of Rogers and as such has not only unique historical value but also a vital message for today's educational crises and can be read as a prescription against violence in our schools. It documents the research results of four highly relevant related but independent studies which comprise the biggest collection of data ever accumulated to test a person-centred theory in the field of education. This body of comprehensive research on effective teaching was accomplished over a twenty-year period in 42 U.S. States and in six other countries including the UK, Germany, Brazil, Canada, Israel, and Mexico and is highly relevant to the concerns of teachers, psychologists, students, and parents. The principal findings of the research in this book show that teachers and schools can significantly improve their effectiveness through programs focusing on facilitative interpersonal relationships. Teachers who either naturally have or are trained to have empathy, genuineness, congruence, and who prize their students' positive regard create an important level of trust in the classroom and exert significant positive effects on student outcomes including achievement, scores, interpersonal functioning, self-concept, attendance, and violence. The dialogues between Rogers and Lyon offer a unique and timeless perspective on teaching, counselling, and learning. The work of Reinhard Tausch on person-centered teaching for counselors, parents, athletics, and even textbook materials and the empathic interactions of teachers and students is among the most thorough and rigorous research ever accomplished on the significance and potential of a person-centered approach to teaching and learning. This pioneering textbook is highly relevant to educational psychologists and researchers as well as those in undergraduate and graduate university courses in education, teacher training, counseling psychology, and educational psychology.

Learning from the Student's Perspective Alison Cook-Sather, Brandon Clarke, Daniel Condon, Kathleen Cushman, Helen Demetriou, Lois Easton, 2015-11-17. Much has been written about how to engage students in their learning but very little of it has issued from students themselves. Compiled by one of the leading scholars in the field of student voice, this sourcebook draws on the perspectives of secondary students in the United States, England, Canada, and Australia as well as on the work of teachers, researchers, and teacher educators who have collaborated with a wide variety of students. Highlighting student voices, it features five chapters focused on student perspectives articulated in their own words regarding specific approaches to creating and maintaining a positive classroom environment and designing engaging lessons and on more general issues of respect and responsibility in the classroom. To support educators in developing strategies for accessing and responding to student voices in their own classrooms, the book provides detailed guidelines created by educational researchers for gathering and acting upon student perspectives. To illustrate how these approaches work in practice, the book includes stories of how pre-service and in-service teachers, school leaders, and teacher educators have made student voices and participation central to their classroom and school practices. And finally, addressing both practical and theoretical questions, the book includes a chapter that outlines action steps for high school teachers, school leaders, and teacher educators and a chapter that offers a conceptual framework for thinking about and engaging in this work. Bringing

together in a single text student perspectives descriptions of successful efforts to access them in secondary education contexts concrete advice for practitioners and a theoretical framework for further exploration this sourcebook can be used to guide practice and support re imagining education in secondary schools of all kinds and the principles can be adapted for other educational contexts *Effective Teaching* Gilbert H. Hunt, Dennis G. Wiseman, Timothy J. Touzel, 2009 Schools today have transcended from the chalkboard to the whiteboard and are populated by students who are not frightened to use the technology of this new age of learning During this period of dynamic change teachers must be ready to meet the challenges of preparing students for a global society characterized by diversity and ever increasing expectations
